Honorable Donald R. Blydenburgh
Suffolk County Presiding Officer
Suffolk County Legislature
Veterans Memorial Highway
Hauppauge, N. Y. 11788

Dear County Executive and Presiding Officer:

Herewith please find Volume 1 of the Suffolk County Park Policy Plan. Part of a three-volume publication, this volume contains an executive summary of the study, an overview of recreational offerings in all public parks in Suffolk County, an examination of County Parks Department revenues and expenses and recommendations regarding park use and management.

The other two volumes of the study contain a parkland inventory listing by County tax map number (Volume 2) and a detailed evaluation with recommendations for each and every County park and preserve listed by township (Volume 3).

We hope this publication authorized by the Legislature (I.R. 1846-90) under a Suffolk County Water Authority Challenge grant, will be of great value to you in formulating policy and legislation, and also to park planning professionals and interested citizens for their use, as well.

Yours truly,

Stephen M. Jones

Acknowledgments

This Department wishes to thank the Towns that supplied all the information on local recreation and open space, along with the Nature Conservancy providing information on their extensive holdings throughout the County.

The Staff of this Department especially thanks the Suffolk County Department of Parks, Recreation and Conservation. Commissioner Edward Wankel and his staff provided extensive assistance in gathering data and developing the policy recommendations.

The Staff extends its appreciation to Messrs. Schuyler (Bud) Corwin, Joe Paige, Dean Phillippi, Dave Salvatore, William Sickles, Larry Hynes and John Turner of the Department of Parks, Recreation and Conservation, and Messrs. Donald Weir and Jack Hauptman of FINS for their assistance in the off-road vehicle portion of the report.

Finally, this study was coordinated by the late Arthur H. Kunz, Planning Department Director from 1989 to 1993. His extensive knowledge of Suffolk County gained throughout his thirty-year association with the Suffolk County Planning Department was an extraordinary resource in the development of this study. The staff acknowledges his gifted leadership.

May 1994

EXECUTIVE SUMMARY

OVERVIEW

The Suffolk County Parks system contains over 30,000 acres of land. With the addition of County owned properties that are not currently classified as parks, the grand total becomes 31,000 acres. One-third of the land is set aside as watershed preservation and nature preserve, with 7,500 and 2,500 acres respectively. The other two-thirds are park properties that can accommodate some type of active recreation. Only 3,600 acres of this category are improved with park facilities, while 17,000 acres are currently unimproved some may provide future opportunities for recreation; others should remain in their natural state.

More than one-third of all the County holdings occur in the Town of Southampton. The Town of Brookhaven has the next largest acreage in County parks.

The report has grouped all of the County park holdings into 157 management areas. These management areas range from tiny isolated nature preserves and watershed preserves to large parks that are greater than 1000 acres. There is a complete tax map listing for each of the 157 parks which allows users to verify the existence of County parkland as of January 1993. The inventory also includes breakdowns of the various categories of acquisition for each of the park areas. A series of maps is contained in the report which note all of the 157 park management areas by number to allow visual identification of the properties. Also included on these maps are all Federal, State, Town, Village and private open space and recreation areas in the County. The current total of all open space land is now over 90,000 acres.

The report discusses the role of County parks in the entire recreation system. County parks should be regional facilities that provide activities to attract people from beyond their immediate neighborhoods. They should not be small parcels that are competitive with Town, Village and private association resources. County parks are best at providing swimming, camping facilities, marinas, equestrian facilities and hiking areas.

A study of needs for recreation done by New York State indicates that the following facilities will be in demand in Suffolk County: field games, jogging, biking, day hiking, back packing and horse-back riding. These activities also are attractive to visitors to Suffolk County and, therefore, the importance of tourism especially eco tourism and the economic activity it generates should be taken into account in any proposed improvements to the County park system.

NEEDS IDENTIFIED

One of the major concerns of the operation of the park system is the limited amount of resources that have been available and the continuing need to increase user fees. Between 1985 and 1990, the Department of Parks, Recreation and Conservation budget decreased from .743 to .669 percent of the total County budget. In comparing eight large Counties in New York State, Suffolk County has the third lowest operating budget. State aid which amounted to \$500,000 in 1983 is almost non-existent at the present time. User fees have had to increase from 35% of the total budget to 77% in the last ten years. The facilities that bring the biggest return are the four golf courses with almost \$3,000,000 a year and Smith Point Park, with \$1-2 million per year.

The issue of management is a major element in this report because there are dumping and vandalism problems on many of the County properties. The problem is somewhat alleviated where there are park personnel on the site at all times. Therefore, it is important to have at least one residential facility in each of the major park areas as a partial deterrent to vandalism. For many years, the County park system has been managed directly by the County. However, the lack of resources will demand joint municipal agreements and non-profit or private management to achieve the management needs for the entire system.

One section of the report deals specifically with the management question of off road vehicles. In the five County parks that allow off road vehicles and outer beach camping, there is continued potential for land use and environmental resource conflicts. A 300% increase in off road vehicle permits in the last fifteen years indicates why there is a potential for conflict. It is necessary to establish area, seasonal and daily restrictions to protect the resources of the beaches. These limits should include caps on the number of daily users in certain situations.

GENERAL RECOMMENDATIONS

The general recommendations include a classification of all of the park holdings as to the best possible uses based on recreational needs, environmental constraints, and the limitations of access. Necessary capital improvements are noted so that an overall capital improvement program can be developed. A Natural Resources Management Division should be set up in the Parks Department to control the very environmentally sensitive park properties in the County system.

The Suffolk County Park Rangers play a vital role in both public safety as well as the policing of our environmentally sensitive lands. It is recommended that the Park Rangers stay within the Parks Department from a management point of view. In addition, this unit should be studied to determine the proper level of staffing necessary to fulfill the mission of the Park Rangers. In 1987, the Park Ranger division had an authorized strength of forty-eight positions. Today (1993), there are only twenty-eight on staff.

The report gives the highest priority for future acquisitions to infill properties. These are parcels that adjoin County or other open space holdings and, if acquired, will make management easier and will also expand opportunities for continuous park trails and equestrian corridors. As far as new facilities are concerned, the report suggests that a central sport facility for tournament play is needed.

In order to fund capital improvements and maintenance, it is important to have a form of dedicated funding just for park purposes. A special parks district with its own tax resources could be used to supplement the revenue from fees and create a continuous stream of funds so that capital improvements and maintenance could be properly programmed over a period of years.

A management fund is important for maintaining many of the County holdings. However, there should still be consideration of varied management approaches to reduce overall costs. Joint management agreements with other municipalities and the Nature Conservancy have been effective and should be expanded. The idea of adopt-a-park can be useful for various County properties that are really neighborhood facilities. Local schools, environmental groups or neighborhood associations should be participants in this program. In addition, it is necessary to exchange certain parcels of land, transfer development rights, and sell unusable parcels to improve overall management.

The policy plan recommends development and/or management approaches for all the County holdings and points out the need for a complete master plan for thirteen major parks. These master plans should be prepared by a committee of users, neighbors, and County involved agencies. There is also a recommendation for nature preserve plans for small parcels that the County has obtained for this purpose in various neighborhoods in the County. Also indicated in the plan is the need for coordination, between the departments, County Executive's Office and the Legislature.

Introduction

INTRODUCTION

Suffolk County has one of the most extensive park networks of any County its size with more than 30,000 acres in public ownership. However, a large amount of this land is presently unimproved, and there are continuous demands for active and passive park uses on land that is owned by the County of Suffolk.

At the present time, the Parks Department responds to requests for various types of recreational uses. Requests can come from civic associations, various recreation organizations, park trustees, the legislature or the administration. Proposals are then made for capital improvement funds during the annual capital budget process. Some projects are approved by the Legislature; others remain unfunded.

An established policy is necessary for the Suffolk County park system relating to the type of recreation demanded and the best uses for individual properties based on environmental constraints, access and other characteristics. Therefore, a search for funds to conduct a comprehensive study began over three years ago. Approval was given in 1990 and the 1991 County budget included an authorization of \$200,000 for a County park study. These funds were assigned to the Suffolk County Planning Department as part of a grant from the Suffolk County Water Authority received in conjunction with the purchase of the Hither Woods watershed preservation parcel in Montauk.

Department cutbacks delayed the extensive field survey of all properties into 1992. In addition, it became apparent that there was a need for a complete tax map inventory of all parcels that were parkland or could be parkland. The recent poor economy caused many foreclosures and thus, transfers of additional park properties were added to the County inventory. It became obvious that this widespread network of open space lands had to be mapped and annotated on a town-by-town basis in order to see the spatial distribution of all the County holdings.

Goals of the Study

GOALS OF THE STUDY

- **A primary goal is to develop policy guidelines** for the use and management of County parks. It is important to identify where active parkland will be needed and how funding should be obtained for the necessary facilities. Management policies for all of the parks are important to control misuse, dumping and other encroachments on the County's valuable land and facilities. There will be an increasing need to address conflicts among park users and with adjacent property owners as park usage increases in the future. The policy should include a combination of public and private resources for proper maintenance at the least cost to the County.
- **Protecting unique natural features, scenic areas and historic sites** has long been a goal of the County park acquisitions. Further acquisitions along these lines, coupled with the enhancement of those that are currently in place are important. The County owns numerous nature preserves, wetlands, watershed preserves and historic sites. Some of these can be used for greenbelts and trails that can functionally and visually enhance park areas and provide access for a wide variety of residents and visitors.
- **There are additional parcels that could be acquired** to enhance or protect existing County open space holdings. A goal of this study is to carry out the recommendations of the open space section of the Bi-County Comprehensive Plan and the Special Groundwater Protection Area Plan as they relate to Suffolk County Stewardship.

- **A fourth goal is to provide recreational opportunities** that are not generally available in the smaller local parks or the larger state and federal parks. Facilities such as golf courses, camping, picnicking, beaches, equestrian trails are some of the main uses in County parks. These uses are either not available in some of the state parks or are in parks that are very heavily used. Local parks are very good at meeting the immediate needs of the surrounding neighborhoods, such as playgrounds, basketball, baseball, soccer and tennis, but often have limitations in accommodating more regional needs.
- **There is a need to enhance tourism** in Suffolk County since it is one of the major industries. A goal of using some of the existing parkland for visitors to the County can provide necessary resources to develop some park areas that need new facilities or improved management.

Recent studies have shown that non-residents can be accommodated in some parks and golf courses that are not fully used by County residents. The 1992 fee structure has some reductions in the higher fees for non-residents to encourage full use and more total income.

A study of tourism done as part of the Long Island Comprehensive Plan showed a clear need for family-oriented activities in the area. At the present time, County facilities such as beaches and camping areas provide the most family-oriented opportunities, along with the County Farm in Yaphank that is operated by the Suffolk County Cooperative Extension Program. Commercial facilities now provide a zoo and water park. However, some additional family-type opportunities can be accommodated in County facilities where there is land available that is not of an environmentally sensitive nature. The private sector should also be considered as a resource for developing and operating these types of facilities.

Existing Parkland

EXISTING PARKLAND

Inventory

The inventory in Table 1 following represents the most complete record of County park holdings available, along with each parkland's acquisition and use category. Included on the list are all County parks (some over 1,000 acres), some small nature preserves and nine parcels of County-owned land that should be formally identified as parkland. These nine proposed parks contain over 850 acres.

The list contains 157 individual park holdings. However, for administrative purposes, some of the multiple holdings, such as the Manorville Pine Barrens, Robert Cushman Murphy Park, Hampton Hills, Suffolk Hills, etc., have been grouped with nearby parcels for evaluation purposes. A complete listing of all of the tax map parcels for each of the 157 park locations is found in Appendix A. The Planning Department assigned names to all holdings, along with a four digit reference number for County parks arranged by town. These reference numbers are shown in Appendix A and on the park maps for each of the ten towns. Maps are available as a separate volume.

Brookhaven, the largest Suffolk County town, has 8,413 acres of Suffolk County parklands. However, that total is exceeded by the Town of Southampton with 10,890 acres. The smallest town in the County, Shelter Island, has only 16 acres of County parkland. Overall, the lightly populated five east end towns contain 55% of all County park holdings.

There are almost 2,500 acres of nature preserve land within the park properties. This acreage is dedicated to nature preserve and can only be used for passive uses, such as nature study, hiking, etc. Appendix J contains the Nature Preserve Handbook which outlines the uses of land placed in a nature preserve.

The watershed preservation lands (1/4% acquisition program) total 7,478 acres. These lands must be relatively free from impacts of suburbanization and are concentrated in Southampton, Brookhaven, East Hampton and Huntington, primarily the towns that contain major acreage in Special

PARKS ACREAGE SUMMARY

Existing County Parks and Nature Preserves	29,772.32
Underwater Lands (East Hampton)	348.00
	30,120.32
County Lands Proposed for Transfer	862.18
TOTAL	30,982.50

*Land currently owned by Suffolk County that is recommended to be transferred to parks jurisdiction.

Groundwater Protection and Pine Barrens Areas. This land is similar to a nature preserve in that it can must remain forever wild and only be used passively. In addition, it is all available to public water purveyors for future well sites .

The County has a separate bird sanctuary category that can be applied to any holdings restricted to that use. Currently there is only one County park set aside for this purpose located in the Town of Brookhaven.

The categories of improved and unimproved lands were estimated by the Planning staff as part of the complete field surveys made of each property. Overall, there are only 3,600 acres of improved parkland, or approximately 12% of the total holdings. The category of *improved* means that the parcel contains active and passive recreation facilities, along with roadways or parking areas.

The 17,007 acres of unimproved land is all of that County parkland that is either not developed for recreational use or is not located in the one-third of all parkland that is a nature preserve, watershed preserve, or bird sanctuary. This unimproved land, which represents 55% of all County parkland, is currently available for some additional recreational use. Depending on the environmental constraints, access and location of other facilities, part of the unimproved land can be used for fairly intense recreational uses, while other land should remain in general passive use. The individual park recommendations give a preliminary evaluation of what should and should not be further developed. (See Volume 3)

The final category of historic trust relates to those parks that contain buildings dedicated to the trust. These are buildings with historic significance that should be restored for either public or private use within the parklands to maintain some of the character of the lands that have been acquired. Historic trust holdings comprise 133 buildings which are located within twenty-five parks. A complete listing of all of the historic trust property, including the few that are outside of parks, is shown in Appendix B (Historic Trust Manual).

Mapping of Parks

Maps prepared for this report are maintained on a Geographic Information System (**GIS**). This system allows continuous updating of the maps as parcels are acquired under the various open space programs or through tax defaults. GIS can also accommodate changes in status from general County ownership to park, nature preserve or historic trust categories.

Large tax map parcels are separately digitized; however, many of the small parcels are digitized as a group. These groups are referenced in Volume 2 which contains a complete tax map listing for all of the County parkland.

The Geographic Information System maps are included in this report showing County parks, along with all Federal, State, local and private parks, as well as private recreation sites. The County parcels are numbered to allow easy identification between the park inventory and the physical location. These overall maps were used to determine where there are deficiencies in open space. They are useful in making recommendations for exchange of lands to simplify management, or to see where joint maintenance agreements are feasible. In addition, they also show all park properties in relation to greenbelt or trail systems and future opportunities.

Methods of Acquisition

Volume 2, which contains a complete list of all County parks and tax map numbers, includes the categories of Nature Preserve, 1/4% acquisition and open space acquisition under which the parks were recently acquired or dedicated.

In the early park acquisitions, condemnation was the usual method of bringing private land into the County system. Negotiated purchases have been the major way the quarter percent acquisition (watershed preservation) and open space programs have been implemented since 1986. Starting in 1985, the County's retention of tax-defaulted properties has allowed many small parcels on old filed maps to be added to the County's open space. Before this time, most tax deeds were resold. Unfortunately where economic conditions were difficult some environmentally sensitive tax-default properties were sold. They should be retained if they are located in an environmentally sensitive area. Many of these properties have been placed in the nature preserve category.

Consolidation of Tax Map Parcels

The standard reference for all lands in Suffolk County has been the Suffolk County Real Property Tax Maps. This map series, which is maintained and updated by the Suffolk County Department of Real Property, assigns a specific 19 digit number to all parcels of land within Suffolk County. These tax map numbers are utilized by land owners, real estate brokers and many agencies within town, County and State government.

No park inventory would be complete without a listing of all the tax map numbers which make up the Suffolk County Parks Inventory. Therefore, Volumes 2 & 3 include two such lists. The first appendix lists the numbers first by town, then by park name, and the second is a complete listing in tax map number order. The parks inventory has been broken down into approximately 157 distinct parks.

Because of the large number of individual parks, it is difficult to maintain an inventory, especially since this inventory is always changing. Parcels are continually being acquired through donations, tax defaults and outright purchases. The inventory has grown to be in excess of 30,000 acres. It is, therefore, essential, now, to maintain an accurate inventory of parcels and map them.

While the tax map system appears to be the best usable method we can use, there is one problem which must be addressed. The number of tax map parcels within the 157 parks exceeds 3,300. Maintaining an inventory of 3,300 parcels is a difficult task and due to this enormous number of tax map numbers, the potential for inaccuracy is greater.

It is, therefore, the conclusion of this study that it is very important to start a systematic consolidation of the individual tax map parcels, as well as the elimination of those paper streets that dissect some individual parcels. The Departments of Parks, Planning and/or Real Estate, as well as the Town Assessors, should make specific recommendations to merge these lots so that the total number can be reduced to an acceptable level of, at most, 750 lots.

Other Open Space Holdings

An open space plan prepared for the Long Island Regional Planning Board in 1988 classified all municipal and private parks, recreation and conservation land in the bi-county area (see Table 2). The maps included in this report contain all County holdings on a town-by-town basis plus State, Federal, local and private open space.

The table shows that Suffolk County Parks represented one third of all Suffolk County land contained in public and private open space. In 1992, the percentage was higher. This was due in part to the fact that other municipalities and private categories have only increased modestly in the last few years, while Suffolk County has been completing its Watershed Acquisition Program, adding significantly to its open space program and gaining land through tax defaults.

With recent additions, County Parks on Long Island now contain more land than any other municipality including federal and state holdings together. The Nassau and Suffolk County park systems, in addition to the State parks, have to provide the regional open space needs for local residents, making it necessary to look at all recreational resources and needs to determine the proper role of the County parks in Suffolk. Volume 2 contains observations of all major recreation resources.

Acquisition Policy

ACQUISITION POLICY

The general County acquisition policy has been to buy tracts of land 100 acres or more in size in various recreational use and environmental categories. Some of the earlier acquisitions provided waterfront access or preserved scenic sites. This was followed by the acquisition of lands along the various river corridors within Suffolk County. Active uses, such as golf courses either existing or newly constructed, became an important part of the County open space system followed by the preservation of sites with unique features, such as Cathedral Pines. Historic acquisitions such as Coin-dre Hall, Third House and Deepwells, expanded the County's variety of open space sites.

TABLE 2
Ownership Summary of Parks, Recreation and Conservation Acreage
In Nassau/Suffolk 1988

<i>Ownership</i>	<i>Suffolk County</i>		<i>Nassau County</i>		<i>Bi-County</i>	
	<i>Acres</i>	<i>% of Total</i>	<i>Acres</i>	<i>% of Total</i>	<i>Acres</i>	<i>% of Total</i>
Public

Source: Long Island Regional Planning Board - 7/5/89

The most recent acquisitions have come through the Watershed Preservation Program which has protected large amounts of pine barrens and deep recharge areas. Also included in this program has been the acquisition of some additional unique areas such as the Dwarf Pines, Warbler Woods, Hampton Hills and Maple Swamp.

There are still some unique parcels that are available for purchase; however, recently there has been interest in consolidation of existing public and private open space to provide for continuous greenbelts and trails through a wide portion of the County. The greenbelt concept along the rivers has not only provided river protection, but has expanded the opportunities for nature walks. Further expansions through the pine barrens can provide new opportunities for expanded trail systems for hikers, bicyclers and equestrian activities.

Types of Recreation in Federal, State and County Parks

Types of Recreation in Federal, State and County Parks

Other Regional Recreation

State park facilities tend to have the same type of activities as the County parks, but are often heavily used and because of this, are not available for local residents. Private facilities such as those operated by The Nature Conservancy are often similar to some of the County or federal hold-

ings. Joint management agreements between the County and The Nature Conservancy often benefit both parties by expanding access to the preserve properties.

Objectives

The main objective of the County park system should be to provide those facilities that are generally not found in the many local parks that are maintained by towns and villages throughout the County. Local parks are heavily oriented towards small passive recreation sites and major activity facilities such as pools, playgrounds and play fields for all ages. County park facilities are heavily oriented towards camping, picnic facilities, equestrian areas and museum/historic sites. Generally these are not activities of the local parks. However, two other major County facilities, golf courses and beaches, are also provided by a number of municipalities. See Appendix C for the activities available at improved County parks.

Available Facilities by Town

The availability of active and passive recreational facilities is an important part of the County's overall park system. As has been previously noted, local parks generally provide the type of facilities that are needed for small neighborhoods, while federal, state and County facilities provide more specialized services for a wide group of people. Since state and federal facilities are open to all, it is necessary to supplement certain recreational activities so that they are available when needed by County residents.

The following is a town-by-town statement of the types of recreational facilities currently provided by the three highest levels of government, federal, state and County. The information also has been summarized in Appendix table H.

Babylon

The State parks provide picnic facilities, bridle paths, boat rentals, play fields and fishing within the Town and there is access to nearby Jones Beach and Robert Moses State Park for oceanfront bathing. County parks provide a playground, golf course and driving range.

Brookhaven

There are no developed State facilities in the Town so only trail systems are available. Federal facilities provide trails, along with boating and fishing activities. County parks within the Town include a major ocean beach facility, camping, fishing, hunting, picnic areas, playgrounds, bridle paths and trails, plus boating.

East Hampton

The State facilities are important for camping, beach activities, fishing and hiking trails. There are also picnic facilities, a golf course, driving range and a pool. The County facilities provide fishing, camping, picnic areas, boating, bridle paths and trails, plus a beach without lifeguards.

Huntington

Trails are available on Federal and State properties and fishing is also allowed on the State property. The County provides camping, bridle paths and picnic areas in its West Hills Park. Other County holdings allow only passive use.

Islip

Federal properties contain trails and a picnic area, while the same facilities are available in State parks, along with a marina, fishing area and bridle path system plus a major beach and boat ramps. A pool is also provided at Hecksher State Park. County facilities provide golf, driving ranges, equestrian, boating and trails through a greenbelt system extending from the Great South Bay to the Town of Smithtown.

Riverhead

Wildwood State Park provides trailer camping, a Long Island Sound beach, picnic area, play fields and trails. The County parks provide golf and a driving range, bridle paths, hiking trails, camping, fishing and playgrounds.

Smithtown

Smithtown has an extensive beach at Sunken Meadow State Park, but there are no County beach facilities. There are three major Town beach areas and one pool site and they are restricted to Town of Smithtown residents.

Southampton

There are no State beach facilities. Town residents no longer have access to Cupsogue Park in the Town of Brookhaven due to erosion along Dune Road. There is potential for additional County beach access at Tiana Beach; however, recent erosion has limited options. There are eight major Town beaches, two of which are restricted to Town residents and the remainder charge a very high fee for non-residents.

Southold

Southold has Orient Beach State Park but no County facilities for swimming outside of a camping area. There are three major Town beaches which are open to non-residents at a high fee.

■ Camping

There is a continued demand for camping facilities and some of the State camp grounds require reservations a year in advance and allow a stay of only a week or two. Some facilities provide only tent camping; others allow trailers and some are restricted to four wheel drive vehicles. The following is a Town-by-town analysis of current camping facilities:

Babylon

There are no formal camping facilities available.

Brookhaven

The County provides two facilities for tents and trailers and Federal property allows tent camping.

East Hampton

The State allows tent and trailer camping and the County has two facilities for tents and trailers, plus a four wheel drive camping area.

Huntington

The only camping allowed is tent camping in a County park.

Islip

State park facilities provide tent and trailer camping.

Riverhead

The State park facilities provide tent and trailer camping and the County allows tent camping.

Shelter Island

There are no camping opportunities.

Smithtown

Blydenburgh County Park allows tent and trailer camping.

Southampton

The County provides two tent and trailer camping areas, plus a four wheel drive area.

Southold

There are only group camping facilities at the County owned Peconic Dunes. However, a private campground facility provides tent and trailer camping in this Town.

■ Horseback Riding

There are equestrian facilities in a number of public parks. However, this type of activity is also made available through private facilities. Since the State and County park system has been expanding in recent years and offers the opportunity of more corridor parks, the availability of horseback riding should increase. The following is a Town-by-town summary of the types of riding facilities that are available today.

Shelter Island

There are no State or County developed facilities on Shelter Island. However, the large Nature Conservancy holding on the southeastern portion of this Island is similar to a State or County park and provides an extensive trail system through a preserve.

Smithtown

Sunken Meadow State Park provides a beach, golf courses, driving range, picnic areas, play fields, trails and a fishing area. County park facilities include camping, bridle paths, fishing, boating, picnicking, and access through the greenbelt trail system.

Southampton

Federal and State properties accommodate hiking trails while the same is true of the County facilities. County parks also contain a beach, playground, picnic areas, fishing, camping, boating and bridle paths.

Southold

Orient State Park has a beach, playground and fishing area. Most of the County facilities are undeveloped and provide only fishing and trails plus a group campground.

Types of Recreation by Town

■ Beaches and Pools

Swimming is a major recreational activity and there is always a demand for access to the Sound, the bays, the ocean and various lakes. Various levels of government provide beach and pool access and in most cases the facilities are open to all, even though non-residents are sometimes required to pay significantly higher fees. Following is a summary of the availability of swimming activities in each of the Towns.

Babylon

Babylon has Robert Moses State Park and direct access to Jones Beach State Park which provides some of the most developed beach-related facilities. There is no County beach access in the Town. However, there are four major Town parks in which non-residents are allowed at a slightly higher fee than residents. The Town also operates six swimming pools on other sites.

Brookhaven

There are no State facilities. However, the largest County beach, Smith Point, exists within the Town. Cupsogue Beach is also in Brookhaven, but its primary access from Dune Road in the Town of Southampton is gone. This access has been cut off in recent years due to erosion problems along Dune Road. There are eight major Town swimming facilities that are free to Town residents, but require a fee by non-residents. There are three Town operated pools.

East Hampton

The main State beach is at Hither Hills. The County allows beach access, but there are no protected bathing areas in Montauk County Park. There are six major Town beach areas of which two are restricted to Town residents and the remainder have a high fee for non-residents.

Huntington

There are no State and County swimming facilities. Four major Town beaches allow non-residents at twice the fee of local residents. The Town operates one swimming pool facility.

Islip

The State provides a pool and beach at Hecksher State Park, but there are no County swimming areas. There are five major Town beaches with the two on Fire Island open to all, and the others restricted to Town residents. The Town also operates four pool sites.

Riverhead

The State provides a beach at Wildwood State Park and there are no County swimming facilities available. Four major Town parks allow non-residents at twice the fee for local residents.

Shelter Island

There are no State and County facilities, but the Town operates a few small beach sites.

Babylon

The Town has one State facility and one private facility.

Brookhaven

There is one County facility and nine private facilities.

East Hampton

There are two County facilities and four private facilities.

Huntington

There is a State facility, one County facility and three private facilities.

Islip

There is one State facility, one County, and two private facilities.

Riverhead

There is one County and one private equestrian facility in the Town.

Shelter Island

There are no equestrian related facilities.

Smithtown

There is one County and two private horseback riding areas.

Southampton

There is one County and two private facilities.

Southold

Only the private sector provides horseback facilities at two locations.

■ **Marinas**

Public marina facilities and launching ramps amount to far less than the many private facilities that exist in the County. However, development pressures and environmental constraints have reduced the amount of land available for boating as some marinas were not allowed to expand and others were converted to housing units in recent years. The following indicates some of the availability of marinas in the County.

Babylon

There are two public ramps in the Town and a number of private facilities along the Great South Bay.

Brookhaven

The Town has nine public ramp facilities and a large number of private spaces on the north shore and south shore. Tremendously long waiting lists exist.

East Hampton

There are nine public ramps and private marinas, mainly at Lake Montauk and Three Mile Harbor.

Huntington

The Town of Huntington operates three marinas for Town residents; ramps are available in some park areas and there are extensive private marinas in each harbor along the Sound.

Islip

The Town has one State ramp and private facilities along Great South Bay. The Town provides a number of marinas in Bay Shore, and other bayside locations, as well as at the Town facilities on Fire Island.

Riverhead

There are one State ramp and two other public ramps, plus a few private marina facilities.

Shelter Island

The Town maintains four public ramps and there are private marina facilities in four areas in the Town.

Smithtown

There is one public marina and ramp area. Private facilities are very limited.

Southampton

There are one County and two village facilities plus a large number of private facilities on the bays surrounding the Town.

Southold

The Town has five public ramps and private facilities in Mattituck Harbor and all along Peconic Bay.

■ Hunting and Target Shooting

Hunting and target shooting activities are often made available in some of the larger parks. Various levels of government presently provide this type of activity and since Suffolk County has such extensive holdings of low intensity use park areas, there is room for further expansion. The following summary on a town by town basis indicates the public and private hunting facilities and shooting ranges that are available.

Babylon

Due to the density of population in the Town, there is only one private shooting area.

Brookhaven

The Town of Brookhaven has the most facilities for hunting and shooting. Hunting is allowed in the Fire Island National Seashore and in the one State and County park. Hunting is also allowed on County land included in the Navy Cooperative Area near Calverton Airport. There are three private shooting ranges; one operated by the County and one by the Town.

East Hampton

There are two County facilities and one State facility that allow hunting. In addition, hunting is permitted on a large parcel that is jointly controlled by the State, County and Town.

Huntington

The Town has one shooting range available to the public.

Islip

The Fire Island National Seashore allows hunting and there is one Town shooting facility.

Riverhead

Hunting is allowed on Federal land and there is one private hunting preserve.

Shelter Island

There are no formal hunting or shooting facilities.

Smithtown

There are no formal hunting or shooting facilities.

Southampton

Two County parks allow hunting and it is also allowed on the State preserve.

Southold

There are no formal hunting or shooting facilities.

■ Boat Rentals

The rental of row boats and canoes is a very popular recreational activity. It is most popular on the rivers and lakes throughout the County. The following summary on a town by town basis indicates where boat rentals are available.

Babylon

Boat rentals are available at Belmont Lake State Park.

Brookhaven

Rentals are available at the Carmans River in a County park.

East Hampton

There is one County rental facility available.

Huntington

The Town has no river or lake rentals.

Islip

There are no river or lake rentals.

Riverhead

The County park does not provide public rentals. However, private entrepreneurs make boats available along the Peconic River.

Shelter Island

There are no river or lake rentals.

Smithtown

Boats are available in Blydenburgh County Park and private sponsors make boats available on the Nissequogue River.

Southampton

There is one County boat rental facility.

Southold

There are no public boat rental facilities.

■ **Winter Sports**

The park system in Suffolk County is heavily used in the summer months for all of the active sports and in the spring and fall for a lot of passive activities. In order to encourage more winter use there are public facilities for cross country skiing and ice skating in State and County parks. The following summary shows the availability of skiing and skating.

Babylon

One State facility provides a skating activity.

Brookhaven

One County park provides skiing and skating activities.

East Hampton

There are no formal winter sports facilities.

Huntington

Cross country skiing is allowed in a State facility and skating is available in a Town park.

Islip

Two State parks and one County park allow winter sports activities. The Town recently opened up an ice skating rink facility to the public.

Riverhead

Cross country skiing is available in a State facility.

Southampton

One County park provides skating activities.

Southold

Winter sports are allowed in a State park.

See Appendix Table H also for a summary.

Outdoor Recreation Needs

OUTDOOR RECREATION NEEDS

In 1987 the New York State Office of Parks and Recreation conducted a needs assessment for outdoor recreation for all the counties.

The Suffolk County findings indicated that the highest needs were for the following sporting activities: field games, jogging, biking, day hiking, nature walking, backpacking and horse riding.

At the other end of the scale, swimming, fishing, court games and snowmobiling were the lowest priorities.

Other than the category of court games, all of the activities that are high on the state list can be accommodated in the existing parks and many of the nature preserves or watershed lands that have been recently acquired. County acquisition programs place an emphasis on continuous corridors of open space. Therefore, in addition to the protection of groundwater resources, hiking, backpacking and nature walks, along with horse trails, can be accommodated in a number of areas throughout the County that have been acquired for nature preserve or watershed protection.

There are a few other recreation uses noted in the state assessment that may need some expansion, but are not as high a priority as the first group. This includes facilities for spectator sports, tennis and camping. Most of these uses would have to be placed on land that is now in open space category, but not currently being used for active recreation.

Park Usage

PARK USAGE

Categories of Demand

There is a range of factors that will increase or decrease the demand for various types of recreation facilities. As the population ages, there is less demand for some of the active recreation facilities that are generally provided by towns and villages and more of a demand for golf courses, bicycle paths and passive parks that include walking trails.

The general increases in income that have occurred and will occur in the County, coupled with a trend towards more leisure time as increasing portions of the population tend to work locally, work at home, work on a reduced schedule, or are retired, creates more demands for camping, picnicking and boating. These are just a few examples of how increased leisure time can be a factor in usage of County parks.

Another increased demand is the needs of tourists. One of the goals of this study is to make certain Suffolk County facilities available to tourists. This can be a source of revenue and, at the same time, will improve the overall economy. Tourism is one of the major activities in this County particularly on the East End. Park areas that will need to be expanded include those that provide beaches, boating activities, and specialized activities such as museums and nature trails.

Constraints

All of the park holdings have to be evaluated based on a series of constraints that may affect their future improvement. Not every park property should have improvements while, at the same time, others provide ideal opportunities for expanded recreation. There are four types of constraints that have to be taken into account: environment, accessibility, adjacent development and public facilities.

The environmental constraints are the most important since the County owns a large number of wetlands, ponds, stream corridors and woodlands. Many of these parcels were acquired to preserve them in their natural state as examples of natural habitats prior to the first wave of major development in the 1950's and 1960's. Some properties are subject to erosion or flooding which severely limit their use; others have valuable vegetation such as the pine barrens which are being preserved to protect threatened or endangered flora and fauna, as well as its groundwater.

Accessibility is a key factor in the development of park properties. Many parcels are located on the waterfront, on islands, barrier beaches or are on narrow roads where it is impractical to improve or expand access. Possible park improvements, therefore, have to be channeled to other locations.

Development of adjacent lands can be a constraint on the intensive use of a park property. If there are a large number of homes immediately adjacent to the property, it is often very difficult to put active park facilities in close proximity to the homes. Some park holdings can be located in such a way that to reach the park property requires access through a series of minor residential streets. These properties usually end up having lower intensity uses that are designed to serve immediate neighborhood needs, rather than the recreation demands of the entire County.

Active recreation uses require construction of public facilities, parking areas, bathrooms, visitor centers or control points, and most important, maintenance. The need for maintenance and security personnel at all park areas has increased as vandalism has spread to park areas that are not properly protected.

Use Patterns

Most Suffolk County parklands are open to temporary residents in seasonal housing, vacationers, day trippers, etc. Generally, County residents have first priority for busy recreation facilities and where fees are charged, outsiders must pay a premium over the basic resident fee. Smaller or undeveloped parklands can be used freely by hikers and bicyclists. In winter months, no permits or fees are required, so some larger parks are open and are available to all.

Even though County parks are open to all County residents, the general use pattern is one of a local nature except for some beaches, golf courses or other specialized facilities. That is why it is important to have some developed County parks serving the urbanized portion of the County. Therefore, this plan reviews County holdings and makes recommendations where further active uses would be desirable.

Fiscal Resources

Fiscal Resources

Introduction

In 1974, the Department of Parks, Recreation and Conservation's adopted budget was \$4,141,278 with a staff of 264 positions for appropriation 01-7110 Parks-General Administration. Nineteen years later, the Department of Parks, Recreation and Conservation's 1993 adopted budget was \$8,215,913 with a staff of 123 positions for appropriation 01-7110 Parks-General Administration.

While the Department of Parks annual appropriations rose an average of 5% during periods of double digit inflation, the staff for the department's principal appropriation decreased by 53%.

Concurrently, the acreage for which the Department of Parks is responsible has increased from just over 12,000 acres in 1974 to over 30,000 acres in 1993.

In terms of revenue generation, the Department of Parks, Recreation and Conservation has made tremendous strides in generating additional revenue dollars.

In 1979, Parks Department revenues represented 35.38% of the Parks Department operating expenditures, for 01-7110 General Administration, while for 1992, revenues as a percentage of Parks Department expenditures rose to an estimated 76.79%.

Similarly, park revenues as a percentage of General Fund revenues has risen from 0.002651% in 1979 to an estimated 0.005113% in 1992.

While the property tax has increased 261% since 1979, the Parks Department has increased its revenue collection by 451% over the same period.

With the exception of concession revenue, rounds of golf played and rowboat rentals, most of the revenue generated is attributable to higher user fees adopted yearly. Family camping, beach attendance and group picnics have fallen off appreciably since 1979. The latter decreases are attributable to the medical waste problem experienced by all ocean beaches in the tri-state area in 1986 and the onslaught of lyme disease as a reason many families have refrained from picnicking and camping in County parks.

If Parks Department revenues are to grow beyond the current fee structures, then ways of attracting more people to utilize campgrounds, picnic grounds, and ocean beaches must be realized.

User Fees

Successive County administrations have opted to increase park user fees as a way of mitigating the need to further increase property tax rates any more than necessary.

The following Table 3 depicts the increase in selected Park Activity Fees from 1989-1993.

Other Sources of Income

Other sources of income that the County has, came from Federal and State aid, but in recent years these funds have diminished. In 1982 and 1983, \$203,500 was realized from federal aid. State aid in 1983 was \$500,000. Since then small grants of \$12,000 and \$15,000 have come from the state for natural resources management and cultural affairs; the last and, perhaps final, State aid was in 1989.

Revenues and Activities

In order to enhance revenues, the Parks Department has increased user fees and has economized in many ways. As part of this study the Planning Department was asked to compare parks, uses and revenues so that a management plan could be developed.

All active parks from which revenues came, from 1989 to 1992, were studied to see which parks and which kinds of uses generated the most activity. Eighteen (18) active parks were studied (see Table 4).

Table 5, *Revenue by Selected Facilities: 1989-92*, compares some major activities with revenue generated and indicates those parks that seem to be bringing in more or less money than other parks offering the same activity. Reasons for these differences could be studied and the reasons might suggest adjustments or other techniques for earning more.

Factors such as weather and proximity to population centers affect use and therefore revenues. Suffolk County Parks seem to be a well kept secret. Many residents are more aware of national, state and municipal recreational opportunities than those offered by Suffolk County. The Parks Department should be provided an advertising budget large enough to reach print and cable TV media.

Since its inception, and particularly over the past six years, the Suffolk County Department of Parks has been a low priority within Suffolk County government (see following Table 6). During this time, the Department's operating budget has fluctuated at a level below 1% of the County budget and has actually dropped over each of the past four years. If the 1993 budget was adopted at the 1985 level, \$11,034,503 would be available, which is \$2,657,444 more than the current budget.

The following Table 7 portrays the park revenue from 1979 through 1992 as percentages of General Fund Revenue, as percentage of non-property tax revenues, and lastly, as percentage of the County general fund property tax.

Table 8 portrays the Department of Parks expenditures as a percentage of the County's general fund expenses from 1979 to 1992. The table also provides the modified staff for the Department and general administration.

Table 9 plots the percentage of revenue to expenses for the years 1979-1992. A fairly constant ratio through the 1980's has given way to continued increases in the 1990's.

Comparison to Other Counties

In order to make further comparisons of Suffolk County's expenditures on culture and recreation, several counties of similar size and population were studied. Four down-state counties around the New York metropolitan area were chosen along with three upstate counties containing large cities.

TABLE 10
New York State Counties Comparable to Suffolk County by Population and Land Area

County	Population 1990	Population 1980	Sq. Miles Land Area	1990 Population Per Sq. Mile
Erie	968,532	1,015,472	1,046	970.8
Monroe	713,968	702,238	663	1,059.2
Nassau	1,287,348	1,321,582	287	4,604.8
Onondaga	468,973	463,920	785	591.0
Orange	307,647	259,603	826	314.3
Rockland	265,475	259,530	175	1,483.0
Suffolk	1,321,864	1,284,231	912	1,408.1
Westchester	874,866	866,599	438	1,978.5

Population counts in Orange and Rockland were the smallest of those counties studied, but together they have over 60,000 acres in State parks. Other counties have between 1,619 acres (Westchester) and 5,710 acres (Nassau) in State parks.

If a county has large amounts of land in state parks, it need not commit as many dollars in operating costs for county parks as a County with less land in State parks. In general, twelve acres of all public parkland should be provided for each 1000 persons. This figure includes natural areas for conservation.

All counties evaluated exceeded this figure. Nassau County is exactly at the threshold while Orange and Rockland with huge state preserves have seven to ten times the ideal parks' acreage per thousand. Suffolk County has slightly more than two times the requirement.

In addition to size and population, various measures of wealth and tourism were analyzed. Twenty-one factors of wealth and tourism were identified as follows:

- Population 1980
- Estimated full value of taxable (vacant, forest, farm) real property
- Value of agricultural commodities
- Real estate transfer tax collections
- State aid payments to local governments
- Full valuation taxable real property
- Motorboat registrations
- Mortgages recorded
- Population 1990

- Personal income tax liability
- All local government revenues
- Gross estate tax collections
- Motor vehicles registration fees
- Number of farms
- Snowmobile registrations
- Residential and non-residential hunting, fishing and trapping licenses
- Unemployment rate
- Average weekly earnings
- Per capita income
- Acres in farms
- Land area

In eight out of twenty-one parameters, Suffolk County ranked highest, an indication of relative wealth and of natural amenities attractive to large numbers of visitors. Nassau ranked highest in five categories, Erie in four, Westchester in three and Onondaga in one (see Table 11 following).

Changes in operating expenses and equipment/capital outlay were reviewed for 1980 and again for 1990. Per capita expenditures show that Suffolk County ranked third lowest out of eight counties studied. Only Orange and Rockland ranked lower. Both larger and smaller counties had larger operating budgets than Suffolk despite Suffolk County's huge land acquisition program in 1989 and 1990 (see Table 12 and 13 following).

Demand for New Revenue

This diminishment in funds is magnified by a significant additional factor: expansion of the Department's responsibilities. Over the past decade, the Parks Department has seen its responsibilities double - whether measured by total acreage or parkland units. It is likely that no other department in the County has seen its scope of responsibilities expand as much as Parks. Yet, resources available have barely kept up with inflation, not to mention that they have not met the new demands that have resulted from the County's land acquisition programs. A significant mismatch between resources and responsibilities has resulted, made clear by Table 14, which identifies the resources available to other similar Parks departments.

TABLE 14
Comparable Resources of Parks Departments - 1990

<i>State or No. of Parks County</i>			<i>Budget</i>		<i>Employees</i>	
			<i>Operating</i>	<i>Capital</i>	<i>F/T</i>	<i>Seasonal</i>
Nassau	18 Pks 7 golf	5,573	49.5 mil	5-10 mil	888	750 sum
NYC	1,547	26,175	180.0 mil	150 mil	4400	3400 sum
Westchester	30	15,000	23.0 mil	9 mil	350	1300
LI State Parks	25	25,153	24.3 mil	7.1 mil	455	1800-2000 sum
Rhode Island	23	10,000	5.3 mil	12 mil	104	379
Suffolk	150+	30,000	7.4 mil	1-5 mil	126	275
Broome	13	3,500	4.5 mil	2.2 mil	57	200

Of all the responsibilities in government and among governmental agencies, the acquisition and management of land possessing recreational and environmental value is perpetual. This perpetual commitment is a unique and special compact between Suffolk County government and its citizens. Theoretically, County parklands will exist for countless generations to experience and enjoy; and will be there long after other societal needs are resolved. It is appropriate, therefore, that given this perpetual commitment the County should establish a permanent, dedicated funding source to allow the

to allow the county's Department of Parks to manage and interpret properties in the County Park system in a predictable, reliable, and appropriate way with a view toward the long term.

Current Annual Revenue

Higher user charges have increased departmental revenue steadily over the past five years as depicted in Table 15.

TABLE 15
Selected Park Revenues 1988-1992

		<i>1988</i>	<i>1989</i>	<i>1990</i>	<i>1991</i>	<i>1992</i>
2001	Park & Recreation Charges	\$231,559	\$241,101	\$319,982	\$495,504	\$452,327
2003	C a m p i n g Fees	283,053	279,885	303,705	394,080	396,409

2410	R e n t a l RealProperty	337,851	312,134	312,358	366,060	542,585

It is felt that the growth in park user fees has reached its zenith given the overall state of the local economy. Further growth in revenues will require increases in park activities either through attraction of a greater number of non-resident recreation enthusiasts and/or by offering additional recreational opportunities. The latter alternative brings with it additional start up costs, but the planning for expanding the recreational opportunities should begin now.

Alternative sources of funding should also be explored, such as private and corporate donations, expansion of a park newsletter to include advertising and promote tourism and, finally, greater reliance on private capital to develop additional recreational needs.

The Department of Parks has made great strides in the area of concession management, whereby the licensee of a particular facility is now responsible for capital improvements, advertising allowances and maintenance in addition to the yearly license fee. Concession management will save the County well over \$4.5 million in building renovation costs over the next ten years.

Specifically, at the Bergen Point Golf Course, the County has leased the facility to a private operator (Global Golf, Inc.) for a period of twenty years. Global Golf, Inc. is responsible for providing a \$2.5 million capital renovation to the golf course and surrounding areas. The County avoids the capital outlay of \$2.5 million, the facility will be improved to a point that greater revenues will be realized by the County, and the public is served by an improved golf facility, as well as having the Legislature maintain control over golf fees.

Management Issues

MANAGEMENT ISSUES

Opportunities and Concerns

The opportunity for continuous park trails through existing park properties and adjoining watershed preservation lands is an important part of this study since it expands public access to the parks and allows hiking, bicycle, cross-country skiing and equestrian activities. In order to accommodate these uses, continued clearance of trails will be required. One of the problems with clearing these pathways and making them available to the public is that they also become vulnerable to activities that are unwanted.

For example, off-road vehicles often gain access to these areas causing harm to the trails themselves and adjoining environmentally sensitive areas that cannot tolerate the destruction of natural vegetation. Another major concern related to the recent closing of landfills is the potential for increased dumping. At the present time, various municipalities have restricted the collection of yard wastes, used tires, appliances and construction and demolition material. Contractors and home owners are tempted to dump in the nearest open location which can easily be public parkland. As the cost continues to rise for legal dumping, there must be a way to ensure that illegal dumping does not occur on public land.

Options for controlling unwanted activities have included use of cables or gates that can be locked or unlocked. These types of control in many cases are necessary since they must be opened quickly in the case of fire, or medical emergency to allow vehicle access, or just for the normal maintenance and trash pick-up that is associated with park activities.

In those locations where emergency or maintenance access is not needed and yet one wishes to allow bicycle or pedestrian access, closely spaced perpendicular, vandal-proof fences can be so located to allow the above activities but restrict any wheeled vehicles including motorcycles.

Alternative Methods of Management

There are at least four ways of managing Suffolk County park property: County, joint private, joint non-profit, and joint municipal management. At the present time, most of the County parks are managed directly with County personnel. This is done through existing staff that manages entry, security, equipment, maintenance and various park programs. As the County acquired more land and the budget problems became severe, the ratio of park personnel to parklands continually decreased in the last few years.

Joint private management is now being used for golf courses, restaurant and catering facilities, horseback riding and boat rentals. Such contracts can include certain capital improvements and maintenance that relieve the County of the responsibility. One of the potential problems is that there is less County control, especially in the area of complaints. However, well written contracts with competent management firms can offset this concern.

Because of the poor economic climate, the County is unable to put in capital improvements that are necessary for many of the park projects. Some of these projects deal with safety, replacement of vandalized facilities and other capital needs that enhance park property. Including these projects in a contract with a private agency can require the contractor to make certain capital improvements, operate the facility according to County standards and maintain the facility as specified by the Parks Department.

Another way of managing lands is through the non-profit agencies that exist in the County, such as The Nature Conservancy, the Peconic Land Trust and the National Audubon Society. Many of the recent County acquisitions for watershed protection and wetlands protection are on environmentally sensitive lands that are adjacent to land controlled by non-profit agencies. There are already some joint management agreements and the expansion of further management probably would require less funding than having it done directly by County employees.

There is some precedent for joint municipal management or direct municipal capital improvements in management. The County has joint arrangements with the Town of Islip in terms of managing pieces that are owned by the County, Town, and The Nature Conservancy. Since many of the County parcels are small properties that may or may not be developed for many years, the concept of turning over these properties to local towns for development and use should be considered. An example of this approach was used in the Town of Southold where the Town provided the improvements to County parkland and then made it available to the public. Generally, the public using such parks is from the immediate neighborhoods or the town as a whole, but not primarily residents from other parts of the County.

Parcels such as Hither Woods in East Hampton, which were acquired using State, County and local Town funds, require joint management. Other acquisitions like this are possible in the future. Another area of joint management is in the large number of parcels that have been acquired by the state or town that are immediately adjacent to the County holdings. Joint management proposals for the level of government that could most easily and efficiently manage the land is needed. An alternative to joint management is land exchange which will be discussed further in this report.

Off-Road Vehicle Travel on Beach Areas in Suffolk County Parks

Off-Road Vehicle Travel on Beach Areas in Suffolk County Parks

Introduction

Use of 4-wheel drive off-road vehicles (ORVs) on beaches in Suffolk County is a popular means of obtaining access to publicly owned coastal areas offering various types of shore and water oriented recreational activities - bathing, picnicking, camping, hiking, birdwatching, hunting and fishing. Recreational ORV travel is limited both by the geomorphic characteristics of the shoreline and by official regulations. Geomorphic features, such as tidal inlets and creeks, narrow rocky beaches and bluffs, pose physical barriers to the ORV user. Depending upon the jurisdiction involved, permit systems regulate recreational ORV use by limiting access points, activities and the time, season and location of travel. There is no authorized recreational ORV travel on the north shore between Lloyd Neck and Belle Terre, and on the south shore between East Rockaway Inlet and Gilgo Beach. There is a limited amount of ORV beach travel along the north shore between Belle Terre and Orient Point, and along the Peconic shore from Orient Point to Napeague, including Cedar Pt. County Park.

Most ORV beach travel occurs on weekends during the summer along Suffolk's south shore ocean beaches from Gilgo Beach to Montauk. This usage is in part due to topography and the availability of large, publicly owned shoreline areas open to beach travel. These areas include Robert Moses, Hither Hills, and Montauk State Parks, the Fire Island National Seashore, and Smith Point, Shinnecock Inlet and Montauk County Parks. Access to Cupsogue County Park has been eliminated by severe erosion along Dune Road. ORV usage in this park was authorized in the past.

All ORV use can cause ecological damage, dune destruction, and conflicts with other uses of the shoreline. The biological and geomorphic impacts of ORVs can be minimized if proper controls are in place and they are strictly enforced. The *extent* to which ORV access and operation are curtailed on public lands reflects the management philosophy of the authority with jurisdiction over those lands.

The *objectives* of this section are to investigate the issue of recreational ORV usage of coastal areas in Suffolk County parks; assess the efficacy of existing rules, regulations and management activities of the Suffolk County Dept. of Parks, Recreation & Conservation (SCDPRC); and propose regulatory and management recommendations pertaining to ORV access and operation in the future. At this time, ORVs are authorized to use coastal areas in four County parks: Smith Pt., Shinnecock East, Cedar Pt. and Montauk. ORV usage of county parks has increased dramatically in re-

cent years. During the period from 4/1/76 - 3/3/77, Suffolk County issued 2,295 recreational vehicle use permits.² In 1990, 9,177 permits were issued - an increase of 300% in the number of permits issued over the 13 year period. The high level of recreational ORV activity in Suffolk County parks, as compared to that allowed in publicly owned coastal areas in other states, has become a major management issue.

This section includes an overview of available research on the environmental impacts of ORVs and a description of the range of approaches associated with ORV control, as illustrated by the programs implemented now by the Fire Island National Seashore (FINS) and SCDPRC. Utilizing this information, as well as interviews with park personnel and site visits, recommendations for governing the conduct of ORVs on beaches in Suffolk County's park system have been prepared and are proposed for consideration herein for action by appropriate parties.

Literature Review on the Environmental Impacts of ORV Travel

An intensive, five-year research program was conducted by the National Park Service Cooperative Research Unit at the University of Massachusetts, Amherst on the ecologic and geomorphic effects of ORVs on coastal ecosystems. Research on the impact of ORV travel on Cape Cod beaches and dunes determined that areas which are intrinsically unstable as a result of natural forces are the least likely to be permanently damaged by vehicle traffic. Thus, vehicle traffic has the least environmental impact when it is restricted to the summer berm and intertidal zone of ocean beaches. Vehicle travel over stabilized dunes has a major impact in that downslope sand transport in unvegetated dune areas can be significant. Recovery of the dune system is slow when damage is inflicted near the dune crest or high on the dune face. The fastest recovery occurs at the edges of the dune - areas subject to more rapid sand accumulation.

As far as the beach face is concerned, the most sensitive zone is the drift line on the winter berm. Organic drift lines of eelgrass, marsh grass and macroscopic marine algae found at the base of the dunes are important to the ecology of the beach ecosystem and the formation of new sand dunes on accreting beaches. The drift lines provide favorable conditions for the germination and growth of vascular plants. Should the young plants, such as beach grass, remain after winter storm waves erode the beach, they can trap windblown sand and add to the structural stability of the dune line. Destruction of the vegetation during the growing season by ORV traffic can, therefore, adversely affect dune growth.

Salt marshes and intertidal sand flats suffer the greatest environmental impact when subject to ORV travel. Nesting birds can acclimate to vehicles passing nearby, but are harmed when either vehicles or pedestrians and their pets enter nesting sites. Therefore, restrictions on ORV travel are warranted in order to minimize potential environmental damage.

Leatherman and Godfrey (1979)³ contains an overview of the results of the multi-faceted, National Park Service research effort, which occurred on Cape Cod National Seashore. A summary of the recommendations applicable to beaches, dunes and salt marshes/tidal flats, taken directly from their report, appears below.

■ Beach

- ORV use should be restricted, whenever possible, to the outer ocean beach, seaward of the drift-line zone and expanding dune edge.
- Prohibit driving in the upper backshore area, particularly in the areas of drift.
- Close beaches that are so narrow as to force drivers to run along the very toe of the dunes at high tide.
- Close beaches to vehicles during periods of exceptionally high tides, which force drivers to travel along the face of dunes or through shorebird nesting sites and embryonic dunes.
- Nesting areas of least terns and other colonial shorebirds must be protected by
 - fencing
 - posted signs
 - restriction of beach traffic to marked tracks
 - strict enforcement of leash laws for pets.

■ Dunes

- Prevent vehicle entry into previously closed dune regions.

- Where ORV access is necessary, tracks should be carefully planned to avoid the most sensitive areas, such as drift lines and embryonic dune areas, the leading edge of expanding dunes, and older, stable dune areas where drivers would be inclined to leave the tracks.
- Wooden ramps should be built and maintained over dune lines, providing beach access through the dune zone.
- Dune routes should be oriented in such a way that prevailing winds cannot create blowouts.
- Dune routes should be designed to avoid sharp turns or climbs up steep grades.
- Restrict traffic to marked routes with borders of cable or dense, impenetrable shrubs.
- Vehicle trails must be controlled and maintained.
- Close off deteriorated dune routes and institute management programs to repair the damage, especially where natural regrowth would be slow.
- Close all sensitive habitats such as heathlands and shrublands.
- Institute public programs and displays that are aimed at educating the public to ORV damage.
- The concept of *no carrying capacity* should be emphasized when planning for ORV use in dune areas; i.e., dunes are extremely vulnerable to damage from ORV's.
- Whenever possible, ORV use should be restricted or eliminated entirely in the dunes.

■ Salt Marshes and Tidal Flats

- Close all salt marsh and tidal habitats to vehicle use.
- Prevent traffic from using the border zone between salt marshes and dunes.
- Establish a series of interpretive displays that show how vehicles damage marine resources.

The impacts of ORV travel on beach erosion and accretion cycles is less clearly understood. Several studies were conducted to assess the impacts of ORV travel on Fire Island beaches. Visco (1977)⁴ described how different variables relating to ORV travel on beaches, such as speed, affect the net amount of sediment movement in the downslope direction that is caused by vehicle tracks. The significance of the volume of sediments moved by ORV travel as compared to sediment movement caused by waves and currents was not addressed. Vehicle induced changes in beach (as opposed to dune) microtopography are greatly overshadowed by the magnitude of natural forces affecting general beach configuration. Indeed, measurements of subaerial beach profiles at Fire Island Pines and Ocean Beach indicate that seasonal changes in the beach can be very large. The maximum annual horizontal variations in shoreline position observed at these locations was 147 ft. and 188 ft., respectively (Tanski, Bokuniewicz and Schubert 1990).⁵

Tauman (1977)⁶ investigated differences in beach morphology and response between a control area at Smith Pt. County Park, where no ORV travel was allowed, and an adjacent beach subject to such travel. Recommendations included the following:

- restrict/eliminate beach travel in periods preceding and during storms; and
- limit ORV travel to specific zones on the beach, i.e., the beach face during low tide. Alternatives to travel on the beach face were also recommended for study, e.g., use of the *Burma Road* as the access route to Moriches Inlet.

Subsequent to the above investigations, an intensive three year study involving controlled experiments to assess the effects of ORV travel on Fire Island beaches and dunes was conducted by Anders and Leatherman (1981).⁷ Their results confirmed that ORV travel:

- causes a net downslope movement of sand along the beach.
- loosens surface material, making it susceptible to wind and wash erosion.
- creates an unnatural beach profile that responds differently to littoral forces than the profile of beaches not subject to ORV traffic.
- will severely impact dune vegetation, especially in the vicinity of the dune toe, even if conducted at low levels of use.

It was concluded that the present form of the primary dune on Fire Island probably has been altered from the natural condition by ORV use. Limited surveys of *Burma Road* in Fire Island National Seashore (located in the swale behind the primary dune) indicated that it is in a condition of dynamic stability where low levels of ORV usage do not appear to cause additional environmental damage. On the basis of these findings pertaining to barrier island *morphology*, and not on the issues of public recreation or safety, Anders and Leatherman (1981) indicated that the disruption to the shore caused by ORV traffic could be reduced by:

- operating ORVs on the duneward-sloping, backshore-near-the-berm zone during the summer.
- operating ORVs on the gently sloped, highly compacted foreshore during the winter.
- minimizing the number of individual ORV tracks on the beach.

Potential changes in the *position* of the barrier island shoreline that could be attributed to the disruption caused by ORVs were not specifically determined in Anders and Leatherman.

Fire Island National Seashore (FINS) ORV Regulatory Program

FINS is under the jurisdiction of the U. S. Dept. of the Interior, National Park Service. The policies for managing the natural resources within the Seashore, controlling erosion, and providing for different forms of access are specified in a general management plan (U. S. Dept. of the Interior, National Park Service 1977).⁸ These policies reflect the desire of FINS to preserve and enhance the serenity, natural beauty and resources of the Fire Island barrier beach to the maximum extent possible, while providing for levels of usage that are lower than those accommodated at other shoreline parks under different jurisdictions. The FINS policies are based on a desire to minimize interference with natural shore processes.

Federal regulations (36 CFR 7.20(a)) dictate the conditions under which recreational ORV travel is allowed within FINS. A summary of these regulations pertaining to recreational vehicles follows:

- Recreational ORV permits are issued to provide access for *fishing* and *hunting* activities. Access must be *compatible* with conservation and preservation of seashore resources. Joy riding is prohibited, as is overnight camping.
- Recreational ORV travel is allowed only between Smith Pt. and Long Cove (an area ca. six miles long).
- Driving is prohibited within 20 ft. of any vegetation. ORV travel is allowed only in the zone between the water's edge and 20 feet seaward of the beach grass line. Travel is banned during periods when water is higher than the 20 ft. line.
- Travel is only allowed at specific times.
 - 9/15 - 10/31 - no entry onto beach between 9:00 a.m. and 6:00 p.m. Sat., Sun., holidays.
 - 11/1 - 12/31 - travel permitted subject to 5,000 trip limit.
 - 1/1 - 3/31 - no travel.
 - 4/1 - 4/30 - travel permitted subject to 5,000 trip limit.
 - 5/1 - 6/13 - no entry between 9:00 a.m. and 6:00 p.m. Sat., Sun., holidays; travel permitted subject to 5,000 trip limit.
 - 6/14 - 9/14 - no travel.
- Recreational ORV travel is limited to a total of 5,000 one-way trips per year. The trip counts begin in Sept. and continue until the 5,000 total is reached; ORV travel then ends till the following Sept. When the beach is open, drivers are allowed a maximum of two round trips/day/vehicle.

FINS has the authority to limit the total number of permits for recreational ORVs; and/or establish a limit on the number of ORVs permitted on any portion of seashore lands at any one time, *when such limits are required in the interests of public safety, protection of the resources of the area or coordination with other visitor uses*. No such limits have been set.

Enforcement of ORV regulations by FINS park rangers is energetic. The key to such enforcement is active surveillance of ORV activities, i.e., the presence of FINS park rangers on the beach. The limitations on ORV access, e.g., no travel behind the dune line, seasonal closures, frequent closure of the beach to ORV travel due to tide and weather conditions; all result in low levels of recreational ORV travel on FINS lands as compared to the level of usage evident in Smith Point County Park located immediately to the east. During the three-year period from 1988-1990, use of recreational ORVs averaged about 2,700 trips/year (1,350 round trips). (Note: the number of ORV trips for other purposes on FINS lands - commercial contractors, utility, public safety, etc., - far exceeds that for recreational ORVs.)

Regulation of ORV Activities by SCDPRC

The management approach of SCDPRC differs from that of FINS in regard to recreational usage of coastal parklands. This approach is manifested in the higher levels of usage and ORV access at County parks, especially at Smith Pt. County Park. It is estimated that there are on the order of 60,000 - 70,000 single trips/yr (30,000 - 35,000 round trips) by ORVs on the ca. six miles of Smith

Pt. Park open to ORV access and related activities, such as camping. Of this total, about 10,000 - 12,000 single trips occur during the off-season.

SCDPRC rules and regulations pertaining to outer beach use by ORVs at Smith Pt., Cupsogue, Shinnecock East, Cedar Pt. and Montauk County Parks, are included in Appendix F. Permit conditions, general rules of the road, and equipment requirements pertaining to camping are specified. No *regulations* are in place that restrict the seasons or hours of travel, or the number of ORVs that are allowed access to the outer beach on a daily or other time period basis; i.e., access is allowed year-round at all hours. Beaches may be closed to ORV travel if conditions, such as storm tides, dictate that this course of action should be taken. However, SCDPRC personnel do enforce a cap on ORV access to Shinnecock East County Park. Here, ORV access per day is limited to 100 campers and 75 day users. In practice, the beach at Smith Pt. County Park is also closed to ORV travel from January to March. During this period, recreational fishing and waterfowl hunting opportunities are limited, and a winter beach profile exists, i.e., the beach is narrow and low in elevation as compared to conditions during the summer.

ORV Management Issues in Suffolk County Parks

Several observations and conclusions concerning ORV usage of beach areas in Suffolk County parks have been made as a result of this analysis. They are listed below.

- Recreational ORV usage of Suffolk County parks is a very popular activity for about 10,000 residents, their families and guests. Use of ORVs is associated with many recreational pursuits, e.g., overnight camping, bathing, fishing, waterfowl hunting, etc.
- Fees associated with ORV usage contribute significant funds to Suffolk County. Fee schedules have been established for ORV permits (generally \$50/yr.), daily use (generally \$4/trip) and overnight use (generally \$12/night).
- The level of ORV usage in Suffolk County parks has increased dramatically in the recent past, especially at Smith Pt. and Shinnecock East County Parks. (As many as 1,500 ORVs have used the outer beach at Smith Pt. on a given day.) Infractions and complaints received by SCDPRC personnel include the following: ORVs parked on the toe of the dunes; poor sanitary conditions; ORV "dune jumping;" high noise and traffic levels; unleashed dogs; ground fires; jet skis; ORV people and pet encroachment of bird nesting areas; destruction of snow fencing erected to re-build dunes and curtail ORV travel. Some of these problems are not caused by ORV operation per se, but are associated with activities that are facilitated by ORV access.
- Rules and regulations governing outer beach use appear reasonable, but problems occur due to the high amount of use (especially at Smith Pt.) and difficulty of enforcement given existing staff levels in SCDPRC. Infraction of rules can result in the issuance of appearance tickets and ORV permit revocation. Depending upon visitation conditions at the Smith Pt. pavilion bathing beach, the outer beach is patrolled by SCDPRC personnel two times per day. This level of park personnel *presence* is inadequate during the summer peak period of usage.
- The dramatic decline in the Long Island population of beach-nesting birds (terns and piping plovers) has been attributed to two factors: destruction of suitable nesting habitat by development of privately owned coastal areas, and too intense recreational use of publicly owned parklands where suitable habitat for breeding/nesting activity remains (New York State Dept. of State and The Nature Conservancy 1991). Threats to beach-nesting birds during the breeding period include human disturbance, vandalism, pets, predation, ORV traffic, and various shore-related recreational activities. Beach-nesting shorebirds were found to utilize dune, dredged spoil and beach areas for breeding and nesting in four county parks where ORV travel is authorized to occur -- Smith Pt., Cupsogue, Shinnecock East and Cedar Pt. County Parks. SCDPRC personnel and other interested parties should conduct a program to identify, mark and protect bird breeding areas, as well as rare plants that are found in barrier beach environments, e.g., seabeach amaranth. This program should be enhanced to increase bird reproductive success.
- Coastal hazard planning policies have been identified for the south shore of Long Island (Long Island Regional Planning Board 1989).⁹ For those segments of the shoreline encompassing Smith Pt., Cupsogue, and Shinnecock East County Parks, the applicable policy is *to maintain the existence and continuity of the barrier islands*. This policy is justified by the need to provide for continued public access to the County parks and to mitigate flooding of the mainland, disruption

of the longshore transport of sand and the onset of shore erosion problems downdrift of newly formed inlets, undesirable salinity changes in bays, and increased shoaling in Shinnecock and Moriches inlets. Management activities in County parks should be consistent with this policy. Due to the narrow width of the barrier island and the lack of protective dunes at certain locations, a number of overwash sites exist at Smith Pt. County Park, particularly near Pattersquash Island and the site of the former Forge River Coast Guard Station. Indiscriminate ORV travel from the outer beach to the Burma Rd. in this area has occurred, with associated damage to dune-stabilizing vegetation and dune elevations. This portion of the barrier island could be subject to breakthrough and tidal inlet creation. More strict control of ORV travel in this area is warranted. Dune building, as well as marsh creation on the bay side, can be employed to minimize the potential for new inlets in the area susceptible to breaching. Opportunities arise for such positive action in connection with the disposal of dredged material from bay navigation channel maintenance projects.

ORV Recommendations

- ORV traffic in Suffolk County Parks should be monitored and data collected to determine the recreational needs for such usage, the levels of ORV travel and related uses by coastal area, the existence of conflicts with other users of these areas, and existing as well as potential damage to coastal resources that can be attributed to ORVs and related activities associated with vehicle access. This information should be used to develop detailed site specific plans for managing ORV access at each park that are consistent with the protection of natural resources.
- The justifications for ORV use on County-owned beaches should be reviewed. Park policy should prohibit joyriding, and should de-emphasize accommodation of ORV access for overnight camping in light of existing enforcement and monitoring difficulties. ORV travel related to water-dependent recreational activity should be of higher priority in access allocation decisions.
- Area, seasonal and daily ORV access restrictions should be established and modified as conditions warrant for all County parks where such use is authorized to occur. Space limitations have already resulted in the establishment of daily caps on the number of ORVs (overnight camping and day use) allowed access to Shinnecock East County Park. (ORV access was also restricted at Cupsogue County Park to the hard pack road area that was created by the U. S. Army Corps of Engineers in its repair of the 2,600 ft. breach in the barrier island east of Moriches Inlet during 1980-81). Authorized ORV access should not be initiated at those parks where such activity does not occur at present, e.g., Shinnecock West County Park.
- Conditions now dictate that a cap on the number of ORVs allowed access to the outer beach should be established at Smith Pt. County Park and enforced as soon as possible. A limit of 500 ORVs per day is recommended at this time. Reservations should be required for ORV access to Smith Pt. County Park during the period of peak usage. The SCDPRC Green Key card system for making reservations at Suffolk County golf courses should be modified to handle ORV reservations.
- The implementation of an ORV cap at Smith Pt. should be accompanied by measures to keep ORVs off dunes and low lying areas where dunes formerly existed; and on designated trails in backdune areas. Consideration should be given to eliminating tent camping on the beach, given the conflicts and abuses associated with this activity.
- Dredged spoil from maintenance dredging of the Long Island Intercoastal Waterway should be used to re-build the dunes in the area where washovers are occurring in Smith Pt. County Park, and thus reduce the likelihood of new tidal inlet creation through the barrier island.
- The level of ORV access and associated use that is acceptable depends in part on the amount of enforcement and park management resources available. Patrol/enforcement activities must be increased at Smith Pt. County Park, as well as SCDPRC personnel presence on the outer beach. Patrols should occur six to seven times per day during the summer peak usage period at Smith Pt. An additional five summer positions are required.
- Consideration should be given to eliminating ORV access to the beach at Cedar Pt. County Park.
- As part of a broad, region-wide program for the protection of beach nesting shorebirds, SCDPRC should continue and strengthen its efforts with other interested agencies and private groups to restrict access to breeding habitat found in Suffolk County parklands during critical time periods. Tern colonies and piping plover nest sites must be separated from human disturbance and associated recreational uses, including

ORV traffic, that cause adverse impacts. Minimum requirements for the protection of colonies and nest sites include the following:

- identification and monitoring of active breeding areas on a year-to-year basis.
- determination of buffer zone boundaries at actively used breeding areas.
- erection of suitable fencing along the outer boundary of the buffer zone.
- posting with appropriate signs so as to educate the public not to encroach on the breeding area or buffer zone, either on foot or in ORVs. Pets should also be restrained from entering the areas set aside as bird sanctuaries.

Additional details pertaining to the above are found in New York State Dept. of State and The Nature Conservancy (1991)¹⁰ publications.

In general ORVs, people and their pets should be prohibited from entering shorebird sanctuaries during the breeding and nesting season from approximately May 1st to September 1st. The buffer zone around colonies and nest sites should be at least 200 feet wide.

- Close sensitive areas along coastal bays and lagoons (salt marshes and sand flats) to ORV traffic. Primary dunes should be off limits to ORVs, as well as pedestrian traffic. Appropriate measures should also be taken to protect rare and endangered plant species from disturbance.
- Establish and control necessary vehicle access points to the beach so as to maintain elevation of the primary dune. Build wooden ramps at all ORV crossings; design access points in such a manner as to preserve the natural profile of dune and beach areas.
- Limit ORV traffic in back dune areas to well-defined trails. These trails should be marked with borders of shrubbery, fences, posts, signs, etc. in order to prevent ORV departures into vegetated areas. The trail layout should avoid existing and potential blow-out sites and should be designed to minimize potential environmental damage while serving the needs and desires of the users of the area. A number of ORV trails in back dune areas of Smith Pt. County Park should be closed.
- Monitor trails and dune crossings. If a site exhibits continued deterioration, the trail and/or dune crossing at this site should be relocated.
- Limit ORV travel on the beach to the region between the seaward base of the dune and the low tide mark. New drift lines forming at the base of the dunes should be off-limits to ORV travel.
- Prohibit ORV access to the beach during periods of extreme high tide and active beach erosion in order to prevent intrusion onto the base and flank of the dunes. The decisions to close and open the beach to ORVs should be based on inspection of conditions during daily patrols.
- If warranted, close sections of the beach to traffic. In such instances adequate by-pass routes should be provided.
- SCDPRC regulation and control of ORV access and activity in Shinnecock East, Montauk, Cupsogue and especially Smith Pt. County Parks should be consistent with the coastal hazard planning policy of maintaining the existence and continuity of the barrier islands. This is of particular importance in those locations where dunes are low and overwash with potential inlet creation is a continuing threat. ORV traffic should be curtailed in such locations when conditions and/or restoration activities, such as vegetation planting and snow fencing to re-build dunes, dictate that such action be taken.

The Suffolk County Park Police

BACKGROUND AND PURPOSE

Originally the responsibility of policing and guarding the Suffolk County Parks was vested in the County Sheriff's Department. In 1969 the Board of Supervisors established 36 Park Ranger positions in the Parks Department and abolished 36 Deputy Sheriff positions. This move, in effect, trans-

ferred responsibility for policing the parks to the Suffolk County Department of Parks, Recreation and Conservation.

Recognizing that the Park Rangers would need to be armed and have enforcement powers, the Parks Commissioner requested that a bill be introduced in the New York State legislature designating the Suffolk County Park Rangers as Peace Officers. The bill was enacted into law in March of 1970 and had a two-fold effect.

- Peace Officers could make arrests upon reasonable causes.
- Peace Officers could carry weapons.

From that beginning in 1970 until 1977 Park Rangers were hired in sufficient numbers to provide around the clock coverage in all facilitated parks. In January of 1977, the authorized strength of the Suffolk County Park Rangers was: one (1) Chief Ranger (Ranger IV), seven (7) Lieutenants (Ranger III), fourteen (14) Sergeants (Ranger II) and eighty (80) Ranger 1's. On March 6, 1977, there was a massive layoff in the County Parks Department due to problems with the economy. The Ranger force was depleted to twenty-five (25) Park Rangers and an Administrative Supervisor. Responsibility for policing Smith Point was given to the Sheriff's Department. In the Summer of 1977 the Parks experienced problems with fights and rowdiness; in recognition of this the Legislature authorized the Parks Department to rehire five Rangers. As the economy improved ten Rangers were hired in 1980 and responsibility for policing Smith Point Park was transferred back to the Parks Department. By 1987 the Ranger division had authorized strength of 48 positions. Vacant positions were not filled so the actual size of the force was: One (1) Chief, Three (3) Sergeants, and thirty-four (34) Park Rangers.

Through attrition the force has dwindled to 27 positions, comprising: One (1) chief, (2) Two Lieutenants, (3) Sergeants, (21) Park Police Officers.

CURRENT

The mission of the Suffolk County Park Police is to ensure a safe and enjoyable recreational environment for park patrons, and to preserve and protect our natural resources.

This mission is accomplished through public education; omnipresence and active enforcement of State Laws, and County Parks Rules and Regulations.

Staff reduction over the last few years was making it increasingly difficult to accomplish this mission, particularly during the Summer season. In recognition of this the Parks Commissioner requested that Security Director Hynes develop a plan working within budget constraints that would allow accomplishment of the department mission.

The plan as developed, recommended using seasonal augmentation of law enforcement personnel. This method has been successfully employed in both State and Federal Parks also East End Police Departments. The Commissioner authorized transferring money in the seasonal account to hire 15 seasonal Park Police Officers and create four new Sergeants. This staffing level would allow for posting around the clock law enforcement presence in all camp grounds as well as additional coverage at Smith Point.

In order to comply with civil service requirements the candidates recruited would have to attend a 440 hour Municipal Police training course and meet the same physical, psychological and agility requirements as a full time Park Police Officer. A course for part time police officers is offered by the Suffolk County Police Academy.

To provide for adequate supervision of the Seasonal Police Officers four Park Police Officers were promoted to Sergeant. The new Sergeants were sent to the Suffolk County Police Supervisors School. The creation of new supervisors permitted supervision on all shifts. It is felt this helped account for a dramatic increase in officer productivity.

June of 1991 a new book of rules and procedures was introduced. The new Rules and Procedures replaced outmoded and obsolete book. Each officer was issued a copy thereby ensuring a greater understanding of expected behavior and a uniform application of procedures.

In June of 1991 the status of County Park Rangers was changed from that of Peace Officer to that of Police Officer. This change in status enables the Park Police Officers to perform their law enforcement duties more effectively, particularly in the area of warrant executions and follow-up investi-

gations. Police Officer status allows the Ranger to accurately identify himself as a Police Officer in his adversarial encounters, thereby reducing the incidents of resistance. As an official Police Agency, the Park Police will be able to benefit from State and Federal grants directed at police agencies. One such grant is for Body Armor that was successfully applied for and received.

PARKWATCH

Park Watch is a program that enlists the aid of residents who live immediately adjacent to County Park Lands or patrons using County Parks to help reduce the incidence of vandalism and disturbances caused by unlawful use of the County Park System. A concerted effort has been made to enlist as many volunteers as possible resulting in a noticeable increase in calls received by headquarters.

CJIS

Suffolk County is establishing a Criminal Justice Information Network. The Park Police Division is a full participant in this Network joining Suffolk County Police Department, Sheriff's Department, Probation, District Attorney, Courts and Fire Rescue Emergency Services. The County has initiated several changes that affect the Park Police. Park Police responding to emergency calls are now dispatched by the County Police Department. This move results in a more efficient use of Park Police, avoiding duplication of calls put out to both County and Park Police vehicles. A second major change is the introduction of a 800 Megahertz transmission band. Our Park Police are now on the band, which has greatly improved its transmissions throughout the County. The County Police Department will soon join the Park Police on this band. Other steps taken in 1994 include arrest records becoming part of the County Police Department's Central Records System. Park Police uniforms and equipment are now issued by the County Police Quartermaster Section. Property to be safeguard as evidence is now turned over to the County Police Property Bureau. All these steps have resulted in a more efficient and cost-effective integration of select functions that benefit both the County Police Department and the Parks Police Division.

Perusal of the attached statistical analysis of Law Enforcement activities shows that the Park Police are involved in a broad range of Police Activity, a large percent of which involves property damage and theft along with behavioral problems such as disorderly conduct, trespassing, alcohol and drug abuse. The Park Police force was involved in over three thousand enforcement actions in 1992 yet only two official letters of complaint were received. This is quite remarkable for any law enforcement agency. The Park Police attempt to be a service oriented police agency. They deport themselves in a manner that creates sense of security in the minds of patrons without being overbearing.

Frequently the Park Police are looked at as a seasonal operation. This observation is only partially accurate. Although seasonally deployed in the approach to law enforcement problems, the assumption is that there is only one season. This is where the inaccuracy occurs. The period from April to October is considered the primary operating season for the Parks Department. It is during this season that the parks receive the greatest visitations. The Park Police turn their attention and resources toward visitor protection deploying themselves primarily in the seven facilitated parks: Montauk, Cedar Point, Sears Bellows, Indian Island, Smith Point, Southaven, Blydenburgh. The other seventy parks' properties are addressed on call received basis. Park Police Officers are restricted in their accrued leave time during this season.

The second season, the period from November to March is when the parks experience a dramatic reduction in visitations. This allows emphasis on resource protection in all park properties. Officers are deployed in a manner that creates the greatest omnipresence possible concentrating on hunting/fishing, illegal dumping and criminal mischief complaints. Park Police Officers take most of their accrued leave time during this period. This creates a bare minimum staffing level quite frequently resulting in only two officers working to cover the entire park system from Montauk to Huntington. An analysis of second season activity shows that the agency is involved in a significant number of law enforcement activities during this period.

The authorized strength of the law enforcement division in 1987 was 48 positions. The failing economy prevented the department from reaching authorized strength. Through disability and regular retirements the force dwindled to its current level of 27 filled positions. It is becoming increasingly difficult to provide adequate coverage to the ever increasing park system. Complicating this situation is the fact that the average age of Park Police Officers is 44 years, the youngest being 34 and the oldest 51 years old. The average length of service is 17 years. The nature of police work is physically strenuous at times. There may be a correlation between an aging force and the large amount workman's compensation and disability pensions experienced by this division. Nine out of eleven of the recent retirements have been for job incurred disabilities.

It is recommended that ten new Park Police Officer positions be created, this would bring the total compliment up to the 1987 level: (1) Chief, (2) Lieutenants, (6) Sergeants, and 29 Patrol Officers.

This coupled with (18) seasonal Park Police Officers would allow deployment of a force of 58 personnel during the peak season. A reasonably adequate coverage of facilitated parks could be accomplished with this staffing level. It is also essential that the patrol force receive proper supervision, particularly seasonal Police Officers who are for the most part newly trained recruits.

COMMUNICATIONS BUREAU

The Communications Bureau is a twenty-four hour seven day a week operation. Its staffing presently consists of four full time civil service civilian dispatchers. Their responsibilities include the following:

Answering all incoming calls from the public requesting police assistance, or the reporting of crimes and other problems. Dispatching by radio to the appropriate response units; Park Police, Fire, Ambulance or outside police agency.

Serves as dispatch center for departmental communication system, linking Maintenance, Life Guards, EMts and Park Police.

Operation and dissemination of all Police related computer services such as: Department of Motor Vehicle Inquires, checks for wanted and missing persons, stolen property, and criminal histories, New York State Police Information Network (NYSPIN) terminal linking with nationwide system, logging and recording of all incidents.

The communications bureau handled in 1991 over 8,000 incidents for the Law Enforcement Division. They originated over 200 teletypes, recorded over 2,000 arrests, and provided the Park Police with over 7,000 DMV inquires through NYSPIN terminal.

PROBLEMS

Current staffing of Communications Bureau is insufficient to provide around the clock coverage without resorting to either overtime or replacement with Sworn Police personnel. This is inconsistent with current trend of freeing police officers from civilian tasks. It is recommended that two additional Radio Dispatcher positions be appropriated.

In 1989 the Departments, antiquated communication recording system broke beyond repair. This system is essential for the recording of all emergency phone calls and radio transmissions. It is recommended that the Department invest in a new recording system.

The existing radios are approximately eight years old and are beginning to experience serious maintenance problems. It is recommended that the system be updated.

General Recommendations

GENERAL RECOMMENDATIONS

Recommendations

– Classification of All Lands

All Suffolk County open space holdings should be specifically classified according to use; general parks, Nature Preserve, bird sanctuary, drinking water protection, and Historic Trust properties. This classification should clearly identify those parcels that meet the environmental and accessibility requirements for active use so that when funds are available necessary improvements can be made to those parks which can provide for recreational demands and tourism needs. An interpretive program emphasizing those active parks that contain unique features of Long Island's geomorphology could become a centerpiece for attracting more tourists.

Suffolk County's Nature Preserves and bird sanctuaries can and should be viewed as the most protected of the spectrum of Suffolk's open space categories and, therefore, are the most restricted from a management point of view. Prior to dedication and classification of Suffolk County open space as Nature Preserve or bird sanctuary, it is necessary to review such parcels for potential future uses. Article I of the Charter, concerning dedication of property to County Nature Preserve or bird sanctuary, specifies that the resolution dedicating County-owned property for such uses shall provide that all or a specified portion of a property being dedicated shall be kept forever wild or in its natural state, or that it may be used only for the purposes specified in the resolution. Therefore, as part of the dedication resolution for such properties, the purpose or purposes should be set forth which will allow the Parks Department flexibility in managing these areas. Without setting forth the purpose or purposes that will allow the Parks Department to adequately manage such lands, little can be done if the property is to remain forever wild. Once dedicated to the Nature Preserve, the property cannot be used for any purpose not specified in the resolution unless approved by mandatory referendum.

Article XII of the Suffolk County Charter deals with acquisition of property for the Suffolk County Drinking Water Protection Program. The Charter specifies that land acquired with funds authorized under Article XII shall remain in a natural state and be managed so as to perpetuate the natural ecosystem of said lands as a Nature Preserve under section CI-7 of the Suffolk County Charter, with the sole exception being water supply production and distribution. The Nature Preserve Handbook as adopted by the Suffolk County Legislature governs the use and management of Nature Preserves as well as watershed protection properties. The Nature Preserve Handbook should be updated to allow the Parks Department more flexibility in the management and future use of such areas.

The Suffolk County Charter also allows for the dedication of properties to the Suffolk County Historic Trust. The resolution dedicating County-owned property to the County Historic Trust must also specify the purpose or purposes for which the property can be used. Once dedicated to the Suffolk County Historic Trust, the property cannot be removed or used for any other purpose without approval from a mandatory referendum. Therefore, prior to dedication of such properties, current and future uses should be clearly delineated so that the dedicating resolution leaves the Parks Department enough flexibility to manage the properties in the future without altering their historic integrity.

Currently Suffolk County acquires open space through tax default. These properties are reviewed by the Suffolk County Planning Department, the Office of Ecology and the Parks Department for environmental sensitivity and potential park usage. A special public purpose category should be created in order to allow the County to retain such properties and remove them from the tax rolls prior to classifying them under either general parks, Nature Preserve, bird sanctuary, Drinking Water Protection, or Historic Trust; or possibly swapping them in

the future. This policy would allow the County and its various departments time to decide the purpose for which such properties should be put without having to pay taxes.

In addition to classification, it is also necessary to field survey the exact boundary locations of County-owned parkland to correctly post signs on the borders.

– Improvement Needs

Park improvements increase opportunities for residents and enhance tourism for the area. The major parks that will achieve the above two objectives should be phased into future capital programs so that necessary public facilities can be constructed when needed. Detailed plans for each of the parks must be developed with input from user groups, nearby residents, and park professionals. The development of these properties requires an outlay of funds for capital improvements and later management. However, the section that shows the fees that can be collected indicates that such fees can provide a significant portion of the overall park operating budget. Increased recognition and usage of the parks can keep the overall costs of County park operations in a reasonable range.

– Management

Recent budget constraints have severely limited personnel in the Parks Department. This has occurred at the same time the County has undertaken an extensive acquisition program that has almost doubled the County's park holdings in the last decade. Therefore, it is very important to have a ten-year human resources plan to meet current and projected levels of services that would be necessary to manage the more than 30,000 acres of County holdings. This plan should improve the deficiencies that exist today and identify new personnel needed to provide at least a minimal level of services and protection of all of the land in the future.

The first phase of this plan would be to establish, at no additional cost, an appropriately staffed Division of Natural Resource Management as well as an adequately staffed Park Ranger force to protect the vast environmental assets property.

The second phase would project a combination of private management and additional park personnel to manage areas that are presently undeveloped or underutilized and could benefit from outside or joint management.

– Future Acquisitions

Suffolk County now has one of the best open space systems of any urban county. However, there will always be demands to protect additional parcels because of local or regional concerns or the possibility of development impact on a very desirable parcel. Emphasis on future acquisitions should be placed on making continuous corridors of parklands, especially throughout the Pine Barrens. The recommended infill of certain key pieces will make management easier, provide the opportunity for more continuous park usage such as trails or paths and provide large areas of watershed protection.

Acquisitions to protect stream corridors are very important. Long Island Regional Planning Board studies have shown the impact of various land use patterns on the streams and bays to which they discharge.

Waterfront access is always an important recreation need, and key parcels that could provide good waterfront access should be considered for future acquisitions, especially in parts of the County where there is no public access through active County or state parks.

The remaining acquisitions should include properties that have unique features. These could include exceptional flora or fauna, archeological resources, or historic sites and buildings.

– New Facilities

One type of recreational facility that does not currently exist in the County park system is a central sports facility for tournaments. Presently, there are only local ball fields which are not specifically oriented to County-wide active recreation demands. Such a facility can be accommodated on cleared and level parkland in the western part of the County.

Capital Expenditure Needs and Private Construction

Limits on capital expenditures have prohibited new development and essential major maintenance of the County's existing parklands. Therefore, the policy that the Parks, Recreation and Conservation Department has instituted to solicit proposals for maintenance, development, and operation should be continued. This policy permits residents to use recreation facilities on historic sites sooner than the previous system which required capital budget approval and/or legislative authorization.

Under this new approach, the contractor and the County share in the annual revenue from a new or improved recreational use. Even though the County could achieve more fees under its own operation, the lack of capital funds has precluded this. Therefore, sharing of funds for a new facility for a number of years will bring money in faster and over the long term can result in more total revenues to the County.

Implementation of this policy should be based on plans developed for the major parks where it would be more cost effective to have private construction and management. The end result of such efforts, in addition to earlier accessibility, should be the transfer to the County of needed recreation facilities at the end of a set time period. At that point, County operation and maintenance or a new private management agreement can be considered.

Long Term Funding

The main need of the Parks, Recreation and Conservation Department is to have a source of income which does not fluctuate sharply when there are overall budget constraints. Park development and maintenance are erroneously classified as a category that can be sharply reduced in times of crisis. This trend was shown in Table 6. These reductions can lead to loss of assets from vandalism or general use with a subsequent loss of funds because fewer residents and tourists would be able to use the facilities.

Some analysts believe that the County parks operations cannot become self-sufficient through fee collections. Suffolk park revenues now are highest in the nation, well above the national average of thirty to thirty-five percent (30%-35%). To expect an increase from projected revenues of seventy-seven percent (77%) in 1992 to one hundred percent (100%) of operating costs in three to five years is unrealistic. A better option is a Parks and Recreation Authority or Park District. This strategy would create another taxing district which could provide a free *green key* (leisure pass) to every Suffolk County resident. Additional parks money could come from corporate or foundation gifts. The combination could fund the total parks budget.

Since staffing has been cut to a minimum and use of seasonal and part-time employees is very high, additional savings may not be possible. Under the current budget system, new greens fees from golf could perhaps bring in \$55,000 to \$60,000. Increased beach parking charges might produce \$120,000 - \$135,000. However, these changes are not enough to close the gap. Therefore, a dedicated trust fund that replaces general operating budget proceeds is proposed to finance parkland management.

The trust fund is proposed to be energized by a small recreation tax increase, subject to a mandatory referendum. It is estimated that this revenue stream would generate enough funds to keep the Department of Parks operating and capital budgets from becoming an even lower proportion of the total County expenditures. The dedicated fund is proposed as the sole means for funding the Department's operating and capital needs. Department generated revenue from user fees, etc. would be added to the endowment to let it grow with inflation.

The benefit to the operations of the Department of Parks, Recreation and Conservation is clear. It would, for the first time, provide the Department with an appropriate level of resources to meet its responsibilities.

The benefit to the public is the \$9 million annual savings represented in the Department of Parks annual operating budget. All or part of the perpetual savings could be returned to taxpayers in the form of a tax-cut or the monies could be redirected to fund other worthwhile County programs.

Management

– Management Alternatives

Management of all park properties has to be a primary County concern. Properties that are poorly managed experience loss of some of the environmental resources for which the properties were originally purchased. If vandalism is allowed through lack of management, there can be even higher costs for reconstruction of the necessary infrastructure in the parks. Since periods of extreme budget constraint often affect parks more substantially than some of the other services, the only way to avoid such a problem is to have dedicated funds for the maintenance of park properties. Dedicated funds have been used for the Watershed Protection Program through the sales tax. A dedicated management fund could be the result of the fees that are collected for all recreation activities in the County, plus the sales tax surcharge suggested in the previous section.

Management of land is expensive, and therefore, opportunities for joint management, management by private associations, or transfer to towns or villages, can be in the County's interest. In some cases where a property is County-owned, and the use is expected to be primarily within the local area, a town has been allowed to develop and maintain County-owned land. The County should generally avoid acquiring this type of parcel for recreation. However, where such parcels exist, a local transfer could be beneficial to the County and to other units of government.

The Nature Conservancy has some management agreements with the County and should continue where they have a strong interest and the resources available. Their agreement with Suffolk County is a good model for a private management agreement (see Appendix E).

The exchange of parklands very likely will be an important factor in future management. As various greenbelts or other continuous open space corridors are created, there is often a multiplicity of jurisdictions owning the land. Exchanges by federal, state, County and town governments can be desirable if that allows easier management by one of the levels of government.

Management agreements are sometimes workable when there are adjacent parcels owned by different levels of government and where it would be difficult to exchange land. A new type of joint arrangement has occurred with examples such as Hither Hills, where New York State, Suffolk County and the Town of East Hampton own the land and the Town has agreed to manage it. Because of the high cost of land, some other acquisitions are likely to be done on a multi-jurisdictional level which will require cooperation when it comes to park management.

– Adopt-a-Park Options for Nature Preserves

The small nature preserve parcels in the County park inventory are often subject to vandalism and dumping. This results in a liability to the County rather than an asset achieved by the dedication of lands for park purposes. Those small parcels that are usable for nature study should have initial County support to clean up, and, if necessary, develop some limited facilities. Later on, school groups, neighborhood associations or environmentally oriented citizens groups could *adopt-a-park*. This approach would expand community involvement in the park system since many of the small areas are used almost exclusively by local residents. The County would gain by reducing its maintenance problems if neighbors realize that the property is an asset. This will help to deter vandalism while increasing local use.

Consolidation of Tax Default Properties

A whole series of areas is shown on the parks maps as *partial County ownership*. The majority are found in Brookhaven and Southamptton and are comprised of old filed maps where the County has acquired, through tax default, a significant portion of the old filed map. Some of these parcels are in nature preserve, while others are classified for general County purposes. County-owned parcels categorized for general purposes can be sold at auction or to an adjoining owner, or can be ex-

changed for other more usable or environmentally sensitive lands if they are not important to the County's open space needs.

Some of these old filed maps are in the watershed preserve and, therefore, sale or development is not desirable since lot sizes and the street network would disturb more land than a new subdivision complying with current rules. These parcels should be left in open space. The Suffolk County Department of Health Services allows for the transfer of development rights from parcels in the watershed preserve to other less environmentally sensitive land. Owners of these parcels or future purchasers of such parcels should be encouraged to dedicate these properties to the County. Where development rights have been transferred by and/or sterilized by the Health Services Department, SCDHS and the towns should be encouraged to dedicate these lands to the County.

If this policy is followed for a number of years, the County can ultimately abandon the underlying old filed map, obtain title to the undeveloped streets, and create one large tax map parcel of dedicated County parkland. Site Specific Recommendations are included in Volume 3.

Exchanges of Land

In order to expand and facilitate the recommendations of the previous section, an action plan is necessary to encourage consolidation of small parcels and transfer others out of park's category when they are already, or expected to be, surrounded by built up residential uses.

It is necessary to have an acquisition plan to eliminate the possibility of individual home construction inside of a park area that was part of an old filed map. This possibility exists in the central pine barrens area and in the South Setauket Woods Preservation Area. If some of the last remaining out-parcels can be acquired, the paper street system can be abandoned. This would simplify overall park maps, eliminate the potential incursion into County parklands and add acreage to the park system. However, where there are a few private holdings in an old filed map, a series of streets must be retained which could provide future access. The acquisition of a few small lots often seems insignificant because of their size. However, obtaining title to an extensive paper street network produces a significant amount of land for preservation. The plan includes specific recommendations where this should occur.

There are a number of old filed maps throughout the County where there is no opportunity of major County ownership because of assembly by a land owner or builder. In these cases, small County-owned parcels should be sold with the proceeds going to other open space acquisitions. In order for this process to work properly, it should also include nature preserve parcels that are, or, which in time most probably will be surrounded by development. These tiny nature preserve parcels can only become dumping grounds or extensions of home owners' back yards with no public benefit whatsoever and should be removed from parks or nature preserve category. A public auction or a sale to an adjoining owner with a non-development clause should be considered in such cases.

Because of the status as parkland, State legislative approval would be required to sell or exchange these parcels. In addition, County parkland dedicated to nature preserve can only be removed by County-wide referendum of a majority of people voting. At the present time, property that has been dedicated as parkland or nature preserve is subject to the following State definitions.¹¹

The term *dedicated* is often used in referring to parklands, i.e., *lands dedicated for park purposes*, or *dedicated parklands*. The dedication of parkland may be the specific, official act by the governing body of the municipality, such as the passage or adoption of a formal resolution. Dedication can also occur through actions which demonstrate that a governmental unit considers the lands to be parklands, such as master planning for recreation purposes, budgeting for park purposes, mapping lands as parkland or constructing recreation facilities. Dedication can also occur when the common, accepted use of the land is as a park.

If a request for a change of status on all parcels was handled as a unit, it would be much more cost effective and would implement one of the overall goals of the parkland plan which is to improve management. The removal or consolidation of some of these small parcels will make it easier to manage many of the County holdings. There is also consideration of transfers to other units of government, if possible. This transfer could be accomplished through an exchange of land between the State, a town or village; or joint management agreement with a unit of government or a private association.

Individual Park Evaluations and Recommendations

– Overview

Each one of the 157 park holdings or groups of holdings was separately evaluated by the staff in order to produce specific preliminary recommendations on a park-by-park basis. It was necessary to determine the locations, the amount of area improved or unimproved, along with any use restrictions such as those attached to nature preserves, bird sanctuaries, watershed protection areas and historic trust buildings.

Current usage and activities were reviewed to determine what portion of the park is being used and what activities are being accommodated. Information was also obtained on fee structures (see Volume 3).

Evaluations were made in each of the following categories to determine future recommendations for the parks.

- environmental characteristics
- user problems and issues
- management needs
- fiscal implications

For example, where there are environmentally sensitive areas such as wetlands, pine barrens, river corridors or special groundwater protection zones, there are implied limits to future park use. Vegetation and endangered or threatened species also had to be identified to make an evaluation (see Volume 3).

Major problems found in many of the parks were vandalism, dumping, conflicts with nearby residences, or deteriorated and out-of-date park facilities.

Policy recommendations were made for each of the park areas evaluated. In certain situations, it was found best not to change the park and its usage at all, nor provide any additional public access. In other cases, upgrading the facilities or expansion was recommended to meet overall recreational needs and some demands in certain parts of the County for improved access.

Fiscal implications were noted for each of the parks. Some require little or no maintenance, while others may require a degree of capital expenditures that is greater than that which is normally included in an operating budget. Therefore, these recommendations must be worked into capital improvement budgets in the next few years.

The last evaluation dealt with maintenance and operation requirements. Joint maintenance, private maintenance, or combinations of the above are listed for each of the locations that were reviewed.

– Acquisition Recommendations

Many of the County park properties would be enhanced by acquisitions of adjoining parcels, infill of old filed maps in a nature preserve area, and the acquisition of parcels that make properties easier to manage and provide the opportunity for trail systems through a number of parcels. See the Pine Barrens Trail Map in Volume 4 where small parcels were acquired and or obtain easements were obtained to complete a trail through public parkland. The following is an inventory of parks that should have additional acquisitions:

Town of Babylon

Parcel BA01 - Land adjacent to Bergen Point Park should be acquired to allow the development of additional facilities.

Parcel BA02 - Completion of the acquisition of the Carlls River watershed is needed to properly manage this greenbelt.

Town of Brookhaven

Parcel BR04 - The Columbus Avenue Nature Preserve can be better managed for a future watershed site if the remaining outparcels are acquired.

Parcel BR06 - The Eastport Nature Preserve requires some added parcels to create a viable watershed management area.

Parcel BR10 - The Hedges Creek wetlands are only partially in County ownership. Other wetland parcels should be obtained to prohibit encroachment on this preserve area.

Parcel BR13 - The Manorville Greenbelt requires an addition to the south in order to connect a whole series of open spaces in the area. This would create a north-south trail system through Manorville.

Parcel BR14 - The Manorville pine barrens are a series of watershed preserve properties that require a few hundred acres of additions to consolidate holdings and create a large preserve that would accommodate a portion of an east-west trail system.

Parcel BR16 - To be properly managed Middle Island Nature Preserve requires infill acquisitions.

Parcel BR19 - The Patchogue River Nature Preserve requires preservation of other parcels in its drainage basin.

Parcel BR23 - Other pine barrens land adjacent to the Rock Hill nature preserve should be added to create a large contiguous watershed conservation area.

Parcel BR28 - The South Manorville Nature Preserve requires acquisition of some small out-parcels to allow street abandonment and better management.

Parcel BR29 - The South Setauket Woods Nature Preserve is threatened by incursions of residences and the remaining privately owned parcels should be acquired to protect this watershed preserve.

Parcel BR31 - The St. Germain of Alaska property can be better managed with a few more infill parcels being acquired.

Parcel BR34 - The Mt. Sinai/Coram wetlands will be easier to manage with the acquisition of one parcel.

Parcel BR40 - The Warbler Woods property requires some additions and acquisitions of privately owned parcels on a large old filed map.

Parcel BR47 - The Gerard Road Nature Preserve requires infill acquisition for proper management.

Parcel BR49 - The Forge River property could use further expansion to protect the river corridor.

Town of Islip

Parcel IS09 - Orowoc Creek Wetlands has missing parcels that are needed to protect its drainage corridor and create the possibility of a trail system.

Parcel IS13 - Penataquit Creek Wetlands require some infill.

Parcel IS14 - Dosxee's Creek Wetlands need additional parcels in public ownership to protect the stream corridor.

Town of Riverhead

Parcel RH03 - Additions can be made to the Robert Cushman Murphy County Park and Calverton Ponds area by obtaining the remainder of the outparcels on the old filed map of Wading River Estates.

Town of Smithtown

Parcels SM03 and HU03 - Fresh Pond, which is located within two towns, requires a few additional parcels to be acquired to complete a greenbelt from Route 25A to Long Island Sound.

Parcel SM08 - Additional low-lying parcels should be added to the eastern portion of the Smithtown greenbelt.

Town of Southampton

Parcel SH03 - There are hundreds of parcels that should be added to the Dwarf Pine Plains to create a preserve and watershed protection area. The expected process for this consolidation is acquisition, transfer, tax foreclosure and continued dedication from The Nature Conservancy.

Parcel SH04 - The Flanders Nature Preserve requires infill acquisition of adjoining properties to create a trail corridor.

Parcel SH19 - Property in the vicinity of the large Suffolk Hills County Park contains some old filed maps. These remaining parcels should be acquired to create a continuous corridor between the Towns of Brookhaven and Southampton.

Parcel SH21 - The Shinnecock Indian Fort requires acquisition of an additional property in order to restrict uncontrolled access to this archeological site.

Parcel SH24 - The Noyack Greenbelt requires additional acquisition to create a continuous corridor of open space in accordance with Town and County Plans for the area.

Parcel SH05 - There are a number of old filed maps south of the Hampton Hills acquisition that should be acquired to manage the entire area properly.

Parcel SH07 - The Long Pond Greenbelt requires the addition of some key parcels to create a continuous corridor of open space throughout the area.

Parcel SH08 - The large Maple Swamp area needs a few small acquisitions in the immediate area to provide for a continuous trail system across the land.

Town of Southold

Parcel SD05 - There is vacant land available adjacent to Inlet Pond Park which would enhance and allow improvement of this waterfront park.

– Management Transfer Recommendations

There are a few small to medium-size County holdings that may be managed better by a local town either because the town maintains nearby uses or could maintain a County holding that is used primarily by local residents. Examples of these would be Parcel BA04, the 18.9 acre Van Bourgondien property in the Town of Babylon. There are parcels in the Town of Brookhaven that are recommended for Town management. They include Parcel BR21, the 2.5 acre Port Jefferson Station Nature Preserve; Parcel BR39, the 4.0 acre Twin Pond Nature Preserve; Parcel BR46, a 7.6 acre County Road Nature Preserve; Parcel BR48, the 8.5 acre Washington Avenue Park; Parcel BR54, the 0.7 acre Ryerson Road Nature Preserve and Parcel BR57, the 0.7 acre Manor/Yaphank Road Nature Preserve.

The Town of Islip Parcel IS08, the 69.8 acre Lakeland County Park for the handicapped, could be maintained as part of the Town system for handicapped. This parcel is a special park for the handicapped and the Town of Islip has a program to work with the handicapped in various park areas. Even though this park can be managed by the Town, it should continue to be open to all handicapped in Suffolk County. Also, one of the smallest holdings, the 0.1 acre Awixa Creek (Parcel IS18) should be managed by the Town.

There are a number of areas where there is duplication of Town and County facilities. In some of these cases, agreements with towns to maintain nearby County land will probably improve the overall management. The County holdings at Lake Ronkonkoma are a good example of a possible transfer. Two of the towns bordering the Lake, Brookhaven and Islip, have their own beaches. County lands could be turned over to these two Towns. This could also include Raynor Park in the Town of Brookhaven. The Town of Smithtown could manage the park parcel developed by the County since Smithtown did not have any waterfront recreational facilities on the Lake. The large drainage area into the Lake should continue to be managed by the County since this watershed area can have an effect on the quality of the entire Lake.

The Lake Ronkonkoma holdings of the County, which are listed as Parcels SM04, BR11 and IS07, contain a total of 204.8 acres. Portions of these holdings that could be used for active recreation would be managed better by the three respective Towns in that area.

Parcel SH11, the Old Squires Road Nature Preserve, contains 18.9 acres that are totally surrounded by Town lands and should be managed by the Town. The East Quogue watershed (Parcel SH25), which now contains 19.8 acres on three old filed maps, should eventually be managed by the Town since the Town has other holdings in the area that were obtained through cluster development.

Management by The Nature Conservancy should be considered for Parcel RH04, the Wading River wetland preserve. This 0.8 acre parcel is surrounded by other lands managed by The Nature Conservancy. The Nature Conservancy also can manage parts of Robert Cushman Murphy park where there are already Conservancy holdings. There is also some joint State management in this park. Finally, Parcel SH01, the 23.4 acre Clam Island Nature Preserve, could be managed best by the Federal government in conjunction with the adjacent Elizabeth Morton National Wildlife Preserve.

– Adopt-a-Park

The concept of adopt-a-park can be applied to a few of the smaller County holdings that could benefit from use by a local school, environmental group, or civic association. Examples include Parcel BR12, the Lake Panamoka Nature Preserve and Parcel BR35, Sweezeytown Nature Preserve of 11.3 acres. Maintenance of Parcel BR25, the Shady Lane Nature Preserve, could be managed by the Suffolk County Water Authority, since this 7.8 acre holding is adjacent to a well field.

In the Town of Huntington, Parcel HU6, the 8.7 acre Park Avenue Nature Preserve, is a good candidate for adopt-a-park. The same is true of the Bishop's tract, Parcel IS01, a 37.8 acre property in Islip Town.

– Exchanges

Some properties are suitable to be an exchanged for land which would be more acceptable for certain park activities, or a piece that could be properly managed. This includes Parcel BR17, the Miller Place/Yaphank Road Nature Preserve. Exchanges are possible also in the Town of Smithtown. Parcel SM10, the Thatch Pond Park of 11.2 acres should be exchanged with the Town since the property would be managed better as part of the Town's Landing Avenue Park. The same situation exists in the Town of Southold by the Deep Hole Creek (SD02) and Inlet Pond Park (SD05). An exchange of approximately 9.9 acres would give the Deep Hole Creek property to the Town for management and exchange a Town piece adjacent to Inlet Point to allow development and maintenance by the County.

– Sale

There are some parcels that are contained in the County Nature Preserve inventory that are now either isolated from other public holdings or are totally surrounded by private development. These properties should be sold and the funds received applied to new acquisitions in the area. Even though this requires a special referendum and an act of the NYS Legislature, it would relieve the County of further maintenance problems. The best examples for sale are the following Brookhaven Town parcels:

Parcel BR08, a 3.5 acre part of the Gordon Heights Nature Preserve, is isolated from the main open space and should be sold.

The same is true also of the following parcels:

Parcel BR45, the 3.6 acre Freeman Lane Nature Preserve; Parcel BR50, the 0.4 acre Whiskey Road Nature Preserve; Parcel BR52, the 0.9 acre Shoreham Nature Preserve; Parcel BR55, the 2.0 acre Manorville Vistas Nature Preserve; and Parcel BR60, the 0.5 acre Manor Parkway Nature Preserve.

Parks Master Plans

Volume 3 of this report provides guidelines for park development, and general use recommendations are also made in Volume 3. These items should lead to a series of master plans for each of the major parks in the County. Some master plans were done some years ago, such as the plan for Blydenburgh Park. Others like Montauk County park are being reviewed at the present time. The following is a list of major parks that should have a master plan developed over the next decade:

- Cathedral Pines - Middle Island
- Smith Point - Mastic Beach
- Southaven - Yaphank
- Cedar Point - Northwest
- West Hills - Melville
- Indian Island - Riverhead
- Sears-Bellows - Hampton Bays
- Robert Cushman Murphy - Calverton
- Suffolk Hills - Manorville

- Terrells River - Center Moriches
- Berkley Jackson - Elwood
- Bohemia Equestrian Center - Bohemia
- Hubbard - Flanders
- Shinnecock East

In order to prepare the plan, it is necessary to assemble a working group of County departments, recreation users and neighborhood groups. Funding support will be needed for technical assistance. From past experience, it is necessary for the Park Trustees to have an important role in determining the contents of the master plan. This should be done by having the Trustees either participate in the process directly or be informed on a regular basis. Following Park Trustees authorization, the legislature then should be requested to support whatever capital programs will be needed to implement the plan.

In addition to the large parks, many of the smaller nature preserve holdings would benefit from an interpretive master plan that would allow more nature study. Accessibility by local trails would open up an opportunity for neighbors and environmental groups in the community to have a more active role in the County park system.

Coordination and Implementation

COORDINATION AND IMPLEMENTATION

- The primary role of the Department of Parks, Recreation and Conservation is the management of the system. The Parks Department supervises its own employees and contractors; staff is needed to recommend capital improvements in all of the facilities. The Department is also required to coordinate all planning for park development. Parks personnel also should play a role in the recommendations for parkland acquisitions.
- The Park Trustees, as an advisory board to the Parks Department, are responsible for recommendations to the County Legislature of any acquisitions and policies and programs that affect the park system. They should have a role in recommendations for consolidations or other management agreements that will make the park system more efficient and they should participate in the development and approval of master plans for the parks slated for improvement. The management agreements can be with private contractors, other units of government, local environmental, educational, or civic groups.
- The Planning Department should be responsible for the maintenance of all maps and statistics relating to the Open Space Program. The Planning Commission is responsible for reviewing the capital program, making recommendations on new parkland additions and participating in overall and individual plans for park development. They should also be responsible for coordinating information about state, town, village and The Nature Conservancy holdings to determine how they fit in with an overall Open Space Program.
- Through the Council on Environmental Quality, recommendations are made concerning capital programs, properties to be placed in the Historic Trust and Nature Preserve designations (see Appendix G for Nature Preserve Handbook). All of these activities should be done now in conjunction with the overall policy plan.
- The County Executive and the County Legislature have a role in park planning and development by recommending acquisition funding or capital improvement funds in order to implement the plans for various parks. They also would have to adopt legislation leading to management changes, exchange of land and sale of usable property. The Parks Committee of the legislature should participate in the development of the various comprehensive plans that will be needed so that they will be in a position to recommend the needed capital improvements after plans are approved by the Parks Trustees.

- The Department of Law will be required to prepare legislation for sale or exchange of open space parcels that are poorly located and could be future management problems. The Division of Real Estate has the key role in doing appraisals and negotiations on any of the properties that are approved by the legislature for acquisition, exchange or sale.
- A Leisure Services Advisory Council has been established to help the Parks Department with communization and management issues. This council is made up of volunteers representing different kinds of parks' users. The members would review and make suggestions regarding new programs and proposals for the park system; would encourage user groups with conflicting interests to communicate and resolve problems; would develop new ideas for the delivery of leisure services.
- The Friends for Long Island's Heritage has developed a close working relationship with the Parks Department assisting them in the management of Historic Trust properties. This beneficial assistance from the Friends has resulted in the clean-up, proper management, tenancy, reduction in maintenance lost and overall enjoyment of an increasing number and variety of County owned historic properties. This relationship should be fostered for the benefit of historic preservation and public education and enjoyment of this properties

APPENDIX A

Definitions

APPENDIX A Definitions

NATURE PRESERVE AND HISTORIC TRUST DEFINITIONS

Provisions for establishing the Suffolk County Nature Preserve and Historic Trust were enacted in 1970 with passage of the Environmental Bill of Rights, Article 1 of the Suffolk County Charter, which calls for the dedication of properties that are determined to have either unique and sensitive natural values or distinctive historical significance.

The Council on Environmental Quality prepared a *Nature Preserve Handbook and Historic Trust Manual* which explain the concepts and purposes of each type of dedication, and contained recommendation.

Dedication of properties to the Nature Preserve and Historic Trust is accomplished through resolutions adopted by the County Legislature. The resolution of dedication shall specify the purpose of purposes for which the property may be used. To date no actual dedications have been made to either the Nature Preserve or Historic Trust.

Nature Preserve -- A nature preserve can be defined as:

any area of land or water in public or private ownership which is formally dedicated to being maintained as nearly as possible in its natural condition; which area either retains, to some degree, its primeval character (though it need not be completely natural and undisturbed at the time of its dedication) or has unusual flora, fauna, geological features of scientific or educational value, and which area is used in a manner and under limitations consistent with its continued preservation, without impairment, disturbance or artificial development, for the public purposes of scientific research, education, aesthetic enjoyment and providing habitat for plant and animal species and communities and other natural objects.

Nature preserve sites may vary greatly in their size and characteristics. Some sites may be very small, while others may be very large in acreage. Some may encompass unique or unusual features, whereas others may be very typical and common on Long Island. However, all sites are areas which should be relatively undisturbed and ecologically intact.

For consideration as a possible nature preserve, a site must possess one or more of the following criteria:

- prime watershed area
- prime wildlife areas
- prime ecological sites
- freshwater wetlands
- tidal wetlands
- landward edge of streams, freshwater wetlands, tidal marsh, ponds, lakes and all surface waters
- undeveloped areas of high water table
- endangered species habitats
- "protected plants"
- unique or rare vegetation
- undeveloped area of the barrier island including foredune, primary dune, seaward face of secondary dune
- bluffs
- slopes greater than 25% within 300' of water's edge
- beach
- kettle holes
- buffer zones for prime ecological site
- eskers
- major swales

Initial study of the various open space areas within the County reveals a list of locations which adhere to the nature preserve criteria and should be given further consideration as potential nature preserve sites.

Historic Trust -- The definition of *distinctive historical significance* of the Suffolk County Charter is established by:

- the *National Register of Historic Places*, National Park Service, United States Department of Interior, as authorized under the Federal Historic Preservation Act of 1966.
- the National Trust for Historic Preservation as set forth in *Historic Preservation Tomorrow -- Revised Principles and Guidelines*, National Trust for Historic Preservation and Colonial Williamsburg, 1976.

The Historic Trust concerns itself with all aspects of the preservation of all historic buildings, fences, street furniture, trees (including lopped-trees), kettleholes, roads, roadsides, boundary ditches, and historic landmarks including but not limited to: residences and out buildings; commercial and industrial structures and areas; farm buildings; accessory buildings; engineering works -- including trestles, bridges, towers, canals, piers, dry docks, wharfs, waterworks, etc.; lighthouses; government buildings; railroad stations and other railroad facilities; educational buildings -- including schools and academies; abandoned religious structures; fortifications and ramparts; Indian fields and village sites; cemeteries and village greens; archeological sites; -- and their environments.

The Suffolk County Department of Parks, Recreation and Conservation and its Board of Trustees should, in the Historic Trust with custodianship for each property to be decided individually. In most cases, the Department of Parks will also have custodianship, but it is possible that a particular property, or even an item, may be entrusted to the custodianship of another, e.g., another County department or even a local historical society. In the case of roads or highways dedicated, the Department of Public Works normally would be the logical steward, except that the Manager of the Historic Trust should be supervising such a road's integrity.

APPENDIX B

Guide to Interpreting

Historic Trust Landmarks Survey

APPENDIX B

GUIDE TO INTERPRETING HISTORIC TRUST LANDMARKS SURVEY

PROPERTY NAME -- Name used to properly identify structure and parkland, golf course or facility where landmark is located.

Example - NAME OF PARKLAND

1. Bldg. # and name of landmark (date landmark built)

* - Indicates landmark is not presently open to the public.

ACQUIRED -- Year landmark structure was acquired by the County of Suffolk.

NEEDS CODE

- 1 Highest -- Immediate action necessary
- 2 High -- Action within four years
- 3 Moderate -- Action may be delayed
- 4 Low -- Routine maintenance only
- 5 Lowest -- Significance/Threats not primary

USE CODE

- A** Adaptive Reuse
- I** Interpretive/Museum
- L** Landmark Preserve
- N** No use plan developed
- R** Period Restoration

PRIORITY -- Importance of structure and proposed use plan in relationship to other Historic Trust landmarks.

Example - **IA** = Highest needs as adaptive reuse structure.

CONDITION - Condition of structure at present time.

ESTIMATE - Cost estimate for repairs as capital project in 1988 dollars.

SPENT TO DATE - Funds expended by Suffolk County through Capital Program to date.

TIME FRAME - Target completion time of proposed capital project.

COMMENTS - Other information as necessary. (National Register status allows for participation in 50% matching Federal and State grant programs.)

APPENDIX D

Suffolk County Department of Parks, Recreation and Conservation Outer Beach Use

Appendix D
**SUFFOLK COUNTY DEPARTMENT OF PARKS, RECREATION &
CONSERVATION**
Outer Beach Use

SUFFOLK COUNTY PARKS OUTER BEACH LOCATIONS:

Smith Point County Park
William Floyd Pkwy., Shirley, NY
281-6555

Cedar Point County Park
Alewife Brook Road, East Hampton, NY
324-2195 (**No Overnight Beach Camping**)

Shinnecock East County Park
Dune Road (East side of Shinnecock Inlet)
Southampton, NY
287-1246

Montauk County Park
East Lake Drive
Montauk, NY
668-5022 or 668-5111

RULES & REGULATIONS

- Persons applying for a RECREATIONAL VEHICLE USE PERMIT must have a valid SUFFOLK COUNTY PARK GREEN KEY CARD.
- Vehicles must have a valid RECREATIONAL VEHICLE USE PERMIT to use the outer beaches under the jurisdiction of the Department of Parks.
- Permits must be affixed to driver side front bumper of the vehicle.
- RECREATIONAL VEHICLE USE PERMITS ARE ISSUED ANNUALLY TO RESIDENTS whose vehicles are licensed & insured & contain the following equipment JACK, JACK BOARD, SHOVEL, ROPE, CHAIN OR SNAP LINE, FIRE EXTINGUISHER, SPARE TIRE, TIRE GAUGE, TIRE INFLATION DEVICE & FLASHLIGHT.
- Dune Buggies, All-Terrain Vehicles, Motorcycles & Dirt Bikes are prohibited.
- Vehicles remaining on the beach over 8 hours must be self-contained....DEFINITION OF SELF-CONTAINED.... A VEHICLE OR TENT WHICH HAS A FLUSHABLE, RECIRCULATING TYPE TOILET WITH BUILT-IN TANK, A SINK WITH 5 GAL POTABLE WATER TANK AND A 5 GAL. SOILED WATER HOLDING TANK.
- 10 MPH LIMIT is enforced Memorial Day - Labor Day. Speed shall be reasonable & prudent at all other times.
- No vehicles permitted on hard-pack between surf & beach crest, from 8 a.m. to 4 p.m. on weekends & holidays from Memorial Day to Labor Day.
- Only cuts, roads, entrances & exits marked by signs, are to be used. No driving permitted on dunes, swales, vegetation or bird nesting areas.
- No person is allowed to ride outside the body of the vehicle.
- Ruts & holes caused by stuck vehicles must be filled in & debris removed.
- No dumping or burning of trash is permitted. Garbage & litter are to be put in receptacles at entrances of Outer Beach.
- Access across protected swimming beaches permitted ONLY if a right-of-way is marked with appropriate signs.
- RECREATIONAL VEHICLE USE PERMITS MAY BE REVOKED IF Rules & regulations are violated.
- Operators or vehicles with the water on their right, have the right-of-way at all times.
- Camping is permitted on the Outer Beaches by Suffolk County residents holding a valid RECREATIONAL Vehicles USE PERMIT, and by their accompanied. non-resident guest. Trailers are prohibited at Smith Point and tents are prohibited at Shinnecock East.
- Vehicles towing a trailer onto the beach must stay with the trailer and may not be used to tow other trailers onto the beach.
- Each trailer on the beach must have its own tow vehicle with it.
- A vehicle may unhitch and leave for short periods of time, but must remain with the trailer especially during nighttime hours.
- Camping vehicles must be self-contained.
- Camping is limited to 3 consecutive days per stay, 4 days on holiday weekends. At least 48 hours must elapse before a camper may return to the same park

- Only established DUMP STATIONS are to be used.
- Tent camping is permitted as long as the tent meets all self-contained criteria.
- Owners of self-contained vehicles may erect a tent shelter, providing it is an integral part of the vehicle and the vehicle does not leave the area as long as the shelter is up (EXCEPT SHINNECOCK EAST).
- Boaters may come ashore to camp. Boats must be beached or anchored near the area used for camping. All trash must be removed before leaving (SMITH POINT ONLY). All other park camping rules & regulations apply.
- ALCOHOLIC BEVERAGES are PROHIBITED in Suffolk County Parks.
- The Parks Department may close any outer beach for safety reasons without prior notice.

EMERGENCY & SAFETY INFORMATION

- REPORT EMERGENCIES to Coast Guard or Park Rangers via CB Radio-CH9 (using proper call signs).
- A VEHICLE STUCK in the sand can be removed by using a SNAP LINE, which works on *spring* principle. Connect the snap line to secure part of the vehicle, accelerate the rescue vehicle slowly until snap line becomes taut (the line should stretch almost $\frac{1}{3}$ its length), at which time it should *spring* the stuck vehicle free. The vehicle that is stuck should continue efforts to move while being pulled. DO NOT USE A CHAIN OR CABLE FOR THIS METHOD OF FREEING A VEHICLE
- RECOMMENDED TIRE PRESSURE ranges from 12 to 16 lbs., but may vary depending on size & type of vehicle, sand conditions and tire size.

For Current Fees And Operating Dates, Check With Park Office Of The Parks Administration Office At 567-1700.

ROBERT J. GAFFNEY
SUFFOLK COUNTY EXECUTIVE

EDWARD E. WANKEL
COMMISSONER

APPENDIX E

Nature Conservancy Obligations,

Activities, and Management Actions

APPENDIX E

NATURE CONSERVANCY Obligations, Activities, and Management Actions

- To protect the globally rare coastal plain pond shore habitat and associated plant and animal species found on the premises and to manage the preserve as an area of critical ecological importance, open only to non-consumptive passive recreational uses as described below.
- To design, create, and maintain a trail system open to hiking, bird watching, nature study, and other nonconsumptive and non-damaging forms of passive recreation.
- To post appropriate preserve placards, signs or other markings designed to educate the public and protect the significant natural features of the premises.
- To work with the Commissioner of Parks, Recreation, and Conservation to prohibit the use of horses, boats, mountain bikes, and motorized vehicles on the premises.
- To keep general public access and use of the wetland margins to a level that does not damage or threaten the continued existence of the pond shore habitats and their plants and animals.
- To monitor the status and viability of various plant and animal populations and natural communities and to make other scientific and educational studies and observations of plant and animal populations and natural communities.
- To monitor water quality and depth as necessary to determine and implement appropriate habitat management to ensure the perpetuation of the significant natural elements of the premises, with a particular emphasis on maintaining or simulating the natural fluctuation of water levels and to prevent siltation and abnormally high nutrient-loading in the wetlands.
- To work with the Commissioner of Parks, Recreation, and conservation to address long-term succession processes on endangered species and habitats.
- To remove invasive native and non-native plants and animals to maintain the endangered coastal plain pond shore community.
- To continue biological inventory work in cooperation with the County and the New York Natural Heritage Inventory.
- To publish an interpretive guide to the premises and to lead periodic nature walks and lectures.

APPENDIX F

Rare and Endanged Species

Ranking Index

Appendix F

Rare and Endangered Species Ranking Index

An inventory of endangered, threatened, special concern, and rare species and habitats was prepared utilizing data collected by the New York State Department of Environmental Conservation and the Nature Conservancy for the NYS Natural Heritage Program. The inventory cataloged those species and habitats native to New York which should be preserved in order to maintain the highest quality examples of the State's natural communities. It concentrates on plant and animal species considered rare, threatened, or endangered, plus terrestrial and aquatic habitats and other unique natural habitat features. It is important to note, however, that this data collection is ongoing and should not be considered a complete compilation of all habitat information for the areas inventoried.

The following table provides an explanation of the New York State legal status of the animals and plants listed in the section entitled: Physical/Environmental Characteristics - Known Protected or Endangered Species of the Suffolk County Park Evaluation Forms.

Please be advised that this information is not for public distribution. Release of this data is regulated by NYSDEC and The Nature Conservancy.

EXPLANATION OF HERITAGE STATE AND GLOBAL RANKS

Each element has a global and state rank. The global rank reflects the rarity of the element throughout the world and the state rank reflects the rarity within New York State. Intraspecific taxa are also assigned a taxon rank to reflect the intraspecific taxon's rank throughout the world.

GLOBAL RANK:

G1 = Critically imperiled globally because of extreme rarity (5 or fewer occurrences), or very few remaining acres, or miles of stream) or especially vulnerable to extinction because of some factor of its biology.

G2 = Imperiled globally because of rarity (6 - 20 occurrences, or few remaining acres, or miles of stream) or very vulnerable to extinction throughout its range because of other factors.

G3 = Either rare and local throughout its range (21 to 100 occurrences), or found locally (even abundantly at some of its locations) in a restricted range (e.g. a physiographic region), or vulnerable to extinction throughout its range because of other factors.

G4 = Apparently secure globally, though it may be quite rare in parts of its range, especially at the periphery.

G5 = Demonstrably secure globally, though it may be quite rare in parts of its range, especially at the periphery.

GH =Historically known, with the expectation that it might be rediscovered.

GX =Species believed to be extinct.

GU =Status unknown.

STATE RANK:

S1 =Typically 5 or fewer occurrences, very few remaining individuals, acres, or miles of stream, or some factor of its biology making it especially vulnerable in New York State.

S2 =Typically 6 to 20 occurrences, few remaining individuals, acres, or miles of stream, or factors demonstrably making it very vulnerable in New York State.

S3 =Typically 21 to 100 occurrences, limited acreage, or miles of stream in New York State.

S4 =Apparently secure in New York State.

S5 =Demonstrably secure in New York State.

SH =Historically known from New York State, but not seen in the past 15 years.

SX =Apparently extirpated from New York State.

SE =Exotic, not native to New York State.

SR =State report only, no verified specimens known from New York State.

SU =Status unknown.

TAXON RANK: The T-ranks are defined the same way the Global ranks are but the T-rank only refers to the rarity of the subspecific taxon of the species as a whole.

Q = indicates a question exists whether or not the taxon is a good taxonomic entity.

? = indicates a question exists about the rank.

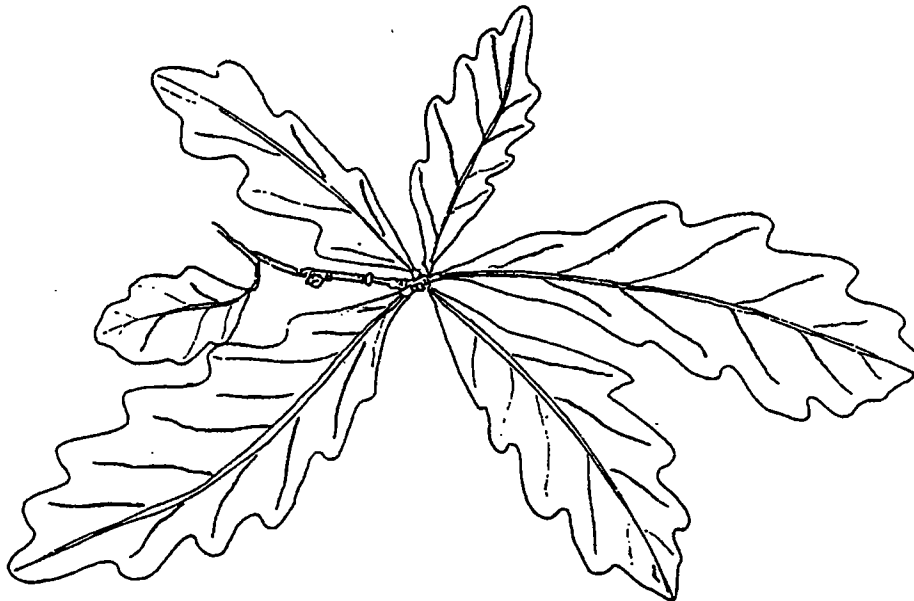

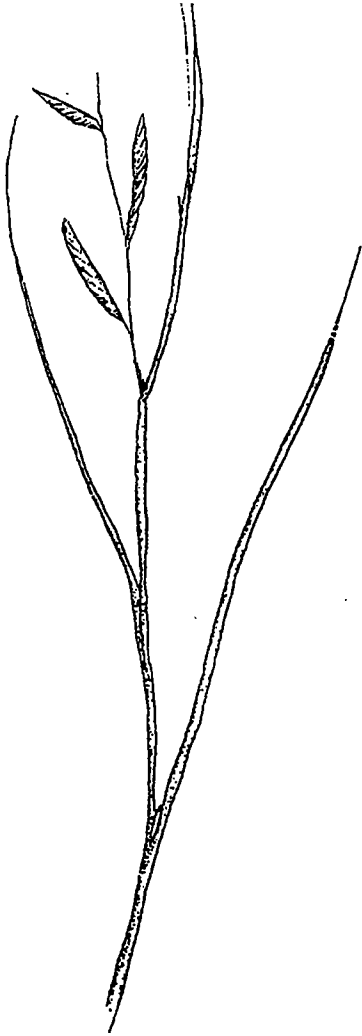

APPENDIX G

Nature Preserve Handbook

APPENDIX G

SUFFOLK COUNTY

NATURE PRESERVE HANDBOOK

Department of Parks, Recreation and Conservation

FOREWORD

Suffolk County has the good fortune of being blessed with a diversity and richness of natural environments and resources. Fringing the County's several hundred mile long coastline are numerous beaches, used by thousands of bathers annually, and thousands of acres of bays and tidal wetlands which serve as critical habitat for a large number of birds, mammals, and shell and finfish species. The interior is dotted with hundreds of freshwater streams, ponds, lakes, and other wetland systems which lie above, and often recharge into, one of the nation's most important groundwater resources. Virtually all of the County's original forests and plant communities remain intact, each with its own association of representative plant and animal species.

Over the years, Suffolk County residents have become increasingly interested in enjoying the resources and features which collectively make up the County's natural environment. Resultantly, they have turned, in ever greater numbers, to publicly owned lands to fulfill their diverse recreational interests. The Suffolk County parkland system, administered by the Department of Parks, Recreation, and Conservation has played a leading role in meeting these recreational demands.

Recognizing the special qualities of the County's natural environment and the interest of residents in enjoying the resources of the environment, Suffolk County government enacted Section 110 of Article I of the Suffolk County Charter which states: ... *the County may dedicate properties it owns to the County Nature Preserve to be established in implementation of this article.* Furthermore, Section 105 directs: *the Council on Environmental Quality shall make recommendations to the County Legislature and the County Executive as to what County owned properties should be dedicated to the County Nature Preserve and those properties not owned by the County but considered necessary acquisitions should be acquired for the purpose of dedication.* This handbook serves to clarify and interpret this legislation.

This handbook, subject to modification as the need arises, contains an explanation of the Nature Preserve concept, purposes accomplished by preserve designation, criteria for designation of a parcel to the Suffolk County Nature Preserve, the process and procedures for designating same, general use and management guidelines for the Nature Preserve, and the roles and responsibilities of various County agencies in the implementation and administration of the County Nature Preserve.

Lastly, this handbook is a guide to be used by the County Legislature and the County Executive when making decisions about the Nature Preserve.

DEFINITION OF NATURE PRESERVE

The Suffolk County Charter provides for establishment of a County Nature Preserve. The Suffolk County Charter intends that properties dedicated to the Suffolk County Nature Preserve will be managed in the most ecologically sensitive manner possible. Properties dedicated to the County Nature Preserve may be any natural area that possesses *natural beauty, estuarine values, including wetlands and shorelines, or (properties of) ecological significance.* This is the operative definition of properties contained within the Suffolk County Nature Preserve:

any area of land or water owned by the County of Suffolk which is formally dedicated to being maintained as nearly as possible in its natural condition; which area either retains, to some degree, its primeval character (though it need not be completely natural and undisturbed at the time of its dedication) or has unusual flora, fauna, geological, or archaeological features of scientific or educational value and which area is used in a manner and under limitations consistent with its continued preservation, without impairment, disturbance or artificial development, for the public purposes of scientific research, watershed preservation, aquifer protection, education, aesthetic enjoyment and providing habitat for plant and animal species and communities and other natural objectives.

Suffolk County's nature preserves can and should be viewed as the most protected end of the spectrum of Suffolk's land use categories. This handbook focuses solely on issues relating to the Suffolk County Nature Preserve.

PURPOSES

Nature preserves are established to accomplish a variety of purposes ranging from natural resource protection to meeting human needs for exploring wild, untrammelled places to providing areas for scientific research. Following is a list of specific purposes of the Nature Preserve:

- To preserve endangered, unique, vulnerable, or representative biological, ecological, or hydro-geological resources found within Suffolk County.
- To provide settings where people can, through passive recreational activities, experience nature in its undisturbed state.
- To provide settings conducive to the development and implementation of environmental and natural history related educational programs.
- To provide outdoor *laboratories* for biological, ecological, geological, and environmental research.
- To safeguard natural features and resources that are vulnerable to human disturbance.

PRESERVE DESIGNATION CRITERIA

Based on these intended purposes, a set of specific criteria regarding preserve designation can be established. The character and size of preserves will, by necessity, vary depending on the feature or resource they were designated to protect. In terms of size, some sites might be quite small encompassing but a fraction of an existing county park or county owned property, while others may be significantly larger. To be proposed to the County Nature Preserve, a site must meet at least one of the following criteria:

- It serves as habitat for endangered, threatened, or special concern species as listed in NYS Environmental Conservation Law, Section 110535 (see Appendix 1).
- It contains habitat that supports occurrences of rare plant or animal species or communities as identified by the New York Natural Heritage Program.
- It contains habitat that serves as breeding, feeding, or resting sites for significant concentrations or populations of wildlife.
- It contains fresh or saltwater wetlands.
- It possesses tree specimens listed on the state or national tree site records list or significant populations of protected plants as defined in NYS Environmental Conservation Law, Section 9-1503 (see Appendix 2).
- It contains exemplary examples of forests, communities, or ecosystems that are or were once common on Long Island.
- It has geological features vulnerable to human disturbance such as cliffs, bluffs, steep slopes, or dunes or which are prime examples of interesting geological processes, events; or periods such as kettleholes, kames, eskers, or outwash stream channels.
- It is particularly suited to, and appropriate for, environmental education programs or academic research programs.
- It provides an essential buffer to lands in the nature preserve so dedicated based on the previous criteria.
- It protects watershed area critical to recharging precipitation into our sole source aquifer or maintaining surface water quality.

MANAGEMENT AND USE POLICIES

This section presents some broad management and use policies for properties in the County Nature Preserve. The Division of Natural Resource Management, Suffolk County Department of Parks, Recreation, and Conservation will be primarily responsible for carrying out the management policies and recommendations contained in the Nature Preserve Handbook.

Since these sites have been designated because they contain examples of unique endangered, vulnerable, or sensitive resources or features, the number of uses typically permitted will be fewer and the type less impactful than those activities associated with lands designated for general park use which lack these constraints.

Passive uses and activities such as interpretive nature hikes, educational tours, photography, bird watching, nature observation and appreciation, and scientific research are, for example, generally compatible. In contrast, more intensive activities such as hunting, fishing, boating, and horseback riding are usually incompatible with the goals of nature preserve management. Outside of designated parking areas, authorized access roads, or support facilities, visitor use of Nature Preserve system is motorized vehicles within the County prohibited. Uses that require land clearing such as the establishment of recreational fields will be prohibited, specifically excepting support facilities and management activities required to perpetuate a feature for which the preserve was designated.

Strong emphasis will be given to passive activities in preserve sites. In determining whether or not more active uses are appropriate, consideration will be given to the following criteria:

- The historical use of the preserve site.
- Whether or not an alternative, more environmentally compatible site exists.
- The likely duration of the impact on the preserve site.
- The extent to which impacts can be mitigated.

Specific permitted and nonpermitted activities will be developed for each site subject to the criteria and guidelines of this handbook. Subsequent to the dedication of lands into the Nature Preserve a Site Survey and Management Report (SSMR) will be written by or under the supervision of the Division of Natural Resource Management and enacted subject to written comments the Suffolk County Department of Planning and the Suffolk County Office of Ecology and final approval by the Council on Environmental Quality. Activities that are allowed will be based on a consideration of factors that includes historical use and the inherent ecological, biological, and geological constraints of the preserve site.

Public use of nature preserves will be limited as to the number of visitors or time of year. Visitation frequency, duration, and access may be controlled through a permit and guide system in that visitors or groups who wish to use nature preserves may be required to obtain a permit, and at the discretion of the Parks Department, a guide to lead the trip. Access into nature preserves will be restricted to specific designated ingress and egress points. Signs delineating nature preserve boundaries may be erected and fencing and natural barriers (such as catbriar or raspberry thickets) may be used. Movement within the preserve should be restricted to approved trails and boardwalks except for those engaged in scientific research. Patrols by park personnel will be conducted periodically.

Minimal acreage in a nature preserve may be designated for new support facilities provided they do not significantly impact any unique features or resources. Not more than 4,356 square feet or up to 2%, whichever is less of any nature preserve that is 5 acres or less in size and not more than 43,560 square feet or up to 1%, whichever is less of any nature preserve that is larger than 5 acres but less than 100 acres in size may be utilized for new support facilities.

For nature preserves larger than 100 acres, not more than 100,000 square feet of land may be utilized for new support facilities. Support facilities shall mean to include nature centers and accompanying parking facilities, boardwalks, footbridges, trails, observation blinds and towers, and kiosks. Any such new support facilities will have to undergo environmental review pursuant to Chapter 279 of the Suffolk County Administrative Code before being constructed.

SITE EVALUATION AND DEDICATION

Dedication is the process whereby certain natural areas acquired by Suffolk County can be assigned to the Nature Preserve. The following is an explanation of the dedication process and procedures.

Natural areas that are not presently dedicated and are candidates to the Preserve system will be evaluated for inclusion in the Nature Preserve by first determining that the property in question meets one or more of the criteria listed on pages 4 and 5 of this handbook.

Suffolk County's Department of Parks, Division of Natural Resource Management, or the Department of Planning, Office of Ecology, Department of Real Estate, or Council on Environmental Quality may utilize the criteria contained within this handbook to make a written recommendation to the County Executive and the County Legislature that properties should be dedicated as part of the Nature Preserve. The Suffolk County Legislature may then act upon these recommendations to enable the site to be dedicated pursuant to Section 110 (a) of Article 1 of the Suffolk County Charter which specifies the Legislature *by resolution may dedicate properties it owns to the County Nature Preserve*. In addition, the Legislature may act independently to dedicate properties to the County Nature Preserve. Similarly, either the Suffolk County Park Trustees, the Commissioner of Parks, or the County Executive may on an interim basis, establish policy that will cause appropriate county owned properties to be managed by the Division of Natural Resource Management as part of the Suffolk County Nature Preserve.

Upon Legislative approval of a resolution dedicating property to the Suffolk County Nature Preserve, the property is under the jurisdiction of the Division of Natural Resource Management of the Suffolk County Department of Parks.

WILDLIFE LISTED UNDER THE NEW YORK STATE ENVIRONMENTAL CONSERVATION LAW AS:

ENDANGERED SPECIES		THREATENED SPECIES	
Mollusk		Fish	
**Chittenango Ovate Amber Snail	<i>Succinea chittenangoensis</i>	Lake Sturgeon	<i>Acipenser fulvescens</i>
Insect		Mooneys	<i>Hiodon tergisus</i>
Karner Blue Butterfly	<i>Lycaides melissa</i>	Lake Chusucke	<i>Erimyzon sucetta</i>
Fish		Mud Sunfish	<i>Acantharchus pomotis</i>
Shortnose Sturgeon	<i>Acipenser brevirostrum</i>	Longear Sunfish	<i>Lepomis megalotis</i>
Longjaw Cisco	<i>Coregonus alpenae</i>	Amphibian	
Round Whitefish	<i>Prosopium cylindraceum</i>	Cricket, Frog	<i>Acris crepitans</i>
Pugnose Shiner	<i>Notropis anogenus</i>	Reptiles	
Eastern Sand Darter	<i>Ammocrypta pellucida</i>	Mud Turtle	<i>Kinostemon subrubrum</i>
Bluebreast Darter	<i>Etheostoma caeruleum</i>	Blanding's Turtle	<i>Emydoidea blandingi</i>
Gilt Darter	<i>Percina eides</i>	**Loggerhead Sea Turtle	<i>Caretta caretta</i>
Blue Pike	<i>Stizostedion vitreum glaucum</i>	**Green Sea Turtle	<i>Chelonia mydas</i>
Spoonhead Sculpin	<i>Cottus bairdi</i>	Timber Rattlesnake	<i>Crotalus horridus</i>
Deepwater Sculpin	<i>Myoxocephalus thompsoni</i>	Birds	
Amphibian		Osprey	<i>Pandion haliaetus</i>
Tiger Salamander	<i>Ambystoma tigrinum</i>	Red-shouldered Hawk	<i>Buteo lineatus</i>
Reptiles		Northern Harrier	<i>Circus cyaneus</i>
Bog Turtle	<i>Clemmys muhlenbergi</i>	Spruce Grouse	<i>Dendragapus canadensis</i>
*Leatherback Sea Turtle	<i>Dermochelys coriacea</i>	Piping Plover	<i>Charadrius melodus</i>
Hawksbill Sea Turtle	<i>Eretmochelys imbricata</i>	Common Tern	<i>Sterna hirundo</i>
Atlantic Ridley Sea Turtle	<i>Lepidochelys kempi</i>	Mammal	
Massasauga Rattlesnake	<i>Sistrurus catenatus</i>	Eastern Woodrat	<i>Neotoma floridana</i>
Birds		SPECIAL CONCERN SPECIES	
Golden Eagle	<i>Aquila chrysaetos</i>	Fish	
Bald Eagle	<i>Haliaeetus leucocephalus</i>	Silver Chub	<i>Hybopsis storenana</i>
Peregrine Falcon	<i>Falco peregrinus</i>	Gravel Chub	<i>Hybopsis x-punctata</i>
Eskimo Curlew	<i>Numenius borealis</i>	Blackchin Shiner	<i>Notropis heterodon</i>
Least Tern	<i>Sterna albitrons</i>	Black Redhorse	<i>Moxostoma duquesnei</i>
Roseate Tern	<i>Sterna dougallii</i>	Longhead Darter	<i>Percina macrocephala</i>
Loggerhead Shrike	<i>Lanius ludovicianus</i>	Amphibians	
Mammals		Southern Leopard Frog	<i>Rana sphenoccephala</i>
Indiana Bat	<i>Myotis sodalis</i>	Hellbender	<i>Cryptobranchus alleganiensis</i>
Sperm Whale	<i>Physeter catodon</i>	Jefferson Salamander	<i>Ambystoma jeffersonianum</i>
Sei Whale	<i>Balaenoptera borealis</i>	Blue-spotted Salamander	<i>Ambystoma laterale</i>
Blue Whale	<i>Balaenoptera musculus</i>	Spotted Salamander	<i>Ambystoma maculatum</i>
Finback Whale	<i>Balaenoptera physalus</i>	Reptiles	
Humpback Whale	<i>Megaptera novaeangliae</i>	Spotted Turtle	<i>Clemmys guttata</i>
Right Whale	<i>Balaena glacialis</i>	Wood Turtle	<i>Clemmys insculpta</i>
Gray Wolf	<i>Canis lupus</i>	Diamondback Terrapin	<i>Malaclemys terrapin</i>
Cougar	<i>Felis concolor</i>	VWorm Snake	<i>Carphophis amoenus</i>
		Eastern Hognose Snake	<i>Heterodon platyrhinos</i>
		Birds	
		Common Loon	<i>Gavia immer</i>
		Least Bittern	<i>Ixobrychus exilis</i>
		Coopers Hawk	<i>Accipiter cooperi</i>
		Black Rail	<i>Laterallus jamaicensis</i>
		Upland Sandpiper	<i>Bartramia longicauda</i>
		Black Tern	<i>Chlidonias niger</i>
		Common Barn-Owl	<i>Tyto alba</i>
		Short-eared Owl	<i>Asio flammeus</i>
		Common Nighthawk	<i>Chordeiles minor</i>
		Common Raven	<i>Corvus corax</i>
		Sage Wren	<i>Cistothorus platensis</i>
		Eastern Bluebird	<i>Sialia sialis</i>
		Henslow's Sparrow	<i>Ammodramus henslowii</i>
		Grasshopper Sparrow	<i>Ammodramus savannarum</i>
		Vesper Sparrow	<i>Poocetes gramineus</i>
		Mammals	
		Small-footed Bat	<i>Myotis leibii</i>
		New England Cottontail	<i>Sylvilagus transitionalis</i>

* Indicates that the species is currently listed as "endangered" by the U S Department of the Interior

* **Indicates that the species is currently listed as "threatened" by the U S Department of the Interior

Intro. Res. No. 1463-87

Laid on. Table 4/29/87

Introduced by Legislators Englebright, Romaine, O'Donohoe, Blydenburgh, Bullock

RESOLUTION NO. 722 - 1987, ADOPTING LOCAL LAW
NO. YEAR 1987, A CHARTER LAW AMENDING
ARTICLE I OF THE SUFFOLK COUNTY CHARTER IN
CONNECTION WITH THE SUFFOLK COUNTY NATURE
PRESERVE

WHEREAS, there was duly presented and introduced to this County Legislature at a regular meeting held on , 1987, a proposed local law entitled, *A CHARTER LAW AMENDING ARTICLE I OF THE SUFFOLK COUNTY CHARTER IN CONNECTION WITH THE SUFFOLK COUNTY NATURE PRESERVE*, and said local law in final form is the same as when presented and introduced; now, therefore, be it

RESOLVED, that said local law be enacted in form as follows:

LOCAL LAW NO. YEAR 1987, SUFFOLK COUNTY, NEW YORK

A CHARTER LAW AMENDING ARTICLE I OF THE SUFFOLK COUNTY CHARTER IN CONNECTION WITH THE SUFFOLK COUNTY NATURE PRESERVE

BE IT ENACTED BY THE COUNTY LEGISLATURE OF THE COUNTY OF SUFFOLK as follows:

Section 1. Legislative Intent

The purpose of this legislation is to formally accept the Suffolk County Nature Preserve Handbook developed by the Suffolk County Planning Department for the use and management of properties dedicated to the County Nature Preserve.

Section 2. Adoption of Nature Preserve Handbook

S1-7 of the Suffolk County Charter is hereby amended by the addition of Paragraph E, as follows:

1.) The Suffolk Nature Preserve Handbook, copy of which is attached hereto as **Exhibit A**, is hereby approved and accepted as the official Suffolk County Nature Preserve Handbook for the purpose of explaining Nature Preserve concepts and purposes, describing the types and classes of nature preserves, establishing the process of procedures for dedicating properties to the County Nature Preserve; establishing general and specific use and management policies for said preserve, and outlining the rules and responsibilities of various County agencies in implementing and administering said preserve.

2.) Any recommendation to amend the said Nature Preserve Handbook shall first be referred to the Board of Trustees of Parks, Recreation, and Conservation for approval. If said recommendation receives such approval, then said recommendation may be adopted by charter law.

Section 3. Effective Date

This law will take effect immediately upon filing in the office of the Secretary of State.
DATED: July 14, 1987

APPROVED BY:

Acting County Executive of Suffolk County

Date of Approval: August 7, 1987

PROTECTED NATIVE PLANT

Effective September 1, 1974, no one may knowingly pick, pluck, sever, remove or carry away, without consent of the owner thereof, any protected plant. Violations of the law are punishable by fines of up to \$25 each (Environmental Conservation Law 9-1503). The following are native plants which shall be protected pursuant to the above law and state regulation (NYCRR 193.3). Such list shall apply statewide.

COMMON NAME*	SCIENTIFIC NAME	COMMON NAME*	SCIENTIFIC NAME
Green-dragon (Dragonroot)	<i>Arisaema Dracontium</i>	American Bee-balm; Oswego Tea (Indian-heads; Scarlet Bee-balm)	<i>Monarda didyma</i>
Butterfly-weed (Chigger-flower Orange Milkweed; Pleurisy-root); Bluebell-of-Scotland (Harebell)	<i>Asclepias tuberosa</i>	Bayberry (Candleberry)	<i>Myrica pensilvanica</i>
American Bittersweet (Waxwork)	<i>Campanula rotundifolia</i>	Lotus (Lotus Lily; Nelumbo Pond-nuts; Water Chinquapin; Wonkapin; Yellow Lotus)	<i>Nelumbo lutea</i>
Pipsissewa (Prince's-pine; wax-flower) Spotted Evergreen (Spotted Wintergreen)	<i>Celastrus scandens</i>	Prickly Pear (Wild Cactus; Indian Fig)	<i>Opuntia Humifusa</i> (<i>O. compressa</i> p. p.)
Flowering Dogwood	<i>Chimaphila Spp.</i>	All Native Orchids, including; Adder's-mouth (Malaxis); Are-thusa (Dragon's-mouth; Swamp-pink); Bog-candle (Scent-bottle); Calopogon (Grass-pink; Swamp-pink); Calypso (Fairy-slipper); Coral-root; Cypripedium (Lady's-slipper; Moccasin-flower; nerve root); Goodyera (Lattice-leaf; Rattlesnake-plantain); Kirtle-pink; Ladies' tresses (Pearl twist; Screw-auger); Orange-plume; Orchis; Pogonia (Beard-flower; Snake-mouth); Putty-root (Adam-and-Eve; Soldier's-plume; Three-birds; Twayplace; Whipponwill-shoe)	<i>Orchidaceae</i>
Sundew (Daily-dew; Dewthread)	<i>Cornus florida</i>		
Trailing Arbutus (Ground Laurel; Mayflower)	<i>Drosera Spp.</i>		
Burning-bush (Wahoo) Strawberry-bush (Bursting-heart)	<i>Epigaea repens</i>		
All ferns, including: Adder's-tongue Azolla, Buckhorn, Cliff Brake, Curly-grass, Fiddleheads, Hart's-tongue, Maidenhair, Moonwort Polypody, Rock Brake, Salvinia, Spleenwort, Walking-leaf, Wall-rue Water-spangle, Woodsia But excluding Bracken (Pteridium aquilinum); Hay-scented Fern (Dennstaedtia punctilobula); Sensitive Fern (Onoclea sensibilis), which are not protected.	<i>Eunymus spp. (Native)</i>		
Ague-weed, Blue-bottles, Gentian; (Gall-of-the-earth)	<i>Filices (Filicinae; Ophioglossales and Filicales) (Native)</i>		
Golden Seal (Orange-root; Yellow Puccoon)	<i>Gentiana spp.</i>	Golden-club	<i>Cronium aquaticum</i>
Holly (Huiver); Inkberry (Sitter Gallberry); Winterberry (Black Alder)	<i>Hydrastis canadensis</i>	Ginseng (Sang)	<i>Banax quinquelolius</i>
Laurel, Spoonwood (Calico-bush)	<i>Ilex spp. (Native)</i>	Wild Crahapple	<i>Pyrus Coronarie</i>
Wicky (Lambkill)	<i>Kalmia Spp.</i>	Azalea; Great Laurel (White Laurel); Honeysuckle; Pinxter (Election-pink; Pinxter-bloom); Rhododendron (Rosebay); Rhodora Bitterbloom (March-pink; Rose-pink; Sabatia; Sea-pink)	<i>Rhoadenaron spp. (Native)</i>
Lily, Turk's-cap	<i>Lilium spp. (Native)</i>	Bloodroot (Puccoon-root; Red Puccoon)	<i>Sabatia spp.</i>
Cardinal-flower (Red Lobelia)	<i>Lobelia cardinalis</i>	Pitcher-plant (Huntsman's-cup Sidesaddle-flower)	<i>Sanguinaria</i>
All Clubmosses, including: Bear's bed (Christmas-green, Running Evergreen; (Trailing Evergreen; Ground Pine); Bunch Evergreen; Festoon Pine Coral Evergreen; Buckhorn; Staghorn Evergreen; Wolf's-claws; Ground Cedar (Creeping Jenny); Ground Fir; Heath Cypress.	<i>Lycopodium spp.</i>		<i>Sarracenia purpurea</i>
Bluebell (Roanoke-bells; Tree Lung-wort; Virginia Bluebell; Virginia Lung-wort; Virginia Cowslip)	<i>Mertensia virginica</i>	Wild Pink	<i>Silene caroliniana</i>
Bird's-foot Violet	<i>Ciela Pedata</i>	Bethroot (Birthroot; Squawroot; Stinking Benjamin; Wake-robin); Toadshade, Trillium Globe-flower (Trollius)	<i>Trillium spp.</i>
			<i>Trollius laxus</i>

*NOTE: In this list above, common names are not included they repeat the generic common name with a modifier (e.g. *Trillium* is understood to include *Painted trillium*, *White Trillium*, *Nodding Trillium* and all others.) Names appearing within parentheses are less familiar synonyms for the principal common names of each species listed.

APPENDIX G

SITE SURVEY AND MANAGEMENT REPORT

For each parcel proposed to the Nature Preserve, a Site Survey and Management Report will be prepared. The report will contain the following information:

- Introduction-criteria rationale for Nature Preserve inclusion
- General Information
 - location and size (including map)
 - present and past land use
 - existing infrastructure
- Physical characteristics
 - geology, topography, soils
- Biological characteristics
 - vegetation
 - flora
 - fauna
- Legal information
 - restrictions, covenants, conditions in the deed
- Management information
 - permitted uses
 - non-permitted uses
 - general management guidelines and policies
 - infrastructure recommendations
 - management agreements with other organizations

Hauppauge, N. Y. 11788

Honorable Donald R. Blydenburgh
Suffolk County Presiding Officer
Suffolk County Legislature
Veterans Memorial Highway
Hauppauge, N. Y. 11788

Dear County Executive and Presiding Officer:

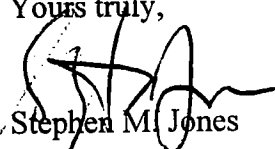

Herewith please find Volume 2 of the Suffolk County Parks Policy Plan. Part of a three-volume publication, this volume is the park inventory in a somewhat technical form indicating the location of the property by tax map number, how the property was acquired, and totals of acreage by township.

This volume will have value in helping to translate park locations to the County tax map system and, by extension, will allow us to include it as a coverage on our budding GIS computer-based mapping and data format.

The other two volumes include a general overview of the County parks system, County park finances, policies, inventory of other public park offerings and recommendations for the future (Volume 1) and a detailed evaluation with recommendations for each and every County park and preserve listed by township (Volume 3).

We hope this publication, authorized by the Legislature under a Suffolk County Water Authority Challenge grant (I.R. 1846-90), will be of great value to you in formulating policy and legislation, and also, to park planning professionals and interested citizens for their use, as well.

Yours truly,

Stephen M. Jones
Director

Acknowledgments

This Department wishes to thank the Towns that supplied all the information on local recreation and open space, along with the Nature Conservancy providing information on their extensive holdings throughout the County.

The Staff of this Department especially thanks the Suffolk County Department of Parks, Recreation and Conservation. Commissioner Edward Wankel and his staff provided extensive assistance in gathering data and developing the policy recommendations.

The Staff extends its appreciation to Messrs. Schuyler (Bud) Corwin, Joe Paige, Dean Phillippi, Dave Salvatore, William Sickles, Larry Hynes and John Turner of the Department of Parks, Recreation and Conservation, and Messrs. Donald Weir and Jack Hauptman of FINS for their assistance in the off-road vehicle portion of the report.

Finally, this study was coordinated by the late Arthur H. Kunz, Planning Department Director from 1989 to 1993. His extensive knowledge of Suffolk County gained throughout his thirty-year association with the Suffolk County Planning Department was an extraordinary resource in the development of this study. The staff acknowledges his gifted leadership.

Nature Preserve Classification - A Nature Preserve can be defined as:

any area of land or water in public or private ownership which is formally dedicated to being maintained as nearly as possible in its natural condition; which area either retains, to some degree, its primeval character (though it need not be completely natural and undisturbed at the time of its dedication) or has unusual flora, fauna, geological features of scientific or educational value, and which area is used in a manner and under limitations consistent with its continued preservation, without impairment, disturbance, or artificial development, for the public purposes of scientific research, education, aesthetic enjoyment and providing habitat for plant and animal species and communities and other natural objects.

Nature Preserve sites may vary greatly in their size and characteristics. Some sites may be very small, while others may be very large in acreage. Some may encompass unique or unusual features, whereas others may be very typical and common on Long Island. However, all sites are areas which should be relatively undisturbed and ecologically intact.

For consideration as a possible Nature Preserve, a site should possess one or more of the following criteria:

- prime watershed area
- prime wildlife areas
- prime ecological sites
- freshwater wetlands
- tidal wetlands
- landward edge of streams, freshwater wetlands, tidal marsh, ponds, lakes and all surface waters
- undeveloped areas of high water table
- endangered species habitats
- *protected plants*
- unique or rare vegetation
- undeveloped area of the barrier island including foredune, primary dune, seaward face of secondary dune
- bluffs
- slopes greater than 25% within 300' of water's edge
- beach
- kettle holes
- buffer zones for prime ecological site
- eskers
- major swales

Dedication of County-owned properties to the Nature Preserve is done by resolution approved by the Suffolk County Legislature and Executive. The resolution dedicating County-owned property to the County Nature Preserve shall provide that all or a specified portion of the property being dedicated shall be kept forever wild or in its natural state, or that it may be used only for the purpose or purposes specified in the resolution.

Unless authorized by charter law approved upon mandatory referendum, property owned by the County and dedicated under this section to the County Nature Preserve shall not be taken nor otherwise disposed of, nor shall it be used for any purpose not specified in the resolution by which the property was dedicated to the County Nature Preserve.

Details of Nature Preserve dedication and management can be found in the Suffolk County Nature Preserve Handbook.

Historic Trust Classification - The definition of *distinctive historical significance* of the Suffolk County Charter is established by:

- the ***National Register of Historic Places***, National Park Service, United States Department of Interior, as authorized under the Federal Historic Preservation Act of 1966.
- the National Trust for Historic Preservation as set forth in ***Historic Preservation Tomorrow - Revisited Principles and Guidelines***, National Trust for Historic Preservation and Colonial Williamsburg, 1976.

The Historic Trust concerns itself with all aspects of the preservation of all historic buildings, fences, street furniture, trees (including lopped-trees), kettleholes, roads, roadsides, boundary ditches, and

historic landmarks including but not limited to: residences and out buildings, commercial and industrial structures and areas; farm buildings; accessory buildings; engineering works - including trestles, bridges, towers, canals, piers, dry docks, wharfs, waterworks, etc.; lighthouses; government buildings; railroad stations and other railroad facilities; educational buildings - including schools and academies; abandoned religious structures; fortifications and ramparts; Indian fields and village sites; cemeteries and village greens; archaeological sites; - and their environments.

The Suffolk County Department of Parks, Recreation and Conservation and its Board of Trustees, together with the Director of Historic Services, should in most instances, be the stewards of properties dedicated to the Historic Trust with custodianship for each property to be decided individually. In most cases, the Department of Parks will also have custodianship, but it is possible that a particular property, or even an item, may be entrusted to the custodianship of another, e.g., another County department or even a local historical society or organization. In the case of roads or highways dedicated, the Department of Public Works normally would be the logical steward, except that the Director of Historic Services should be responsible for supervising such a road's historic integrity.

Dedication of County-owned historic properties is done by resolution approved by the Suffolk County Legislature and Executive. The resolution dedicating County-owned property to the County Historic Trust shall specify the purpose or purposes for which the property may be used.

Unless authorized by charter law approved upon mandatory referendum, property owned by the County and dedicated under this section to the County Historic Trust shall not be taken nor otherwise disposed of, nor shall it be used for any purpose not specified in the resolution by which the property was dedicated.

Details of Historic Trust dedication and management can be found in the Suffolk County Historic Trust Manual.

Bird Sanctuary Classification - Properties found to possess qualities conducive to the attraction and retention of bird populations of ornithological significance may be dedicated to the Suffolk County Bird Sanctuary.

Dedication of County-owned properties to the Bird Sanctuary is done by resolution approved by the Suffolk County Legislature and Executive. Any resolution dedicating County-owned property to the County Bird Sanctuary shall provide that all or a specified portion of the property being dedicated shall be used only for the purpose or purposes specified in the resolution.

Unless authorized by charter law approved by mandatory referendum, property owned by the County and dedicated to the County Bird Sanctuary shall not be taken nor otherwise disposed of; nor shall it be used for any purpose not specified in the resolution which dedicated the property to the County Bird Sanctuary.

Details of Bird Sanctuary management can be found in the Suffolk County Bird Sanctuary Management Plan.

Drinking Water Protection Classification

The Drinking Water Protection law (1987) created a Pine Barrens Wilderness and a Water Protection Preserve (1/4% Program). These lands are identified in S. C. LL. No. 7 of 1984 as the Pine Barrens Zone and any Special Groundwater Protection Areas designated by the Long Island Regional Planning Board in its report published in 1992. *Land so acquired . . . shall remain in a natural state and be managed so as to perpetuate the natural ecosystem of said lands as a nature preserve . . . unless designated by the Suffolk County Legislature for water supply and distribution.*

Lands acquired under the Drinking Water Protection Program are under the stewardship of the Suffolk County Parks and Recreation Department.

Additionally, appropriated from the Water Quality Protection Program is a 10% management reserve so that the Suffolk County Dept. of Parks and Recreation can manage the *custody, control and interpretation* of lands added to the department's responsibilities.

COUNTY OF SUFFOLK

ROBERT J. GAFFNEY
SUFFOLK COUNTY EXECUTIVE

DEPARTMENT OF PLANNING

December 15, 1994

STEPHEN M. JONES, A.I.C.P.
DIRECTOR OF PLANNING

Honorable Robert J. Gaffney
Suffolk County Executive
888 Veterans Memorial Highway
Hauppauge, N. Y. 11788

Honorable Donald R. Blydenburgh
Suffolk County Presiding Officer
Suffolk County Legislature
Veterans Memorial Highway
Hauppauge, N. Y. 11788

Dear County Executive and Presiding Officer:

Herewith please find Volume 3 of the Suffolk County Park Policy Plan. Part of a three-volume publication, this volume contains evaluations and recommendations for all County park holdings. The information is comprehensive and detailed for each park and preserve.

The site identification number for each park can be cross-referenced with the Park Inventory (Volume 2) to obtain the Suffolk County tax map numbers. Volume 1 comprises a general overview of the County parks system, County park finances, policies, inventory of other public park offerings and recommendations for the future.

We hope this publication, authorized by the Legislature (I.R. 1846-90), under a Suffolk County Water Authority Challenge grant, will be of great value to you in formulating policy and legislation, and also to park planning professionals and interested citizens for their use, as well.

Yours truly,

Stephen M. Jones
Director

Acknowledgments

This Department wishes to thank the Towns that supplied all the information on local recreation and open space, along with the Nature Conservancy providing information on their extensive holdings throughout the County.

The Staff of this Department especially thanks the Suffolk County Department of Parks, Recreation and Conservation. Commissioner Edward Wankel and his staff provided extensive assistance in gathering data and developing the policy recommendations.

The Staff extends its appreciation to Messrs. Schuyler (Bud) Corwin, Joe Paige, Dean Phillippi, Dave Salvatore, William Sickles, Larry Hynes and John Turner of the Department of Parks, Recreation and Conservation, and Messrs. Donald Weir and Jack Hauptman of FINS for their assistance in the off-road vehicle portion of the report.

Finally, this study was coordinated by the late Arthur H. Kunz, Planning Department Director from 1989 to 1993. His extensive knowledge of Suffolk County gained throughout his thirty-year association with the Suffolk County Planning Department was an extraordinary resource in the development of this study. The staff acknowledges his gifted leadership.

Guidelines for Park Development

GUIDELINES FOR PARK DEVELOPMENT

Planning for park development faces two contradictions. First, a park's function or use cannot be identified until the limitations of its site are known. Second, analysis of a park site cannot be completed until its purpose is understood.

Analysis should cover both areas. Physical characteristics must be identified so that the park's underlying uniqueness is found.

Site analysis involves examination of surface and sub-surface conditions; natural habitats and sensitive environmental constraints, climate and micro-climatic factors; man-made structures, codes and regulations, land-use and history.

A needs analysis should also occur so that the best functions can be accommodated. Human physical as well as psychological needs must be met. Our natural resources (air, water, soil, plants and animals) need to be enhanced and protected. Economic development must be considered as decisions will affect tourism, land use patterns and real estate values.

Typically, design goals should consider several factors: How will the site function? Are adequate circulation patterns available? Does the potential user have choices? How much will it cost the user or the management agency? Will everyone's health and comfort be protected? Is the site adaptable to other uses depending on demand? What is the image of the site that conveys its unique flavor or essence? These are the questions a planning professional needs to consider.

The following guidelines will attempt to identify criteria for designing specific park sites.

Water Sports Area

Water sports can be provided either by swimming pools or waterfront development. Swimming pools should be planned in combination with other recreational activities, such as land sports, picnic areas and/or craft centers. Swimming pools need enough space for buffering and parking. The site should also be level, well drained, sunny and a good distance from any street. Fencing should completely surround the pool and deck and should be screened by low plantings. Plantings, panels or a bathhouse can protect bathers from prevailing winds.

Waterfront development requires a safe, sanitary, clear water source. Water conditions should be warm with adequate flow and without obstructions. Underwater land should provide a secure, stable footing without a steep pitch. An ideal exposure is south to south-east with protection from possible weather-related damage. Local regulations, and adjacent land use should be compatible with waterfront development. The site should be accessible to its users and protected from unwarranted encroachments. Adequate space for each swimmer and zones for recreation, instruction and competition should be available.

Marinas should be laid out in a way that provides for separation of different kinds of crafts. Larger boats should be located near the entrance. These larger vessels need more space and depth to maneuver in and are not affected by waves as much as small craft. Since large commercial craft and large recreational craft have different needs, they should have separate areas near the entry to the marina. Charter boats, rented boats, sailboats all have special requirements that should be accommodated in different areas. A launching area for trailered craft should be placed at some distance from the berths to avoid conflicts. Fueling and pump-out facilities have special design and safety needs. Space for harbor administration should be convenient to transient vessels and should have a good view of all marina activity. Adequate parking, repair and service facilities need to be provided.

Land Sports and Spectator Sports

Land sports are situated best on level soils of Bridgehampton, Haven, Montauk, Riverhead, Riverhead-Haven, Riverhead-Plymouth, Scio and Sudbury. The first three soils mentioned are also good agricultural soils and could be considered for community garden plots. These eight soil associations are suitable for camping areas, paths, trails, picnic grounds, athletic fields and play areas. A Suffolk County park survey identified the need for field games, jogging, biking, day hiking, nature walking, backpacking and horse riding.

Major objectives in designing for land sports are as follows:

- Avoid dangerous conditions and conflicts in the placement of activities near each other.
- Establish barriers, both physical and visual, between recreational facilities and adjacent uses, e.g., residential, community, etc.
- Provide enough parking so that spectators and participants are accommodated.
- Allow adequate access to all facilities for service and maintenance.

Court surfaces and playing fields should have sub-grade and grade pitched for adequate drainage. Perimeter drains may be provided for paved areas.

Play lots and playgrounds should fit a site and preserve as many of the existing natural features and terrain as possible. Large shade trees, interesting land-forms, rock outcroppings, and surface waters should be preserved and integrated into the design. In general there should be a tot lot, an enclosed area for playground equipment, an open turfed area, shaded areas for quiet activities, a paved multi-purpose area, athletic fields and miscellaneous service facilities.

Outdoor Living Activities

Camping experiences should be possible for family campers or group campers. These experiences may occur in urban, high density campgrounds or in wilderness areas accessible to backpackers. Campers may utilize self-contained vehicles, tents or structures for many persons. Campsites should be well-drained level to gently sloping, rock-free areas. Sites should be placed away from bogs or low lying meadows and should be down-gradient of potable water. Different types of campgrounds should be separated from each other and away from lakes, streams and roads.

Individual campsites should have provision for tent spaces or trailers, vehicle parking, cooking, eating, wood storage and trash disposal. Modern toilet facilities, electricity and running water may be provided in a central area. Most back-country campgrounds will probably be designated areas without facilities although fireplaces, tables, pit toilets, water and refuse disposal facilities could be built to reduce the impacts on heavily used or fragile areas. Generous separation of campsites insures privacy.

Organized group camping should be provided in a separate campground or widely separated from a standard camping area. Campsites should be clustered near multi-car parking areas. A ratio of approximately nineteen acres of wild land should be provided for every acre of campsite. Group camping can be 3-to-4 sites per acre whereas family camping averages about 5-10 sites per acre.

Preserves - Greenbelt and Wildlife Sanctuaries

As in other site design problems, planning for greenbelts and wildlife sanctuaries requires inventory and analysis. Habitats must be identified and evaluated. Existing plant species providing food for wildlife should be found, saved and/or supplemented. Land uses contiguous to the proposed sites must be analyzed. Open space areas such as national forests, state forests, The Nature Conservancy holdings, wildlife management areas, golf courses, cemeteries, parks, estates, wooded streams, vacant lands etc. can provide continuous wildlife corridors. Existing species and those that might be found under optimum conditions should be identified by professionals and through a literature search. All efforts should protect rare, endangered or threatened species. Factors that may limit the existence or enhancement of these individuals or groups should be considered along with the amount of space each needs. Planning for open space systems should include areas not suitable for development such as floodplains, steep slopes, wetlands, transportation and utility rights-of-way and the woodland linkages between them. Physical barriers and human disturbance should be minimized.

Trails, Bikeways and Equestrian Uses

Hiking trails and horse paths should be located to offer many interesting views or vistas. Numerous access points and interconnecting links should be planned. Average grades should be zero to five percent not to exceed a maximum of fifteen percent. Rest stops should be available every three to five miles. Width of trails can be four-to-eight feet and sometimes ten feet wide.

Nature trails for school groups led by a naturalist should be configured as a short loop through several different ecosystems which can be traversed within a time period of one-and-a-half hours. Rights-of-way should be cleared for groups to traverse and should be free of both overhead and underfoot

obstructions. Good drainage and a firm walking surface should be provided. Curves and bends are much more interesting than long straight stretches.

The Long Island Greenbelt Trail Conference and the Town of East Hampton have designed and mapped excellent trails through environmentally significant lands and county holdings. Maps are available from The Nature Conservancy and from the Town of East Hampton for a nominal fee.

Members of biking clubs help to monitor trail use. Their presence has helped to discourage unwarranted intrusions from off-road vehicles and illegal refuse disposal. Such interagency cooperation should be encouraged.

Bikeways: Bikeways may be of three types:

- Completely separated right-of-way exclusively for bicycles. Motor vehicles and pedestrians are not allowed except at designated crossings. Grade separations are planned.
- Restricted right-of-way semi-exclusive for bicycle use with minimal cross flows.
- Shared right-of-way, identified by signs, includes vehicles or pedestrians. Nearly level gradients should not exceed ten percent and design speeds should be about ten miles per hour.

Careful planning can produce parks that are harmonious with their setting. A variety of open spaces is important for human physical and psychological health. Protection of diverse environmental values enhances the quality of life.

HUNTING	RESTROOMS X	NATURE TRAIL
TRAP AND SKEET	GOLF X	MUSEUM
OTHER +Driving Range		

F. FEES: Weekday: \$15; Weekend: \$16 (with County pass)

NON-RESIDENT RESTRICTIONS/FEES: Weekday: \$20; Weekend: \$22

ADDITIONAL COMMENTS:

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Landscaped/open space

B. WETLANDS: At edge of course

C. WATERBODIES: Santapogue Creek, West Babylon Creek, Great South Bay

D. KNOWN PROTECTED OR ENDANGERED SPECIES:

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Vegetation along Santapogue Creek (including bull rushes)

III. PROBLEMS/ISSUES:

A. EXISTING USES: Consistency in professional services contracts re: terms of percentages for County and Operator. Flooding problem on some of the greens.

B. FACILITIES: Expand capacities of bathroom facilities. Facilities are 23years old.

IV. RECOMMENDATIONS :

A. RECOMMENDED POLICY/USES: Rebuild holes with flood problems. Upgrade bathrooms; Automate sprinkler system; Add lights to driving range (new) on Bulk Nursery property; Consider dropping miniature golf in favor of golf "teaching center" or grandparent course. Seed/fertilizer supplies need to be increased; Automate sprinklers to avoid using 2 people for a day with manual watering.

B. FISCAL IMPLICATIONS:

C. MAINTENANCE AND OPERATION REQUIREMENTS: Contract for upgrading and maintenance.

HUNTING	RESTROOMS	NATURE TRAIL
TRAP AND SKEET	GOLF	MUSEUM
OTHER +Driving Range		

F. FEES: N/A

NON-RESIDENT RESTRICTIONS/FEES: N/A

ADDITIONAL COMMENTS:

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Two field surveys of the westerly portion of the site revealed that the area is what would be classified as a woodland swamp, the dominant trees being Red oak, Scarlet oak, Maples and Pitch pine. Other trees also found in the area were Black gum, Grey birch and Ground pine. There was good ground cover on the site which consisted of a variety of ferns, Sphagnum moss, Bear berry, High-bush huckleberry, Sheeps laurel, Green briar and Sweet pepperbush. In the Carlls River area the dominant trees found were Red maple, White birch, Red birch, Grey birch and Pitch pine, while the undergrowth consisted of Multiflora rose, wild grapes, aster, Sumac, Willows, Sweet pepperbush and a variety of ferns. The meadowland to the south of Brook Avenue included such vegetation as Cattails, Phragmites and other fresh-water marsh plant species, interspersed occasionally with small Red maples. Since the area was surveyed in late winter not much wildlife was seen, however, judging from the ground cover in the area, it would appear that the entire region is very conducive to supporting wildlife.

B. WETLANDS: Freshwater

C. WATERBODIES: Carlls River

D. KNOWN PROTECTED OR ENDANGERED SPECIES: Barratt's Sedge (*Carex barrattii*) E40-73-63

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Woodland swamp & marsh meadow.

III. PROBLEMS/ISSUES:

A. EXISTING USES: The county owned parcels are used as dump sites for local residents. Construction debris, used tires and household rubbish can be found on many vacant lots.

B. FACILITIES: None

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: Continue acquisitions to obtain out parcels especially between Brook Avenue and Carlls River. This would create a continuous corridor of open space along the river from Geiger Lake Town Park to Belmont Lake State Park.

B. FISCAL IMPLICATIONS: Remaining aquisition costs should be relatively low for this property since it is difficult to build on many of the parcels.

C. MAINTENANCE AND OPERATION REQUIREMENTS: Clean-up costs and fencing where necessary to prohibit future dumping.

ADDITIONAL COMMENTS:

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Maritime shrubland

B. WETLANDS: Extensive wetlands and dredge spoil area

C: WATERBODIES: Strong's Creek, Great South Bay, American Venice Lands

D: KNOWN PROTECTED OR ENDANGERED SPECIES:

E: ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS:

III. PROBLEMS/ISSUES:

A. EXISTING USES: This park is inaccessible except for boaters who may stop on the Island. A vehicular bridge to the Island was destroyed many years ago.

B. FACILITIES:

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: A vehicular bridge would allow access; however island development and bridge costs are prohibitive. A pedestrian bridge would create a parking problem due to a small residential street access which cannot accommodate parking. Therefore, the land is best left in its present state or be a site for wetland restoration with N.Y.S. DEC assistance.

B. FISCAL IMPLICATIONS: None, if state funding is available.

C. MAINTENANCE AND OPERATION REQUIREMENTS: Lack of access limits any clean-up problems.

F. FEES: N/A

NON-RESIDENT RESTRICTIONS/FEES: N/A

ADDITIONAL COMMENTS:

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Maritime shrubland; dune vegetation; open fields; dredged spoil areas

B. WETLANDS: Tidal wetlands

C. WATERBODIES: Atlantic Ocean; Moriches Bay; Moriches Inlet

D. KNOWN PROTECTED OR ENDANGERED SPECIES: Least Tern (E); Piping Plover(E); Black Rail (SC); Seabeach Amaranth and Seabeach Knotweed.

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Severe limitations on development on wetlands and dune formations. Within COBRA boundary. Tern nesting areas require protection during breeding season (April-July).

III. PROBLEMS/ISSUES:

A. EXISTING USES: The site is presently closed due to the Dune Road washovers from recent storm events. Dune and beach environment need to be protected from erosion problems and inlet stabilized. The Nature Conservancy has a wildlife protection agreement with the County. They have sectioned off a tern nesting area in the western/central portion of the site.

B. FACILITIES: The existing facilities (bathhouse) are in good condition but its restrooms require upgrading.

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: Re-open facility when Dune Road has been re-established. Resolve potential conflict areas among the 4WD camping areas, tern nesting sites and sensitive erosion areas.

B. FISCAL IMPLICATIONS: Road construction funds needed.

C. MAINTENANCE AND OPERATION REQUIREMENTS: Unauthorized mooring of boats occurs on bay side. Walkways are needed to reduce erosion in this area. Upgrade existing restroom facilities. Moriches Inlet stabilization is required.

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: Scrub oak/pine. Very sandy soils.
- B. WETLANDS: None
- C. WATERBODIES: None
- D. KNOWN PROTECTED OR ENDANGERED SPECIES: Unknown
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: SGPA, Pine Barrens

III. PROBLEMS/ISSUES:

- A. EXISTING USES: The main parcel is presently used for dirt biking. Two other detached parcels (1 and 2.5 acres) are vacant wooded lots on partially improved streets in dilapidated areas. This preserve is adjacent to Town of Brookhaven open space.

- B. FACILITIES:

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: Since this parcel is in Nature Preserve, some measures should be taken to curtail illegal activities such as dirt biking and dumping, which will destroy the integrity of the natural environment. The main area of disturbance appears to be in the southern portion of the large parcel where Country Road is unimproved. Fencing required in this area.

- B. FISCAL IMPLICATIONS: Due to the sandy soils and topography, the site is excellent for illegal motorbike activity. Measures should be taken to minimize such activity in order to limit potential liability. The aforementioned small lots should be considered for a trade to expand another park area.

- C. MAINTENANCE AND OPERATION REQUIREMENTS: This property requires regular maintenance and supervision

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: Due to the physical limitations of this property, is felt that it should be left in its natural state.
- B. FISCAL IMPLICATIONS: Dredge mosquito ditches. Possible need for fence in future.
- C. MAINTENANCE AND OPERATION REQUIREMENTS: Minimal, low potential for dumping.

TRAP AND SKEET	GOLF	MUSEUM
OTHER		

F. FEES: N/A
 NON-RESIDENT RESTRICTIONS/FEES: N/A
 ADDITIONAL COMMENTS:

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Overgrown field, freshwater & tidal vegetation

B. WETLANDS: Extensive tidal and freshwater

C. WATERBODIES: Hedges Creek, Lock Lake, Great South Bay

D. KNOWN PROTECTED OR ENDANGERED SPECIES:

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: The southern portion is on the NYSDEC North American Waterfowl Management Plan Priority list for wetland rehabilitation work involving tidal flow restoration, open marsh water management, alterations for mosquito control, and control of common reed (*Phragmites australis*) invasion.

III. PROBLEMS/ISSUES:

A. EXISTING USES: Northerly portion has been utilized by illegal motorcycling. Trails have been cut throughout the parcel allowing 4 wheel vehicles to trespass as well. Evidence of illegal dumping exists as well.

B. FACILITIES: None

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: Northern portion - trails should be blocked such that only pedestrian or Parks security and cleanup personnel may access this site. Southern portion-continue acquisition of infill parcels.

B. FISCAL IMPLICATIONS: Northern portion-cost of cleanup and fencing. Southern portion-infill acquisitions.

C. MAINTENANCE AND OPERATION REQUIREMENTS: Regular patrols should be assigned this site, especially north of South Country Road.

F. FEES:

NON-RESIDENT RESTRICTIONS/FEES:

ADDITIONAL COMMENTS: Small nature preserve parcels are adjacent to greenbelt.

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: Mature oak forest
- B. WETLANDS: None
- C. WATERBODIES: None
- D. KNOWN PROTECTED OR ENDANGERED SPECIES: Unknown
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: SGPA, Pine Barrens

III. PROBLEMS/ISSUES:

- A. EXISTING USES: None, the property consists of 2 vacant building lots in an area which is highly developed. The parcels are close to a homeowner association beach.
- B. FACILITIES: None

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: The parcel is too small to be effectively managed as County parkland. This is an ideal parcel for the "adopt-a-park" concept since a local homeowners association is in place and nearby.
- B. FISCAL IMPLICATIONS: Potential for dumping small, so management cost is small.
- C. MAINTENANCE AND OPERATION REQUIREMENTS: Local maintenance

HUNTING	RESTROOMS	NATURE TRAIL
TRAP AND SKEET	GOLF	MUSEUM
OTHER		

F. FEES:

NON-RESIDENT RESTRICTIONS/FEES:

ADDITIONAL COMMENTS: This property is east of CR 111, south of the LIE and west of CR 51, Suffolk Hills Park and the Calverton clear zone.

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: Pine Barrens in morainal area with high elevations and steep slopes.
- B. WETLANDS: None, but kettlehole freshwater wetlands are in near vicinity.
- C. WATERBODIES: None
- D. KNOWN PROTECTED OR ENDANGERED SPECIES: Coastal Barrens Buckmoth (U-SC); swamp sunflower (T)
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Major watershed preserve in pine barrens and SGPA. The groundwater divide bisects this group of properties.

III. PROBLEMS/ISSUES:

- A. EXISTING USES: Within the almost 1,000 acres are out parcels not yet acquired and old filed maps with extensive County ownership.
- B. FACILITIES:

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: This area can be part of an east-west trail system through the pine barrens. A few key parcels should be acquired or have development rights transferred. Replatting and clustering the old filed maps south of Hot Water Sreet will add protection to the preserve. Continued tax foreclosures may occur on other maps. Isolated nature preserve parcels should be sold.
- B. FISCAL IMPLICATIONS: Approximately 300 acres should be acquired. No cost option such as TDR, cluster and tax foreclosure retentions should be adequate to protect the remainder.
- C. MAINTENANCE AND OPERATION REQUIREMENTS: Maintenance of a trail system and restricting dumping are main needs.

CANOE RENTAL		PLAYGROUND	FOOD CONCESSION/RESTAURANT
ROW BOAT RENTAL		SHOWERS	CROSS COUNTRY SKIING
HUNTING		RESTROOMS	NATURE TRAIL
TRAP AND SKEET		GOLF	MUSEUM
OTHER * No lifeguard			

F. FEES: N/A

NON-RESIDENT RESTRICTIONS/FEES: N/A

ADDITIONAL COMMENTS: Use of site is primarily through unauthorized access by boat or 4WD vehicles at low tide through Village of Belle Terre property to the south.

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Maritime shrubland; upland habitat has been severely denuded from past excavation activities.

B. WETLANDS: Tidal and freshwater wetlands

C. WATERBODIES: Port Jefferson Harbor; Long Island Sound

D. KNOWN PROTECTED OR ENDANGERED SPECIES: least tern (E); common tern(T); piping plover (E); roseate tern; laughing gull

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Severe erosion problems exist on the bluff face; dune and beach habitats. Within COBRA boundary. Tern nesting areas require protection during breeding season (April-July).

III. PROBLEMS/ISSUES:

A. EXISTING USES: The site was a former sand and gravel operation which has been scoured with remnants of old bulkheads and shafts that have created a safety problem. The Nature Conservancy has a wildlife protection agreement with the County. They have sectioned off a tern nesting area along the Long Island Sound shoreline.

B. FACILITIES: No facilities exist at site.

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: Severe access problems restrict uses at this site. Major regrading and removal of dilapidated structures and pilings would have to be undertaken before any formal recreational activities could be considered.

B. FISCAL IMPLICATIONS: Funds should be obtained to avoid future liability problems.

C. MAINTENANCE AND OPERATION REQUIREMENTS: Signs should be posted stating that this park is not officially open to the public and they are there at their own risk.

SUFFOLK COUNTY PARKS EVALUATION FORM

DOCKING	ACTIVITY FIELD	CONSERVATION/ED.PROGRAM
CANOE RENTAL	PLAYGROUND	FOOD CONCESSION/RESTAURANT
ROW BOAT RENTAL	SHOWERS	CROSS COUNTRY SKIING
HUNTING	RESTROOMS	NATURE TRAIL
TRAP AND SKEET	GOLF	MUSEUM
OTHER No organized activities are conducted on site; no facilities are located on these parcels.		

F. FEES: N/A

NON-RESIDENT RESTRICTIONS/FEES: N/A

ADDITIONAL COMMENTS: Most of the extremely small parcels are located in an existing sod farm and are being farmed. A few of the parcels to the south are in a disturbed area used by off-road vehicles while some are undisturbed woodlands. The County owns significant acreage to the south on both sides of Miller Place/Yaphank Road.

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Sod farm, pine-oak woodland

B. WETLANDS:

C. WATERBODIES:

D. KNOWN PROTECTED OR ENDANGERED SPECIES:

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: SGPA, Pine Barrens

III. PROBLEMS/ISSUES:

A. EXISTING USES: The sod farm is illegally using County owned property for their purposes.

B. FACILITIES: N/A

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: The approximately 80 acre tax acquired properties to the south should be placed in parks for general usage. The nature preserve parcels within the sod farm should be swapped for contiguous or infill property to the County owned property on the south.

B. FISCAL IMPLICATIONS: Transfer of development rights can be used. Parks designation will remove tax payments on 80 acre area.

C. MAINTENANCE AND OPERATION REQUIREMENTS: Present dirt bike use creates maintenance and security problems.

SUFFOLK COUNTY PARKS EVALUATION FORM

TRAP AND SKEET	GOLF	MUSEUM
OTHER Horse shows are conducted under auspices of a private party; no other activities are conducted at this time.		

F. FEES:

NON-RESIDENT RESTRICTIONS/FEES:

ADDITIONAL COMMENTS: Site is important to the park/preserve atmosphere and open space character of the West Meadow Creek/Beach corridor along Trustees Road.

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: Trees/shurbs border the upland portion of the property; some old field vegetation exists. Bulk of the site consists of grassy areas used for riding, etc. Dredged spoil dikes about a portion of the site.
- B. WETLANDS: Tidal wetlands fringe the upland shore.
- C. WATERBODIES: Site adjacent to West Meadow Creek.
- D. KNOWN PROTECTED OR ENDANGERED SPECIES: Waterfowl and shorebirds frequent West Meadow Creek and its associated extensive wetlands.
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Site is located in the 100-yr. year floodplain; dredged spoil taken from West Meadow Creek was placed over wetlands to create upland property at the site (circa 1930).

III. PROBLEMS/ISSUES:

- A. EXISTING USES: All structures on site are in need of repair/maintenance; storm damage is evident; and some are in dilapidated condition. Horse shows have been held at site for three years with an average of 150 entrants/event. A tentative lease agreement between County Fair Management Corp. and the S.C. Parks Dept. is under review (April '92). Under this agreement, Country Fair Horse Shows (CPHS) has the right to hold 7 shows on site during the period from May-Oct.; CFHS can also sublet site to others for horse show purposes (1-2 more shows/season). CFH agrees to maintain grounds, cut grass, clean up debris, etc.; and to carry appropriate insurance.
- B. FACILITIES: Grandstand, 16 barns, main stable and fencing are found on site. One structure is leased by Friends of L.I. Heritage and its occupant provides some security at the site. The grandstand and main stable have historic value (Richard Haviland Smyth - Architect).

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: Continue traditional horse shows on site at current levels of activity under lease arrangement with private interests. Restore structures having historic value. The feasibility of utilizing a portion of the site for retention/detention of stormwater runoff currently being discharged to head waters of West Meadow Creek from adjacent roadways should be explored, should conditions allow for such use in the future.
- B. FISCAL IMPLICATIONS: Potential for economic return to S.C. via lease agreement is not known.
- C. MAINTENANCE AND OPERATION REQUIREMENTS: Best management practices should be implemented to control animal waste generated on-site. Drainage from site is conveyed to the headwaters of West Meadow Creek, which is closed to shellfishing and is poorly flushed.

OTHER		

F. FEES: None

NON-RESIDENT RESTRICTIONS/FEES:
ADDITIONAL COMMENTS:
II. ENVIRONMENTAL CHARACTERISTICS:
A. UPLAND VEGETATION: Mature pine and oak forest. Soils survey shows At, Bd, CpC, CpE, CuB, CuC

B. WETLANDS: Freshwater wetland fringe exists along the river corridor.

C. WATERBODIES: Patchogue River and Canaan Lake

D. KNOWN PROTECTED OR ENDANGERED SPECIES: Osprey, night heron, (C. Dubin 10/7/92)

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Freshwater wetlands, river bed and lake areas are all environmentally sensitive.

III. PROBLEMS/ISSUES:
A. EXISTING USES: Medium to high density residential development adjacent to the wetland system as well as a capped town landfill to the north are contributing to undermine the water quality. Road runoff is being discharged directly into the lake at the ends of each road adjacent to the lake.

B. FACILITIES:
IV. RECOMMENDATIONS:
A. RECOMMENDED POLICY/USES: Continue the acquisition of vacant lands within the wetland system and directly adjacent to it. A study should be conducted to determine the potential for some upland drainage way acquisition. The northern portion of Canaan Lake is presently privately owned while the south is County owned.

B. FISCAL IMPLICATIONS: Acquisition costs (many parcels have come into County ownership through tax foreclosures).

C. MAINTENANCE AND OPERATION REQUIREMENTS: Prevention of runoff directly into the stream and lake.

- F. FEES: N/A
NON-RESIDENT RESTRICTIONS/FEEs: N/A
ADDITIONAL COMMENTS: The subject property has been dedicated to the Suffolk County Nature Preserve as "forever wild". It is situated directly south and adjacent to two kettleholes that should be preserved.

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: Oak forest
- B. WETLANDS: N/A
- C. WATERBODIES: N/A
- D. KNOWN PROTECTED OR ENDANGERED SPECIES:
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Directly to the north are two kettleholes that should be preserved.

III. PROBLEMS/ISSUES:

- A. EXISTING USES: No authorized use occurs at present and the property is too small to conduct any type of passive recreational program.
- B. FACILITIES:

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: The Town of Brookhaven has proposed to preserve the two kettleholes to the north in open space as part of a cluster development. The County has proposed acquisition of the kettleholes and adjacent property. The cluster alternatives should be supported and if the Town of Brookhaven acquires the kettleholes, an agreement should be worked out to have the Town manage the County's property as well.

F. FEES:

NON-RESIDENT RESTRICTIONS/FEES:

ADDITIONAL COMMENTS: Portions of this trail pass through Robert Cushman Murphy Park in the towns of Riverhead and Brookhaven and that acreage is included in the park.

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Mature oak/pine forest

B. WETLANDS: None

C. WATERBODIES:

D. KNOWN PROTECTED OR ENDANGERED SPECIES:

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Pine Barrens, SGPA

III. PROBLEMS/ISSUES:

A. EXISTING USES: The trail system has a parking area and a trail head on Middle Country Road. A snow fence limits vehicular access. Garbage cans are provided.

B. FACILITIES: None

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: A trail could be cleared from one end to the other. The former Helen's Country Kitchen could be improved to become a comfort station/information center. Privatizing this facility to become a trading post would defray costs. Hikers could purchase supplies for the "expedition" and receive information on the upkeep of the trails. The "trading post" could sell items related to birding and hiking.

B. FISCAL IMPLICATIONS: Cost of improvements and trail clearing.

C. MAINTENANCE AND OPERATION REQUIREMENTS: Regular patrols and trail maintenance. Consider adopt-a-trail program for a Boy Scout troop or other organization such as L.I. Greenbelt Trails.

OTHER* a deteriorating bulkhead exists on the site.		

F. FEES: Informal access only; no fees at this time.
NON-RESIDENT RESTRICTIONS/FEES: N/A
ADDITIONAL COMMENTS:

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: Maritime shrubland; large dredged spoil area.
- B. WETLANDS: Tidal wetlands: Portion of site is on NYSDEC North American Waterfowl Management Plan priority list for wetland rehabilitation work involving tidal flow restoration, Open Marsh Water Management alterations for mosquito control, and control of common reed (*Phragmites australis*) invasion.
- C. WATERBODIES: Great South Bay; Bellport Bay; Narrow Bay.
- D. KNOWN PROTECTED OR ENDANGERED SPECIES: Least Tern (E); Swamp Sunflower (T).
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Severe limitations in extensive tidal wetland area on the easterly side of property. Tern nesting areas require protection during breeding season (April-July).

III. PROBLEMS/ISSUES:

- A. EXISTING USES: Informal use of site is occurring, including fishing and "over beach" boat launching. The Nature Conservancy has a wildlife protection agreement with the County. They have sectioned off a tern nesting area along the eastern/central portion of the site.
- B. FACILITIES: No facilities exist at site.

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: Bulkheaded marina is proposed with a boat launching ramp and parking; restaurant/concession; restroom and shower facilities. Also a walkway and picnicking areas are being suggested.
- B. FISCAL IMPLICATIONS: Major capital improvements are necessary to create a County marina complex on this site.
- C. MAINTENANCE AND OPERATION REQUIREMENTS: Developments could occur with a concessionaire responsible for improvements and operation.

TRAP AND SKEET		GOLF		MUSEUM	
OTHER * Tent, trailer and outer beach camping facilities: 150 sites+.					

F. FEES: \$5.00 daily fee; \$65.00 seasonal (15 tickets); Sr. Citizens -free during weekday. Outer beach camping fee - day use \$4.00; Sr./handicapped \$1.00; overnight use \$12.00 - Sr./handicapped \$6.00; other camping \$12.00/night.

NON-RESIDENT RESTRICTIONS/FEES: Outer beach overnight use \$50.00; other camping \$16.00/night.

ADDITIONAL COMMENTS: 4WD vehicles w/o permit who are residents, Sr. citizens or handicapped \$30.00. Other fees are charged for special uses, etc.

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Maritime shrubland, dredged spoil areas.

B. WETLANDS: Tidal wetlands.

C. WATERBODIES: Atlantic Ocean; Narrows Bay; Moriches Bay, Moriches Inlet.

D. KNOWN PROTECTED OR ENDANGERED SPECIES: Least Tern (E); piping plover; common tern (T); swamp sunflower (T); slender marsh-pine (E).

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Maritime interdunal swales - a NYS natural heritage program significant habitat. Severe limitations on development on wetlands and dune formations. Within COBRA boundary. Tern nesting areas require protection during breeding season (April-July).

III. PROBLEMS/ISSUES:

A. EXISTING USES: This is the largest County-owned ocean beach facility with many recreational uses. Uses that are in conflict with erosion areas should be re-evaluated. The Nature Conservancy has a wildlife protection agreement with the County. They have sectioned off tern nesting areas throughout the park.

B. FACILITIES: Existing bathhouse requires upgrading with needed improvements to the restrooms and shower facilities.

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: Improve existing facilities and evaluate environmentally sensitive erosion areas in order to improve these conditions so that further deterioration can be halted. Provide redeveloped site plan.

B. FISCAL IMPLICATIONS: Major capital expenditures are required.

C. MAINTENANCE AND OPERATION REQUIREMENTS: Upgrade restrooms and shower facilities. Improved landscaping could improve visual appearance especially near bathhouse. Moriches Inlet stabilization is required.

F. FEES: Camping \$12.00, Youth camping \$.50/person, duck hunting \$10.00, Picnicking \$25.00 reservation, vehicular \$2.00, boat rental \$5.00/hr., fishing \$1.00/person, canoeing \$1.00/canoe

NON-RESIDENT RESTRICTIONS/FEES: Camping \$16.00, Vehicle \$3.00

ADDITIONAL COMMENTS: Many of the historic structures are on the National Register of Historic Places and dedicated to the Suffolk County Historic Trust.

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: Pine/oak type of habitat interspersed by fields.
- B. WETLANDS: Freshwater wetlands adjacent to the river.
- C. WATERBODIES: Carmens River
- D. KNOWN PROTECTED OR ENDANGERED SPECIES: At Weeks Pond: Purple Everlasting (R); Fibrous Bladderwort (R); Whip Nutrush (R); Fewflower Nutrush (T); Button Sedge (T); Coastal Plain Pond Shore Habitat.
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Extensive freshwater wetland and surface water areas.

III. PROBLEMS/ISSUES:

- A. EXISTING USES: A park master plan was done in 1982 and SEQRA was completed. The stables were proposed to be moved away from the river. Current access points should be reevaluated. Conflict between firing range.
- B. FACILITIES: Historic structures need restoring.

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: The park master plan as generally approved should be followed. Active recreation should be confined to the southern portion of the park while passive recreation allowed to take place in the northern portion.
- B. FISCAL IMPLICATIONS: There are 14 historic buildings in the park needing restoration at a cost of over \$600,000.
- C. MAINTENANCE AND OPERATION REQUIREMENTS: Added personnel would be needed to cover view activities where barns and shooting range are presently located.

OTHER Stony Brook Community Fund (SBCF) Hercules Pavillion is on the site.		X

F. FEES :

NON-RESIDENT RESTRICTIONS/FEES:

ADDITIONAL COMMENTS: Pavillion contains historic Hercules Figurehead from Battleship USS Ohio and boat exhibit.

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: Upland portion contains maintained lawn area; low bluff found along the shoreline; low bushes along shore; some trees and Phragmites.
- B. WETLANDS: Tidal wetlands/mud flats fringe the upland shore.
- C. WATERBODIES: Site includes underwater lands in Stony Brook Creek.
- D. KNOWN PROTECTED OR ENDANGERED SPECIES: Waterfowl and shorebirds frequent Stony Brook Creek and tidal flats at low tide.
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: A portion of the low bluff is actively eroding (April 1992). Site is located in the 100-yr. floodplain.

III. PROBLEMS/ISSUES:

- A. EXISTING USES: Site is used for historic interpretation as well as passive use and access to the shore of Stony Brook Creek. The site is scenic and also offers an exceptional view of Stony Brook Harbor.
- B. FACILITIES: Hercules Pavillion is owned and maintained by SBCF, which maintains the site; it has been doing so since 1939; concrete seawall in place along portions of the low bluff and pavillion area. Shore erosion structures in need of repair.

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: Continue existing use. SBCF has a 10-yr. lease on the site with Parks Dept. (6/1/84 - 5/31/94), and will seek renewal of same. The lease states that the sole use of the property is for a "passive community park." SBCF is responsible for maintaining the grounds. Shore stabilization work has been performed by Suffolk County (see below).
- B. FISCAL IMPLICATIONS: Erosion control work at the site was undertaken by Suffolk County during the period from June - Nov. 1992. The work involved seawall repair, rip-rap placement for bank stabilization and wetland restoration at a cost of \$95,000.
- C. MAINTENANCE AND OPERATION REQUIREMENTS: Maintenance is handled by SBCF.

ROW BOAT RENTAL	SHOWERS	CROSS COUNTRY SKIING
HUNTING	RESTROOMS	NATURE TRAIL
TRAP AND SKEET	GOLF	MUSEUM
OTHER No organized activities are conducted on site; no facilities are located on this undeveloped parcel.		

F. FEES:

NON-RESIDENT RESTRICTIONS/FEES:

ADDITIONAL COMMENTS: The subject property is zoned "B" residence (22,500 sq.ft. lots). Parcels on east bank of Terrell River utilized for intensive duck farming are zoned "K" business.

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: About 80% of the site is forest; about 10% is old field; a beach/spit is located at the mouth of the Terrell River.
- B. WETLANDS: Four small freshwater wetlands with 2 ponds; extensive tidal wetland fringe located along Terrell River shore and along portion of shore on Moriches Bay. Portion of site is on NYSDEC North American Waterfowl Management Plan priority list for wetland rehabilitation work involving tidal flow restoration. Open Marsh Water Management alterations for mosquito control, and control of common reed (*Phragmites australis*) invasion.
- C. WATERBODIES: Site has frontage along the west bank of Terrell River and on Moriches Bay.
- D. KNOWN PROTECTED OR ENDANGERED SPECIES:
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Freshwater wetlands, ponds, tidal wetlands. The undisturbed character of the shoreline along this park is of significant value. The large expanse of woodland adjacent to the wetlands is also of concern. Terrell River is classified as "SC" (waters not suitable for primary contact recreation or shellfishing). Shoreline portion of the parcel is in the 100-yr. floodplain. Views from the shoreline along the bay and southern end of the river are impressive.

III. PROBLEMS/ISSUES:

- A. EXISTING USES: No authorized use occurs at present. Extensive duck farming activity has been conducted along east bank of Terrell River for decades. Nearly 800,000 cu. yds. of duck sludge were reported to be in the river bottom in 1968! The existing duck farm use and degraded water and sediment quality pose major constraints on the use of the shoreline portion of this county park.
- B. FACILITIES: No facilities are located on this site at this time. No channel has been dredged in the Terrell River.

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: Restoration of natural resources should be the highest priority use of this undeveloped county park. The marine wetland fringe along the Terrell River should be preserved in order to maintain a balance between developed and undeveloped shorelines along the marine edge in the Moriches Bay region. Shoreline alteration and disturbance of duck sludge deposits should be minimized. The old field areas on the upland portion of the parcel could accommodate limited access facilities in the future. The use of private property along the east bank of the Terrell River poses an important implication for this county park, should the existing duck farms cease operations in the future.
- B. FISCAL IMPLICATIONS: Private concession arrangements may generate funds for sludge removal and restoration.
- C. MAINTENANCE AND OPERATION REQUIREMENTS: Duck sludge sediments located on Town of Brookhaven underwater lands pose a long-term management/rehabilitation problem.

SWIMMING	CAMPING	HORSEBACK RIDING:
FISHING	PICNICKING	TRAILS
BOATING:	HIKING	RENTAL
LAUNCHING RAMP	BICYCLING	INDOOR ACTIVITIES
DOCKING	ACTIVITY FIELD	CONSERVATION/ED.PROGRAM
CANOE RENTAL	PLAYGROUND	FOOD CONCESSION/RESTAURANT
ROW BOAT RENTAL	SHOWERS	CROSS COUNTRY SKIING
HUNTING	RESTROOMS	NATURE TRAIL
TRAP AND SKEET	GOLF	MUSEUM
OTHER . Unauthorized trail bike activity apparent on all 3 parcels; no formal access provided.		

F. FEES:

NON-RESIDENT RESTRICTIONS/FEES:

ADDITIONAL COMMENTS: Consists of 3 non-contiguous parcels. Parcel A, located adjacent to Old Town Rd. is 12.4 acres and zoned light industrial (0.5 acre lots); Parcel B, bordering on Lower Sheep Pasture Rd. is 36.8 acres and zoned "B" residence (15,000 sq. ft. lots); and Parcel C, located south of proposed S. R. 5232A rights-of-way, is 26.9 acres and zoned light industrial. All 3 parcels have borders on LILCO and proposed S. R. 5232A right-of-ways. S. C. Parkland signs are posted.

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Parcel A is an old sand mine with primarily exposed surfaces in a bowl-type depression. Parcel B consists entirely of exposed sand mine pit with steep slopes. Parcel C consists of exposed sand mine surfaces; about half of this parcel is upland woods.

B. WETLANDS:

C. WATERBODIES:

D. KNOWN PROTECTED OR ENDANGERED SPECIES:

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: All three sites have been subject to dramatic disturbance, creation of steep scarps along their borders and elimination of native vegetation.

III. PROBLEMS/ISSUES:

A. EXISTING USES: All 3 parcels have steep exposed slopes and large denuded areas; all have evidence of past dumping activity (wood debris, construction materials, etc.). Parcels B and C have been inventoried in the "Airphoto Inventory of Potential Hazardous Dump Sites in Suffolk County, New York;" open dumping and barrel-like objects in pit bottoms were detected during the period from the 1960s to 1980s. Unauthorized trailbike usage is occurring on all parcels. Large expanses of disturbed, sandy areas provide for groundwater recharge (reduced transpiration), but all parcels are outside the South Setauket SGPA. The wooded portion of Parcel C buffers the residential development to the southeast.

B. FACILITIES:

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: The Three Village Area Study (1985) prepared by the Planning Dept. contained the following recommendations for Parcels A and C. Parcel A, adjacent to the Brookhaven Town High way Dept. yard "could be used for some public purpose or be retained as an open space buffer between the industrial and residential uses." At the very least, the steep bank that borders the residential development should be stabilized, and trailbike use eliminated at the site. Parcel C "could be used for residential development but most of the parcel should be retained for open space to act as a buffer between the existing houses and the relocated Route 25A and nearby industrial uses." The future use of Parcel B poses some interesting questions. The site is isolated due to the character of adjacent uses and its basin topography. It could be used as an intensive use facility for trailbike enthusiasts on a formal basis. Should this be pursued, site rehabilitation would be necessary. Conversely, other public non-park uses could be suitably located on the site; or the site could be sold to private interests for development.

B. FISCAL IMPLICATIONS: Parcel B could be sold, thus generating income to the County.

C. MAINTENANCE AND OPERATION REQUIREMENTS: Unauthorized access at all three parcels should be strictly controlled to prevent illegal dumping. Site rehabilitation costs would be incurred if the parcels are actively used.

NON-RESIDENT RESTRICTIONS/FEES:
ADDITIONAL COMMENTS:

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Mixed woodland

B. WETLANDS: Freshwater wetland

C. WATERBODIES: Carman's River watershed.

D. KNOWN PROTECTED OR ENDANGERED SPECIES: Featherfoil (T); Tiger Salamander (E); Collins Sedge (R)

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Most of property acquired under watershed protection program. Portion of property within the Wild, Scenic and Recreational Rivers' scenic and recreational categories within SGPA boundary.

III. PROBLEMS/ISSUES:

A. EXISTING USES: Central portion of preserve contains large old filed map with 75% County ownership. Some private parcels are subject to immediate development.

B. FACILITIES:

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: The Warbler Woods area should primarily be used as nature preserve with a trail system that connects to a north-south corridor in central Brookhaven and to the Carman's River. It is a prime site for water supply in west-central Brookhaven. The remaining "out" parcels should be acquired and the old filed map abandoned to increase the park acreage and deter further residential encroachment.

B. FISCAL IMPLICATIONS: Appraisal and acquisition of many small lots is time consuming and usually more expensive than acquiring a large tract of land. Some transfer of development rights is possible.

C. MAINTENANCE AND OPERATION REQUIREMENTS: Control of illegal dumping and maintenance of trails.

- A. UPLAND VEGETATION: Steep sloped wooded parcel.
- B. WETLANDS: None
- C. WATERBODIES: None
- D. KNOWN PROTECTED OR ENDANGERED SPECIES:
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Acquired with watershed preservation funds, but is not in pine barrens or SGPA. Small parcel acquired as historic trust landmarks.

III. PROBLEMS/ISSUES:

- A. EXISTING USES: Unrestricted access has allowed some dumping and mini-bike trails. Former junkyard at south end of property encroached on this parcel.
- B. FACILITIES: Most of the historic buildings are in poor condition and need \$200,000 for restoration. Consideration should be given to amending nature preserve status

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: The property adjoins a Suffolk County Water Authority well site, so it can be used for protection of the site or further wells. Expansion and upgrading of the historic site on Horseblock Road can benefit by having the watershed land act as a buffer. Other revenue producing uses should be planned within appropriate guidelines.
- B. FISCAL IMPLICATIONS: Cost of fencing and restoration.
- C. MAINTENANCE AND OPERATION REQUIREMENTS: A fence is needed to restrict access by residents from the surrounding large number of single family homes.

NON-RESIDENT RESTRICTIONS/FEES: N/A

ADDITIONAL COMMENTS: The two parcels have been dedicated to the Suffolk County Nature Preserve

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION:** Pine-oak type of habitat
- B. WETLANDS:** N/A
- C. WATERBODIES:** N/A
- D. KNOWN PROTECTED OR ENDANGERED SPECIES:**
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS:** SGPA, Pine Barrens

III. PROBLEMS/ISSUES:

- A. EXISTING USES:** Small isolated parcels of this type are hard to manage and become dumping areas for trash.
- B. FACILITIES:** None

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES:** Some type of swap procedure should be developed by the County to exchange the 2.5 acre parcel (667-2-13) for an area that is adjacent to larger County holdings that can be more efficiently managed. The other parcel should be retained and combined with adjacent 16.7 ac. County owned parcels. These should be dedicated for park purposes.
- B. FISCAL IMPLICATIONS:** Appraisal cost for exchange
- C. MAINTENANCE AND OPERATION REQUIREMENTS:** Small parcels are a maintenance and operation nightmare. A larger holding is easier to manage.

 ADDITIONAL COMMENTS:

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Pine forest with several fallow fields and beech maple stands.

B. WETLANDS: None

C. WATERBODIES: None

D. KNOWN PROTECTED OR ENDANGERED SPECIES: Unknown

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: None

III. PROBLEMS/ISSUES:

A. EXISTING USES: Illegal dumping. The site contains an old dirt road which apparently had been used to provide access to federal facilities on the site. (County parkland surrounds 1.1 acres of federal land that contains 1 building).

B. FACILITIES: None

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: This parcel would not lend itself to use as County parkland due to the small size of the site and the amount of debris. It should be cleaned up, fenced along the roadway to prevent future dumping and maintained as a natural buffer between the residential uses to the south and east and the federal use in the center of the parcel. An alternative could be local park usage managed by the Town

B. FISCAL IMPLICATIONS: Cleanup and fencing costs up front would be minimal compared to future liabilities of neighborhood children playing amongst the piles of debris.

C. MAINTENANCE AND OPERATION REQUIREMENTS: Maintenance costs could be minimized by preventing future dumping.

B. FACILITIES:

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: Even though the parcel is near the New York State Department of Environmental Conservation land and in the pine barrens, it should be sold. No public access is possible and one house could be built on the site.

B. FISCAL IMPLICATIONS: Funds received could be earmarked for another open space purchase.

E. ACTIVITIES AT SITE.

SWIMMING	CAMPING	HORSEBACK RIDING:
FISHING	PICNICKING	TRAILS
BOATING:	HIKING	RENTAL
LAUNCHING RAMP	BICYCLING	INDOOR ACTIVITIES
DOCKING	ACTIVITY FIELD	CONSERVATION/ED.PROGRAM
CANOE RENTAL	PLAYGROUND	FOOD CONCESSION/RESTAURANT
ROW BOAT RENTAL	SHOWERS	CROSS COUNTRY SKIING
HUNTING	RESTROOMS	NATURE TRAIL
TRAP AND SKEET	GOLF	MUSEUM
OTHER Informal access only; no organized activities or facilities.		

F. FEES:

NON-RESIDENT RESTRICTIONS/FEES:

ADDITIONAL COMMENTS: Site used primarily by boaters that either "beach" their craft, or anchor offshore near the beach.

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Maritime flora at upland portion of site; dune and beach communities; dredged spoil may have been placed on the site in the past.

B. WETLANDS: Tidal wetland fringe near the site.

C. WATERBODIES: Site is adjacent to L. I. Sound and Port Jefferson Harbor.

D. KNOWN PROTECTED OR ENDANGERED SPECIES: Piping plover, least tern, common tern.

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Site is part of undeveloped baymouth bar; SE portion of site has been historically used as nesting habitat by shorebirds; it is highly vulnerable to disturbance by humans/pets from April-July.

III. PROBLEMS/ISSUES:

A. EXISTING USES: No formal activities at site. There may be a debris/garbage problem associated with use during peak summer period. Disturbance of bird nesting activity is also a problem.

B. FACILITIES: No access facilities on-site. West jetty at entrance to Port Jefferson Harbor located at the site.

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: Site within CBRS Unit PO5; most of the site is within the 100-yr "V" zone floodplain. Should be managed in concert with McAllister County Park to the east. Colonial bird nesting sites should be protected during breeding season. This requires use of fencing, signs, etc. and public education pertaining to beach nesting birds. Site has been designated as a Suffolk County Sanctuary.

B. FISCAL IMPLICATIONS:

C. MAINTENANCE AND OPERATION REQUIREMENTS: Occasional inspections needed.

BOATING:		HIKING	X	RENTAL (Concession)	X
LAUNCHING RAMP		BICYCLING	X	INDOOR ACTIVITIES	
DOCKING		ACTIVITY FIELD	X	CONSERVATION/ED.PROGRAM (BOCES)	X
CANOE RENTAL		PLAYGROUND		FOOD CONCESSION/RESTAURANT	
ROW BOAT RENTAL		SHOWERS		CROSS COUNTRY SKIING	
HUNTING	X	RESTROOMS	X	NATURE TRAIL	X
TRAP AND SKEET		GOLF		MUSEUM (Indian)	X
OTHER Outer beach camping with self-contained units.					

F. FEES: Recreation vehicle \$50 permit & \$20/day, \$12 overnight. Horseback riding fee established by concessionaire, youth camping \$.50/person, picnicking \$20/group, Third house \$200/group.

NON-RESIDENT RESTRICTIONS/FEEs: Non-residents allowed at higher fee.

ADDITIONAL COMMENTS: A draft master plan for the park prepared by S.C. Parks Department is currently undergoing review.

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: Predominately old fields in various stages of succession, dunes adjacent to Block Island Sound, some maritime grasslands, and mixed deciduous forest.
- B. WETLANDS: Extensive freshwater wetlands around Big Reed Pond and salt water wetlands around Little Reed Pond.
- C. WATERBODIES: Big Reed Pond, Little Reed Pond and Block Island Sound.
- D. KNOWN PROTECTED OR ENDANGERED SPECIES: Around Big Reed Pond were many rare plants such as Royal Fern, Bayonet Rush, Lance-leaved White Violet, Swamp Rosemallow, vervain-leaved boneset, climbing boneset, steeplebush, and Whoreled Marsh Pennywort.
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Dune areas as well as the fresh and salt water wetlands.

III. PROBLEMS/ISSUES:

- A. EXISTING USES: Unrestricted beach camping is causing some problems. In addition, the trails and fields have become overgrown limiting access; they need to be maintained. A lack of fresh water limits camping in the north of the park.
- B. FACILITIES: A new stable has been constructed for the horseback riding concession. The Third House and associated cabin facilities are underutilized and offer a great opportunity for use as a restaurant and overnight accommodations.

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: Follow the recommendations of the draft park master plan. Any use of the Third House and associated facilities should provide the major access and final point to the rest of the park. It should not be separated from the rest of the park.
- B. FISCAL IMPLICATIONS:
- C. MAINTENANCE AND OPERATION REQUIREMENTS: Trails and camping facilities must be kept up.

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: SGPA, Pine Barrens

III. PROBLEMS/ISSUES:

A. EXISTING USES: Foot trails regularly used. Evidence of broken bottles/trash on site. Potential for dumping.

B. FACILITIES: None

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: This property has excellent potential for limited development such as marked trails, picnic area. Opportunity for trails to link up to adjacent existing and future greenbelts. Garbage receptacles should be available and trail markers established. Property boundaries should be marked or fenced to prevent park visitors from trespassing on private property.

B. FISCAL IMPLICATIONS: This property should be patrolled on a frequent or regular basis. Minor improvements should be made to bring this park up to standards as a passive recreation area.

C. MAINTENANCE AND OPERATION REQUIREMENTS: Protection from dumping

OTHER Hostel			

F. FEES: 50 cents per person per night, \$25 per night for shelters. Sweet Hollow Hall - \$25-150, daily room use. Horseback riding fee by Concessionaire.

NON-RESIDENT RESTRICTIONS/FEES:

ADDITIONAL COMMENTS: Campsites: 12 camping areas; four are open, 2 have shelters that include woodburning stoves, bathrooms and electric; six areas have lean-tos. *One historic trust building in park.

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Wooded Soils #63, 74: Mkb, MkC, Mfa, MnA, CpE, CpC, RdB, MkA, RdC, HaA, HaB

B. WETLANDS: Freshwater wetlands around ponds

C. WATERBODIES: Ponds

D. KNOWN PROTECTED OR ENDANGERED SPECIES:

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: In SGPA

III. PROBLEMS/ISSUES:

A. EXISTING USES: Walt Whitman Trail 8 miles from Walt Whitman home through West Hills County Park - circular trail includes Jaynes Hill (highest point on Long Island) w/views of the ocean from some points.

B. FACILITIES: Existing facilities subject to vandalism. Historic house has not been vandalized.

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: Continue or expand present uses. Rehabilitate buildings and enlarge residence so a park ranger family is on premises at all times. Consider museum facility and golf course on part of the land that is open. Detailed overall plan is needed. Continue addition of out parcels through acquisition of fee interest or conservation easement.

B. FISCAL IMPLICATIONS: Capital budget item needed. Golf course fees could offset some costs.

C. MAINTENANCE AND OPERATION REQUIREMENTS: Added personnel needed to properly manage this large and important park.

F. FEES: None

NON-RESIDENT RESTRICTIONS/FEES: None

ADDITIONAL COMMENTS: A nature center facility with a small natural history museum is located near a 50+ car/bus parking area on the Town of Islip property north of the County holdings where the various trails originate.

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Upland forest of oaks, hickories, grey birch, etc., grass/fields, dune/beach.

B. WETLANDS: tidal and freshwater wetlands. Portion of site is on NYSDEC North American Waterfowl Management Plan priority list for wetland rehabilitation work involving tidal flow restoration, Open Marsh Management alterations for mosquito control, and control of common reed (*Phragmites australis*) invasion.

C. WATERBODIES: Great South Bay

D. KNOWN PROTECTED OR ENDANGERED SPECIES: least tern (E) (Extensive listing of species is available at Nature Center)

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Approximately 75% of the site contains tidal and freshwater wetlands associated with Great South Bay.

III. PROBLEMS/ISSUES:

A. EXISTING USES: A long term lease agreement is in effect with the Town of Islip to maintain the property as a nature preserve with a 2 mile trail system, part of which is raised above the wetlands.

B. FACILITIES: A nature center is provided on the Town of Islip property to the north of the County holdings.

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: The existing management agreement should be continued with the Town of Islip. The County properties should be recommended to be placed into the Nature Preserve.

B. FISCAL IMPLICATIONS: Add an additional existing County holding adjacent to this park to the east under parks jurisdiction (500-465-01-030) and eliminate tax payment.

C. MAINTENANCE AND OPERATION REQUIREMENTS: The trail system is well maintained by the Town of Islip. However, accurate demarcation of the County property by posting, etc., should be undertaken. The Town signage should be corrected to indicate accurate ownership as well.

- F. FEES: N/A
 NON-RESIDENT RESTRICTIONS/FEES:
 ADDITIONAL COMMENTS: No activities on site. Maintain natural vegetation for wetland protection and drainage purposes.

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: oak/pine
- B. WETLANDS: freshwater wetlands
- C. WATERBODIES: Orowoc Creek (west branch)
- D. KNOWN PROTECTED OR ENDANGERED SPECIES: A species list was compiled by Chris Mangels (The Nature Conservancy 3/90)
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Entire area is wetland with adjacent upland to the stream corridor which flows into Great South Bay

III. PROBLEMS/ISSUES:

- A. EXISTING USES:
- B. FACILITIES:

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: Natural vegetation should be retained for freshwater wetland and natural drainageway protection and preservation. The remaining properties presently not placed in Nature Preserve should be recommended for inclusion.
- B. FISCAL IMPLICATIONS: Development of a nature trail in conjunction with the Town of Islip and the Islip Public Schools property north of Brook Street is being considered. An additional 2.2 acres of County land should be placed into parks within this watershed for a tax savings of \$7200.00.
- C. MAINTENANCE AND OPERATION REQUIREMENTS: Periodic cleanup and maintenance to provide proper stream flow and drainage.

F. FEES: Weekday \$15; weekend \$16; Seniors \$7-9; Cart \$20. Marina \$28.50/ft. to \$30/ft.; Transient docking Res. \$25-30/night. 154 slips, 8 transient slips.
 NON-RESIDENT RESTRICTIONS/FEES: Weekday \$25; weekend \$28; Non-res. transient docking \$40-50/night
 ADDITIONAL COMMENTS: Staffed by 1 supervisor, 3 full-time and 3 part-time employees. Timber Point Marina is included in this park.

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: landscaped/open areas
- B. WETLANDS: Most located on adjacent N.Y.S. Conservation Area
- C. WATERBODIES: Tidal ponding, Great South Bay, Connetquot River
- D. KNOWN PROTECTED OR ENDANGERED SPECIES: Least Tern, Osprey
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Geese-non migratory

III. PROBLEMS/ISSUES:

- A. EXISTING USES: Inadequate parking for mixed use of golf and catering. Manual sprinkling system requires 2 staff for 1 day.
- B. FACILITIES: Roof leaks; no heat in golf pro shop; + a/c poor. Insufficient toilet (urinal) facilities. Clubhouse and other historic house require almost \$200,000 to upgrade them.

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: Automatic sprinkler system including new lines (1) Roof for cart barn, or new structure. Upgrade 2 to 9 holes on Blue & Red courses and create an "Executive" 9 hole course to attract new clientele.(1) Synchronize the 3-9 hole layouts with sprinkler installation. Create picnic area and canoe launching site on vacant parcel at north end of park. Launching ramp, other than police facility, is needed.
- B. FISCAL IMPLICATIONS: Separate budget for course maintenance
- C. MAINTENANCE AND OPERATION REQUIREMENTS: Fill soil needed to reduce flooding. Chemical supplies a) more needed b) improve distribution. Equipment needed.

F. FEES:

NON-RESIDENT RESTRICTIONS/FEES:

ADDITIONAL COMMENTS: There are 10 buildings on the site that are part of the historic trust. *1,253.7 acres of this park are in the Town of Brookhaven

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: Pine Barrens, oak-pine forest and open fields
- B. WETLANDS: Extensive freshwater wetlands
- C. WATERBODIES: Peconic River, Swan Pond
- D. KNOWN PROTECTED OR ENDANGERED SPECIES: Mountain bellwort E, tiger salamander E, Nuttall's lobelia R, reticulated nutrush R, rose coreopsis R, Carolina redroot T, drowned horned rush E, comb-leaved mermaid weed R, ludwigia R, lateral bluet U, barrens bluet damselfly U, short-beaked bald-rush R, Martha spotted skimmer U, painted bluet U, black spotted skimmer U, quill-leaf arrowhead E, long-beaked bald-rush R, rush bladderwort R, hiddenfruit bladderwort R, pine-barren gerardia R, banded sunfish SC, small floating bladderwort R, fibrous bladderwort R, coastal barrens buckmoth SC, knotted spikerush T, two-flowered bladderwort R, three-ribbed spikerush T, slender blue flag U, aster concolor E, grasshopper sparrow P-SC, catfoot U, northern cricket frog T, long-tubercled spikerush T, silverweed R, acadian flycatcher P, silvery aster E, sedge (carex hormathodes) R
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Park is in the NYS Wild, Scenic and Recreational River System and classified as scenic and recreational. Also within SGPA and Pine Barrens boundaries. Pine Barrens shrub swamp; coastal plain pond shore; and coastal plain poor fen habitats exist within this park system.

III. PROBLEMS/ISSUES:

- A. EXISTING USES: The park is a hunting area for raptors and habitat for deer, grouse, woodcock, water-loving passerine birds, weasel, fox and opossum. Lack of parking for hunters and canoe launching.
- B. FACILITIES: Biological Field Research Station leased to State University at Stony Brook (2 buildings); 8 other historic trust buildings need over \$400,000 repairs.

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: Create County access and parking areas similar to State and Federal facilities. Provide additional sites for cars with launch ramps for hand carried craft. Current signage is confusing and needs distinction between Robert Cushman Murphy Park and Peconic River Park.
- B. FISCAL IMPLICATIONS: Capital budget item needed for recreational facilities and historic preservation.
- C. MAINTENANCE AND OPERATION REQUIREMENTS: Personnel needed to control unauthorized access especially with off-road vehicles. 901 acres are managed by NYSDEC Robert Cushman Murphy County Park

HUNTING	RESTROOMS	X NATURE TRAIL
TRAP AND SKEET	GOLF	MUSEUM
OTHER Only 15 acres have been developed at the northwest corner of the lake		

F. FEES:

 NON-RESIDENT RESTRICTIONS/FEES:
ADDITIONAL COMMENTS:

*115.4 acres in Town of Smithtown; 53.9 in Islip, and 35.5 in Brookhaven

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Red Maple, oak, and locust forest

B. WETLANDS: Freshwater wetlands in the Great Marsh and edge of Lake.

C. WATERBODIES: Lake Ronkonkoma

D. KNOWN PROTECTED OR ENDANGERED SPECIES:

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Great Marsh and area adjacent lake

III. PROBLEMS/ISSUES:

A. EXISTING USES: Parks Department has limited personnel to supervise activities. Swimming is not allowed due to lack of lifeguards.

B. FACILITIES: In Raynor Park, 2 ball fields, a handball court and child's playground exist but are not actively managed by the Parks Department.

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: The County in the 1970's and 80's, acquired extensive holdings around Lake Ronkonkoma for open space purposes in order to remediate water quality problems that exist in the lake. It should be remembered that the current holdings were acquired for this purposes and that any uses of these properties should not add pollution loads to the lake. If the County does not wish to maintain and staff the active parkland around the lake, perhaps an agreement can be worked out with the towns to manage the County holdings. For example, the Lake Shore Road Park could be managed by the Town of Smithtown since it is adjacent to their beach. Raynor Park could be managed by the Town of Brookhaven since it is adjacent to their beach.

B. FISCAL IMPLICATIONS:

C. MAINTENANCE AND OPERATION REQUIREMENTS: None, if Town agreements can be reached.

 ADDITIONAL COMMENTS:

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: Dwarf Pine Plains and Pitch Pine-Oak-Heath Woodland habitat.
- B. WETLANDS: None
- C. WATERBODIES: None
- D. KNOWN PROTECTED OR ENDANGERED SPECIES: Coastal Barrens Buckmoth (U-SC); A Noctuid Moth (U); Herodias Underwing (U); Chaetagnalea Cerata (U); Jarr Underwing (U); Pink Sallow (U); Violet Dart (U); Dusted Skipper (U); Near Z. Lunifera (U); Northern Harrier Hawk (T)
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Globally unique dwarf pine plains forest. Many parcels are in nature preserve category. Also within SGPA and Pine Barrens boundaries. Dwarf Pine Plains habitat; Pitch Pine-Oak-Heath Woodlands habitat.

III. PROBLEMS/ISSUES:

- A. EXISTING USES: There is no organized public access. The parcels in this property are generally non-contiguous since many privately owned parcels exist on parts of old filed maps.
- B. FACILITIES:

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: This property is a watershed and habitat protection area. Nature study should be primary uses. The total acreage to be managed should be 2,000 acres. This would mean acquiring over 1,000 acres and abandoning the many old filed map streets.
- B. FISCAL IMPLICATIONS: Many parcels are presently difficult to build on, so foreclosures and donations rates are high. Over the long term, public expenditures may not be large. In addition, there is an active transfer of development rights program to preserve some of this land.
- C. MAINTENANCE AND OPERATION REQUIREMENTS: The main maintenance problem is avoiding dumping on the land.

F. FEES:
NON-RESIDENT RESTRICTIONS/FEES:
ADDITIONAL COMMENTS: 138 acre private golf course is within the Hampton Hills property.

II. ENVIRONMENTAL CHARACTERISTICS:
A. UPLAND VEGETATION: Pine/oak forest; dwarf pine plains transition zone; dwarf pine plains. Soil Map #59

B. WETLANDS: Freshwater wetlands near Wildwood Lake

C. WATERBODIES: Adjacent to SW/S Wildwood Lake, a prime wildlife area

D. KNOWN PROTECTED OR ENDANGERED SPECIES: Ruffed grouse, northern harrier hawk (T), coastal barrens buck moth (U-SC), eastern tiger salamander (E). Also see Dwarf Pine Plains (SH 03).

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Southwest quadrant Dwarf Pine Plains. Savannah-like transition zone between Pine Barrens and Dwarf Pines. Site(s) of archeological significance.

III. PROBLEMS/ISSUES:
A. EXISTING USES: Hiking. Tract includes nature preserves on old filed maps and other County parcels north of Sunrise Highway, east of Speonk- Riverhead Road and south of Riverhead-Moriches Road.

B. FACILITIES: Trails (see maps)

IV. RECOMMENDATIONS:
A. RECOMMENDED POLICY/USES: Continue hiking uses. Negotiate public use of golf course. Encourage bird watching, photography, artists, conservation education. More small parking lots (1-2 cars) at trail heads should be built. Cooperate w/L.I. Greenbelt Trail Conference or hire rangers to ticket unauthorized uses. Out parcels on old filed maps should be acquired to consolidate holdings.

B. FISCAL IMPLICATIONS: Use of TDR, tax sale, cluster can reduce cost of out parcels.

C. MAINTENANCE AND OPERATION REQUIREMENTS:

F. FEES: Hunting fees

NON-RESIDENT RESTRICTIONS/FEES:

ADDITIONAL COMMENTS: The Black Duck Lodge and associated facilities, together with a grave yard and archaeological site (old foundations) are in the park.

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: Pine/Oak Forest
- B. WETLANDS: Freshwater and extensive salt marsh areas
- C. WATERBODIES: Goose, Birch, Mill and Hubbard Creeks and Penny Pond.
- D. KNOWN PROTECTED OR ENDANGERED SPECIES: saltmarsh loosestrife (E), possum-haw (T), least tern (E), osprey (T), piping plover (E), swamp sunflower (T), marsh fimbry (T), eastern mud turtle (T), fibrous bladderwort (R), seabeach knotweed (U)
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: water wetlands, white cedar swamp

III. PROBLEMS/ISSUES:

- A. EXISTING USES: Black Duck Lodge has an apartment in it which is leased out to a park employee.
- B. FACILITIES: For the most part, Black Duck Lodge and ancilliary facilities are in poor condition and need extensive restoration.

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: Restoration of buildings to show the park's historic and environmental past. This could include Indian in-habitants through the period of hunting, mills, farming and saltwater productivity.
- B. FISCAL IMPLICATIONS: Historic restoration is very expensive. The part of the Hotel/Motel Tax going to the Office of Historic Services is for this purpose. \$120,000 is needed for the lodges and \$12,000 for smaller buildings.
- C. MAINTENANCE AND OPERATION REQUIREMENTS: Resident park ranger needed.

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: Coastal plain pond shore habitat
- B. WETLANDS: Freshwater wetlands
- C. WATERBODIES: Series of ponds
- D. KNOWN PROTECTED OR ENDANGERED SPECIES: (within pond system) Carolina Redroot (T), Pigmyweed (E), Pine Barren Gerardia (R), Rose Coreopsis (R), Southern Yellow Flax (T), White Milkweed (T), Ludwigia (R), Knotted Spikerush (T), Lespedeza (R), Creeping St. John's-Wort (E), Wafer-Ash (R), White Bonset (E), Reticulated Nutrush (R), Long-beaked Bald-Rush (R), Short-beaked Bald-rush (R), Tiger Salamander (E)
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Some parcels were acquired by Nature Conservancy and turned over to Suffolk County with nature preserve status. Also located within the Pine Barrens and SGPA boundaries.

III. PROBLEMS/ISSUES:

- A. EXISTING USES: This land is part of a greenbelt system extending from the Atlantic Ocean to the Village of Sag Harbor. Ownership is by Suffolk County, Town of Southampton, Village of Sag Harbor and Nature Conservancy.
- B. FACILITIES:

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: A continuous trail system around the ponds with small passive use areas would allow public access. A limited parking area would be needed on the disturbed land.
- B. FISCAL IMPLICATIONS: Further acquisitions are needed to complete the greenbelt. Any of the current owners could acquire new parcels.
- C. MAINTENANCE AND OPERATION REQUIREMENTS: A joint management agreement is necessary.

TRAP AND SKEET		GOLF		MUSEUM
OTHER *No lifeguard provided; surfing. **Outer beach camping facilities.				

F. FEES: Outer beach camping fee - day use \$4.00, Sr.Citizen/handicapped \$1.00; overnight use \$12.00, Sr. Citizen/handicapped \$6.00.

NON-RESIDENT RESTRICTIONS/FEES: Outer beach overnight use \$50.00.

ADDITIONAL COMMENTS: 4WD vehicles w/o permit who are residents, Sr. Citizens or handicapped \$30.00. Other fees are charged for special uses,etc.

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: Maritime shrubland; open fields; dredged spoil areas.
- B. WETLANDS: Tidal and freshwater wetlands.
- C. WATERBODIES: Atlantic Ocean; Shinnecock Bay; Shinnecock Inlet.
- D. KNOWN PROTECTED OR ENDANGERED SPECIES: Least tern (E); Common tern (T).
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Severe limitations on development on wetlands and dune formations. Within COBRA boundary. Tern nesting areas require protection during breeding season (April-July).

III. PROBLEMS/ISSUES:

A. EXISTING USES: The Village of Southampton has commented that the County park is generating too much oversized vehicular traffic along Dune Road. The Nature Conservancy has a wildlife protection agreement with the County. They have sectioned off a tern nesting area in a central portion of the site.

B. FACILITIES:

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: Expansion of the site with a proper parking area and formal bathhouse facility could be considered. Resolve potential conflict areas among the 4WD camping area, tern nesting sites and sensitive erosion areas.

B. FISCAL IMPLICATIONS: Capital program items needed.

C. MAINTENANCE AND OPERATION REQUIREMENTS: Shinnecock Inlet stabilization is required.

F. FEES: None

NON-RESIDENT RESTRICTIONS/FEES:

ADDITIONAL COMMENTS: Town of Southampton leases the parking lot area located at the eastern terminal of the site at Shinnecock Inlet. Used only by Town residents.

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Dune vegetation; maritime shrubland.

B. WETLANDS: Tidal and freshwater wetlands.

C. WATERBODIES: Atlantic Ocean; Shinnecock Bay; Shinnecock Inlet.

D. KNOWN PROTECTED OR ENDANGERED SPECIES: Least tern (E); common tern(T); roseate tern (E); piping plover (E); black skimmer (D); seabeach knotweed and catfoot.

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Severe limitations on development on wetlands and dune formations. Within COBRA boundary. Tern nesting areas require protection during breeding season (April-July).

III. PROBLEMS/ISSUES:

A. EXISTING USES: Informal uses only. The Nature Conservancy has a wildlife protection agreement with the County. They have sectioned off certain nesting areas throughout the site.

B. FACILITIES: None.

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: Due to narrow width of beach and dune area to road, uses of the site are severely restricted. It is an environmentally sensitive area that is primarily undeveloped. Allowing County residents access to the Town parking lot at no additional expense should be allowed.

B. FISCAL IMPLICATIONS:

C. MAINTENANCE AND OPERATION REQUIREMENTS: Shinnecock Inlet stabilization is required. Maintenance of east end parking lot needed if it will be available for County residents.

- F. FEES:
 NON-RESIDENT RESTRICTIONS/FEES:
 ADDITIONAL COMMENTS: *Also BR 33 (202 acres located in Town of Brookhaven)

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: Pine/Oak forest in morainal areas with high elevations (Bald Hill) and steep slopes.
- B. WETLANDS: A number of locations of kettlehole freshwater wetlands south of Nugent Drive.
- C. WATERBODIES: None
- D. KNOWN PROTECTED OR ENDANGERED SPECIES: Tiger salamander (E); sweet-bay (U); ruffed grouse; woodcock; great horned owl
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: SGPA, Pine Barrens

III. PROBLEMS/ISSUES:

- A. EXISTING USES: This undeveloped open space and watershed protection property has road cuts that have allowed dumping. Two old filed maps with approximately 20 lots remain within the park areas.
- B. FACILITIES:

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: The 655 acre central portion of this park can be used for active recreation, primitive camping and a scenic trail. The remainder can be part of a trail system in the area. Acquisition of the remaining "out" lots and abandonment of the streets will allow necessary management such as fencing to restrict dumping. To the west of this property are County parcels and an old filed map. With clustering opportunities, this park can be expanded in the future to include some of the unconnected parcels.
- B. FISCAL IMPLICATIONS: An overall plan and capital budget will be needed. Fencing and major cleanup required.
- C. MAINTENANCE AND OPERATION REQUIREMENTS: Personnel for the park will be needed.

B. WETLANDS: None

C. WATERBODIES: None

D. KNOWN PROTECTED OR ENDANGERED SPECIES: Unknown

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: A former Native American burial ground and fort.

III. PROBLEMS/ISSUES:
A. EXISTING USES: Highland Road is an unimproved dirt right-of-way. Potential exists for dumping. No access should be permitted onto this site due to the nature of the parcel.

B. FACILITIES: None

IV. RECOMMENDATIONS:
A. RECOMMENDED POLICY/USES: There is potential for acquisition of a 2.8 acre parcel to the north which would create an opportunity to abandon the road and limit unauthorized access. This additional parcel has a deep kettlehole depression. A fence would protect the area, however, signs may draw attention to the site and its artifacts. Property should be placed in historic trust for future archeological study.

B. FISCAL IMPLICATIONS: Cost of acquisition

C. MAINTENANCE AND OPERATION REQUIREMENTS: Unauthorized access to property must be controlled.

F. FEES:

NON-RESIDENT RESTRICTIONS/FEES: N/A
ADDITIONAL COMMENTS:

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Varied from mature oak forest in the south to a beach with dunes.

B. WETLANDS: Tidal wetlands and ponds, freshwater wetlands

C. WATERBODIES: Goldsmith's Inlet, Long Island Sound

D. KNOWN PROTECTED OR ENDANGERED SPECIES: Unknown

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Parcel appears to have limited improvement potential due to high percentage of marshy soil conditions near road frontage. Long Island Sound frontage undergoing severe erosion.

III. PROBLEMS/ISSUES:

A. EXISTING USES: Appears to be of limited use to local residents as trail is well worn to beach.

B. FACILITIES: Small foot bridge to provide pedestrian access to waterfront.

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: This park has great potential for limited uses. This property can accommodate swimming, fishing, hiking and picnicking. A small parking area could be set up adjacent to Sound View Avenue.

B. FISCAL IMPLICATIONS: It appears to have a very small capacity to generate an income because space available for parking is limited.

C. MAINTENANCE AND OPERATION REQUIREMENTS: Park personnel needed.

F. FEES:

NON-RESIDENT RESTRICTIONS/FEES: Camp - Private lease by SCOPE - Not open to general public.
ADDITIONAL COMMENTS:

II. ENVIRONMENTAL CHARACTERISTICS:

A. UPLAND VEGETATION: Forest, dunes and beach.

B. WETLANDS: Freshwater wetlands

C. WATERBODIES: Great Pond

D. KNOWN PROTECTED OR ENDANGERED SPECIES: Unknown

E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Long Island Sound shoreline undergoing severe erosion.

III. PROBLEMS/ISSUES:

A. EXISTING USES: Buildings are in disrepair and in need of much maintenance.

B. FACILITIES: Peconic Dunes County Park is a 37.1 acre parcel located in the Town of Southold. It has slightly less than 1000 ft. of beach frontage along the Long Island Sound. In addition, it has approximately 500 ft. of frontage along Great Pond (a 30 acre freshwater lake with no other public access).

The parkland is set up for use as a camp. It contains 24 buildings including an official caretaker's house, 16 campers' cabins (which include 2 large "sandcastles" which sleep 24 children and 4 counselors each), a lake house, a maintenance cabin, a cook's cabin, a pump house, a mess hall, a recreation center (which houses an arts and crafts center, offices, and a meeting room), an infirmary and an old theatre building (presently used for storage since it is in disrepair and considered unsafe for children).

A field review of the site revealed damage to the dunes and several of the structures, apparently caused by recent winter storms/hurricanes. There is evidence that spring repairs are underway, however, there is much room for improvement.

The management of the park/campground is handled by a private- non-profit group, SCOPE (Suffolk County Organization for the Promotion of Education).

IV. RECOMMENDATIONS:

A. RECOMMENDED POLICY/USES: Maintain camp use and review lease agreement.

B. FISCAL IMPLICATIONS: County is paid \$833 per month for rental of all 24 buildings, but is responsible for assisting in maintenance.

C. MAINTENANCE AND OPERATION REQUIREMENTS: Should be handled by the tenant.

- A. SITE NAME: *Orient County Park* AERIAL PHOTO: S-39 (88)
- B. ACCESS: PARKING AVAILABILITY HANDICAPPED ACCESS
RESTRICTIONS: Swift currents and electric power line limit swimming
- C. TOTAL AREA 48.5 (ac.) IMPROVED PARK (ac.) UNIMPROVED PARK (ac.)
NATURE PRESERVE (ac.) WATERSHED PROTECTION (ac.)
BIRD SANCTUARY (ac.) HISTORIC TRUST (ac.) OTHER 48.5 (ac.)
- D. CURRENT USAGE: YEAR ROUND SEASONAL CLOSED **X**
ACTIVE PASSIVE
- E. ACTIVITIES AT SITE:

SWIMMING	CAMPING	HORSEBACK RIDING:
FISHING	PICNICKING	TRAILS
BOATING:	HIKING	RENTAL
LAUNCHING RAMP	BICYCLING	INDOOR ACTIVITIES
DOCKING	ACTIVITY FIELD	CONSERVATION/ED.PROGRAM
CANOE RENTAL	PLAYGROUND	FOOD CONCESSION/RESTAURANT
ROW BOAT RENTAL	SHOWERS	CROSS COUNTRY SKIING
HUNTING	RESTROOMS	NATURE TRAIL
TRAP AND SKEET	GOLF	MUSEUM
OTHER		

- F. FEES:
NON-RESIDENT RESTRICTIONS/FEES:
ADDITIONAL COMMENTS:

II. ENVIRONMENTAL CHARACTERISTICS:

- A. UPLAND VEGETATION: 90% old field, 10% woodland
- B. WETLANDS: None
- C. WATERBODIES: Long Island Sound and Gardiners Bay
- D. KNOWN PROTECTED OR ENDANGERED SPECIES:
- E. ENVIRONMENTALLY SENSITIVE AREAS/RESTRICTIONS: Flood area, erosion area

III. PROBLEMS/ISSUES:

- A. EXISTING USES: Nearby state park has beach, playgrounds and fishing
- B. FACILITIES:

IV. RECOMMENDATIONS:

- A. RECOMMENDED POLICY/USES: Generally, use for passive activities to take advantage of waterfront views - parking for fishing area, sheltered seating areas, footpath around property and jogging area. Pedestrian connection to ferry terminal for standbys to ferry. Playground could be located near center of parcel.
- B. FISCAL IMPLICATIONS: Capital funds needed for improvement. Fees probably not feasible at this time for use of property.
- C. MAINTENANCE AND OPERATION REQUIREMENTS: County maintenance needed.

Acknowledgments

This Department wishes to thank the Towns that supplied all the information on local recreation and open space, along with the Nature Conservancy providing information on their extensive holdings throughout the County.

The Staff of this Department especially thanks the Suffolk County Department of Parks, Recreation and Conservation. Commissioner Edward Wankel and his staff provided extensive assistance in gathering data and developing the policy recommendations.

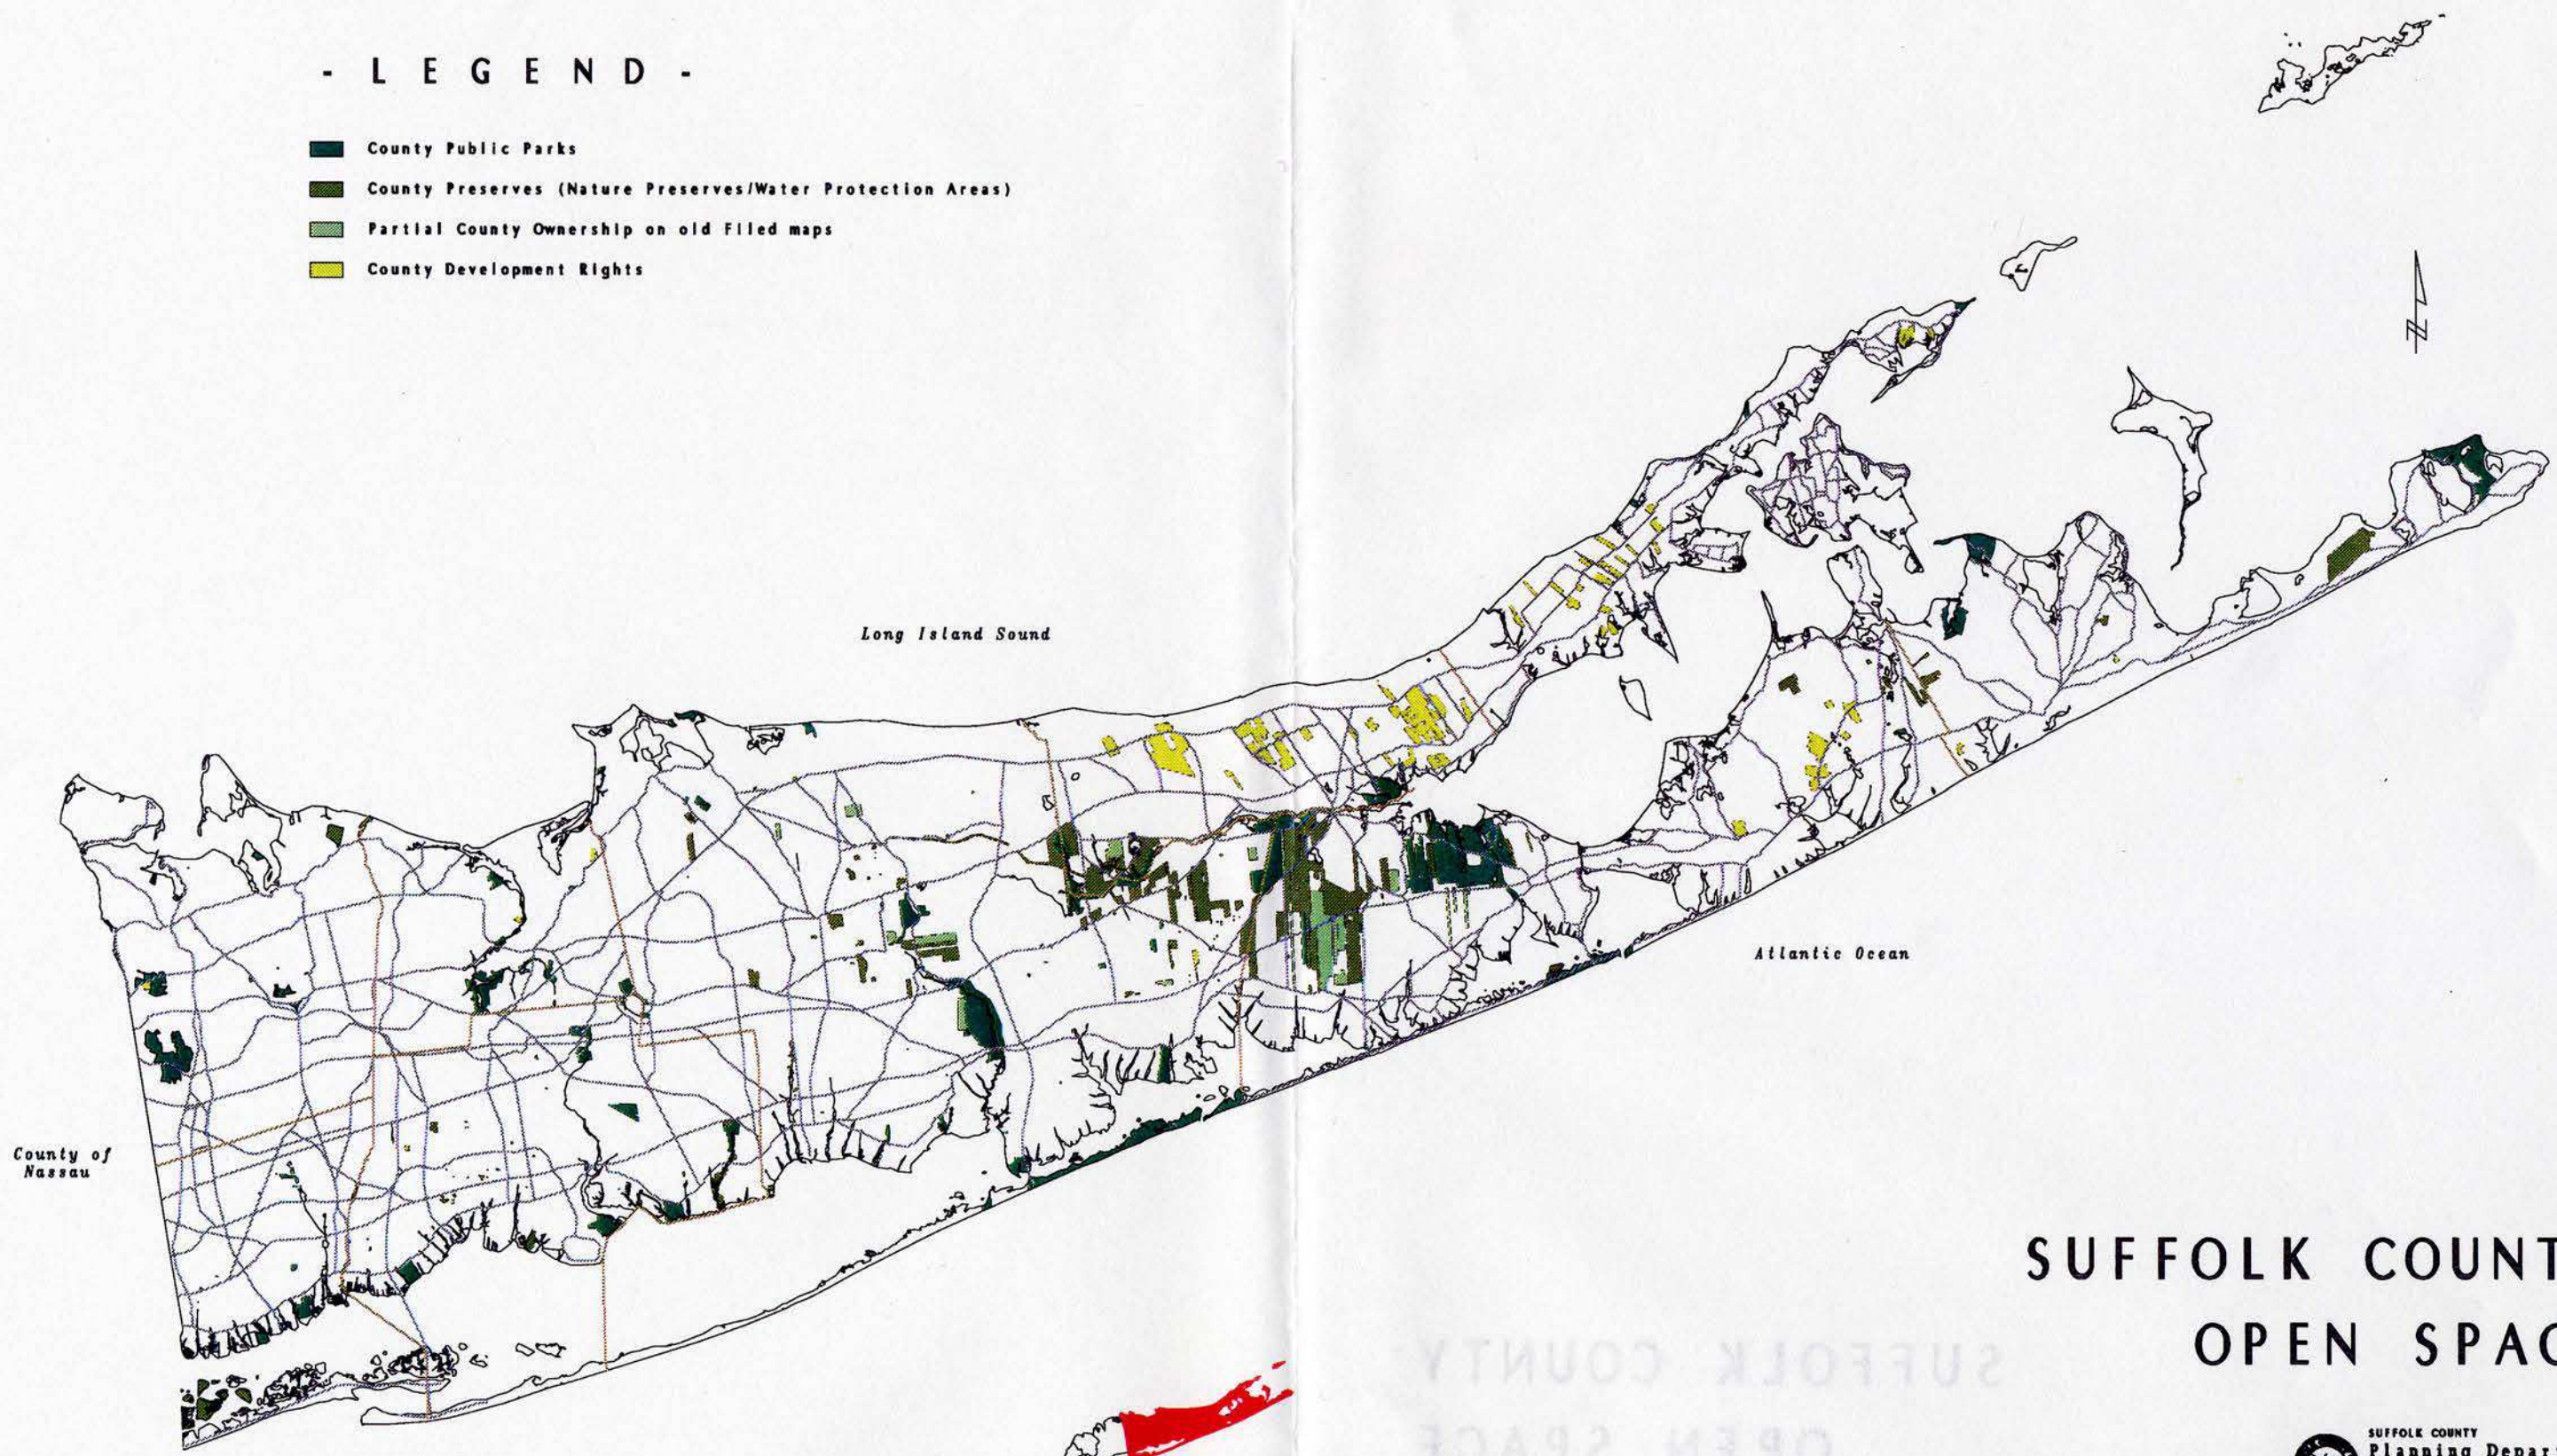

The Staff extends its appreciation to Messrs. Schuyler (Bud) Corwin, Joe Paige, Dean Phillippi, Dave Salvatore, William Sickles, Larry Hynes and John Turner of the Department of Parks, Recreation and Conservation, and Messrs. Donald Weir and Jack Hauptman of FINS for their assistance in the off-road vehicle portion of the report.

Finally, this study was coordinated by the late Arthur H. Kunz, Planning Department Director from 1989 to 1993. His extensive knowledge of Suffolk County gained throughout his thirty-year association with the Suffolk County Planning Department was an extraordinary resource in the development of this study. The staff acknowledges his gifted leadership.
